The Michael Turner Collection Chas Parker, Michael Turner, 2020-11 For over 50 years, renowned motor sport and aviation artist Michael Turner annually produced a set of paintings depicting stand-out moments from that year's Formula One and sports car racing season. The paintings were reproduced as a set of Christmas cards and made available through Michael's own company, Studio 88, which he formed in 1963. Over the years, these cards became highly-collectable to the extent that, in 1992, Michael's wife, Helen, formed a Collectors' Club which quickly gained a worldwide membership. Now, for the first time, the entire collection of cards produced between 1960 and 2016 is published together in the book, 'The Michael Turner Collection', written by Chas Parker in conjunction with Michael.

Automotive Mechatronics: Operational and Practical Issues B. T. Fijalkowski, 2010-11-25 This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWB dispulsion mechatronic control systems; VOLUME II: SBW AWS diversion mechatronic control systems; ABW AWA suspension mechatronic control systems. This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required.

Innovation, Sustainability and Management in Motorsports Hans Erik Næss, Anne Tjørndal, 2021-05-18 "There's probably no better sport than Formula E to present and study the science and practice of innovation within (motor)sport, and this book is a must read for those active within this fascinating area". - Dr. Kristof de Mey, Sports Technology, Innovation & Business Developer at Ghent University, Belgium This open access book provides novel insights on management innovation and sustainability in motorsport. Utilizing the all-electric racing championship called Formula E as case, it draws upon data from multiple sources such as sustainability reports of Formula and its stakeholders, media data, podcasts and newspaper articles, partner publications, and social media outputs. It aims to generate a theoretical model that describes and explains the optimal conditions for innovation when it comes to enhancing a sport organisation's commercial product. Apart from its general transferability to sports research, this

model enables further study of a motorsport phenomenon that has been hailed by media as the championship, which affirms money in sustainability. It has also been emphasized by sport researchers as a highly relevant case to study management innovation. This book will be interesting to academics working in sports management, knowledge management, innovation and sustainability. Hans Erik Næss (b. 1978) is an Associate Professor in Sport Management at Kristiania University College, Norway. He holds a PhD in sociology from the University of Oslo and is the author of several peer-reviewed articles and books on motorsports, including *A History of Organizational Change: The case of Fédération Internationale de l'Automobile (FIA) 1945-2020*. Anne Tjønndal (b. 1988) is an Associate Professor in Sociology of Sport at Nord University, Norway. She holds a PhD in sociology from Nord University and has published articles in high-quality international journals on topics like social innovation, gender and inclusion/exclusion in sport. Tjønndal is the Celia Brackenridge International Research Award winner for 2019.

Global Practices of Corporate Social Responsibility Samuel O Idowu, Walter Leal Filho, 2008-12-21 Being socially responsible on the part of corporate entities is now no longer an option, it is part of their normal business obligations to all their stakeholders regardless of whether these are primary or secondary stakeholders. Modern societies around the world now expect corporate entities of all shapes and forms to be socially responsible in whatever they do; the “Global Practices of Corporate Social Responsibility” is a first attempt at bringing together in one book experts' accounts of how corporate entities in twenty independent nations around the world are dealing with the issue of CSR. The world today faces diverse social problems. These become apparent as one moves from one country to the next, interestingly, society now expects corporations to help in finding solutions to these problems. The problem of global warming affects us all; modern corporations can no longer continue to assume that the problem will go away, if nothing is done by them. We can all make a little difference by our actions.

Management of Event Operations Julia Tum, Philippa Norton, 2006-08-11 The Management of Event Operations: project management, planning and customer satisfaction provides an introduction to the management of operations for the event planner and venue provider. Taking an holistic view of an event enterprise, it links the traditional topics within operations management to present a coherent and hands-on approach specifically for the events manager. The approach is pragmatic and is dictated by practical consequences and considerations, which are so important to an event manager who balances many views and needs from diverse stakeholders.

International Comparisons of Real Product and Purchasing Power Irving B. Kravis, Alan W. Heston, Robert Summers, United Nations. Statistical Office, World Bank, 1978 The purpose of the United Nations International Comparison Project (ICP) is to compare the purchasing power of currencies and the real gross domestic product (GDP) per capita of different countries. It is well known that the usual method of converting the GDPs of different countries to a common currency, usually U.S. dollars, at existing exchange rates is misleading because exchange rates do not necessarily reflect the purchasing power of currencies. The ICP has found that the purchasing power of a country's currency over GDP can be as much as three times its dollar exchange rate, and thus the real GDP per capita is three times the value shown in an exchange-rate conversion. The unsatisfactory nature of exchange-rate conversions has become even clearer in the past few years under the new regime of managed floating rates. Changes in exchange rates of as much as 20 percent within the space of a year have not been unusual even among major currencies.

The Economics of Motorsports Paulo Mourão, 2017-05-29 This book, the first study of its kind, examines the economics behind motorsports, in particular Formula One. Chapters discuss the costs involved in Formula racing and how they are borne by teams, promoters and racers. The book also looks at how society, the public and the private sectors stand to benefit economically from the motorsport industry. Other issues like the economics of TV rights, sponsorship and sustainability are also addressed, again for the first time in an economics book. Moving beyond the economics of what happens off the track, the book also undertakes a serious examination of what goes in to making a winning team and what having

a winning racer can do for a team's fortunes. Mourão's highly relevant and contemporary book also looks at how motorsport teams confront the challenges of the modern sporting world, including the changing dynamics of sports media and considers the future of Formula 1 as motorsports evolve.

Automotive Mechatronics Konrad Reif, 2014-08-25 As the complexity of automotive vehicles increases this book presents operational and practical issues of automotive mechatronics. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Pursuit of Pleasure Lionel Tiger, 2017-07-12 Pleasure is biologically desirable and good for physical and mental health. In *The Pursuit of Pleasure*, Lionel Tiger explores this aspect of human nature by focusing on the origins and forms of pleasure. Medical science has perfected a host of often astonishingly impressive methods for preventing, alleviating, or recovering from pain. Its opposite, pleasure, has not had such a well-funded and fully justified constituency. In fact, those committed to the understanding and pursuit of pleasure, are rarely accorded respect and a sense of significance. People have objected to the notion of pleasure for a variety of reasons. The most complex derive from religious convictions that the most morally admirable human life is marked by abstemiousness, suffering, even martyrdom. There is also a corresponding fear that people may pursue pleasure too avidly and with too strong a sense of entitlement, and the world's work will not get done. But just as there have been suspicions of the dangers of pleasure, there have also been its supporters who assert its vital and joyful centrality to human experience. *The Pursuit of Pleasure* favors an agnostic approach borrowed from natural science. In lively, witty, and eminently readable prose, Tiger identifies major forms of pleasure and explores their variations, now and in the past. Pleasure, says Tiger, is not a luxury but an evolutionary entitlement that deserves to be taken seriously. As we acknowledge our need for enjoyment, we understand the need to establish balance in our lives-our need for the pursuit of pleasure.
