The Fletcher-Class Destroyer USS Stevens (DD-479) Waldemar Góralski,2020-11-30

US Flush-Deck Destroyers 1916-45 Mark Lardas,2018-08-28 Four pipes and flush decks - these ships were a distinctively American destroyer design. Devised immediately prior to and during the United States' involvement in World War I they dominated the US Navy's destroyer forces all the way through to World War II. They were deployed on North Atlantic and Norwegian Sea convoys, and virtually everywhere in the Pacific, from Alaska to Australia. Fifty were given to Great Britain in its hour of need in 1940, and many would serve in other navies, fighting under the Soviet, Canadian, Norwegian, and even the Imperial Japanese flags. They also served in a variety of roles becoming seaplane tenders, high-speed transports, minesweepers and minelayers. One was even used as a self-propelled mine during Operation Chariot, destroying the dry dock at St. Nazaire. Fully illustrated throughout with commissioned artwork and contemporary photographs, this volume reveals the operational history of these US Navy ships that fought with distinction in both World Wars.

German Destroyers Robert Brown,2018-02 The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant web sites. This volume covers the large and powerful German destroyers of the Second World War era. Always popular as modeling subjects, interest in them has been further increased recently by the release of a number of very fine large scale kits. With its unparalleled level of visual information - paint schemes, models, line drawings and photographs - this book is simply the best reference for any model maker setting out to build one of these unusual ships.

Cost Benefit Analysis of Adjustable Speed Drives Aboard Arleigh Burke Class Destroyers Godfrey D. Weekes,2003-09 As the U.S. Navy seeks new and innovative ways to maximize its return from a finite budget, an evaluation of its operational practices must be done, Electrical power consumption and fuel efficiency are major factors in the Total Operating Cost (TOC) of naval ships and systems. An evaluation of an alternative mean for delivering electrical power to motors and pumps was conducted with the understanding that principles of the findings could be applied to fans as well. Adjustable Speed Drives (ASD), AC induction motors, AC synchronous motors, centrifugal pumps, and positive displacement pumps were examined. The technical challenges associated with ASDs were explored. MATLAB was used to calculate the potential power savings to be gained by introducing ASD technology to the Firemain and Chilled Water Systems. MATLAB was also used to calculate fuel cost savings from reduced consumption of Shipboard power.

Admiral Arleigh Burke Elmer Belmont Potter,2005 Arleigh Burke is considered the father of the modern U.S. Navy to many. Sea warrior, strategist, and unparalleled service leader, Burke had an impact on the course of naval warfare that is still felt today. This biography by noted historian E.B. Potter follows Burke's distinguished career from his early days at the Naval Academy through the

dramatic destroyer operations in the Solomons, where he earned his nickname 31-Knot Burke, to his participation in the crucial carrier operations of World War II. The author also fully examines Burke's postwar service as a United Nations delegate to the Korean truce talks and his unprecedented six-year tenure as chief of naval operations from 1955 to 1961, where he was a strong advocate of carrier aviation, nuclear propulsion, and a major force in developing the Navy's Polaris missile program. Awarded the Medal of Freedom, the nation's highest civilian honor, in 1977, he became the first living U.S. naval officer to have a class of ship named after him--the Arleigh Burke guided missile destroyers. Now available in paperback for the first time, this definitive 1990 biography is a worthy tribute to a great naval hero.
