**Willys** Patrick R. Foster, Bill Tilden, 2016-07-15 Although there have been many Jeep books, this is the first complete history of the Willys-Overland passenger cars, civilian trucks (as well as civilian and military Jeeps) along with the corporation's history. Illustrated with rare and unusual factory photos and period ads, the Willys-Overland saga begins in 1903 when the Standard Wheel Company began making Overland cars. Soon after, auto dealer John North Willys was forced by circumstances to rescue the failing Overland company. By 1916 Willys had become the second-best selling car in the world. Prospering in the '20s but then bankrupt a decade later, the firm crawled back from the edge in time to win the all-important Jeep contract that ensured Willys would survive. Even after Kaiser Motors bought Willys in 1953 its products were still branded Willys until 1963 when the name was phased out. The final new Willys Jeep introduced - the Wagoneer - became a legend in its own right. Also covered are the pre-war coupes modified into high-powered racers.

**Sharks of the Air** James Neal Harvey, 2011-01-05 "[A] perfect blend of sympathetic career biography and gripping military history . . . a definite winner for all World War II military history buffs" (Library Journal). In July 1944, the Allies were stunned by the appearance of the Messerschmitt Me 262, the world's first operational jet warplane. More than one hundred mph faster than any other aircraft in the skies, the Me 262 gained scores of victories over Allied fighters and bombers, and by the end of the war, many of the Luftwaffe's greatest aces had clamored to be in their cockpits. *Sharks of the Air* tells the story of Willy Messerschmitt's life and shows how this aeronautical genius built many revolutionary airplanes—not excluding the Luftwaffe's mainstay, the Me 109—and culminating in the Me 262. It describes how his various warplanes fought in Spain, Poland, France, Britain, the USSR, and Germany, and it provides thrilling accounts of air battles drawn from combat reports and interviews with veterans. And finally, this biography gives "insight into the life of a man who played a role in the Nazi war machine, but is not defined by it" (Scale Aviation Modeller International). Aspects of Messerschmitt's life never before made public are revealed, including his love affair with the beautiful Baroness Lilly Michel-Rolino, a rich aristocrat who left her husband to live with Willy. Author James Harvey "uses his 40 years of flying experience and experience of aviation to tell the fascinating story of Messerschmitt and how, given the right conditions, Messerschmitt and other German aircraft designers could have changed the course of WWII" (Military Scale).

**The Secrets of Dellschau** Dennis G. Crenshaw, Pete Navarro, 2009-10-01 Charles A. A. Dellschau was born on June 4, 1830, in Brandenburg, Prussia, and immigrated to the United States in 1853, first settling in Texas. The historical record falls silent until 1860, when he is again shown living in Texas, where he marries Antonia Hilt the following year. The so-called lost years of the secretive Dellschau's life became a matter of controversy when his voluminous, illustrated notebooks surfaced nearly a half-century after his death in 1923 at age 93. Dellschau literally spent the last 20 years of his life closeted away in an attic apartment, creating a fantastical body of art that continues to fascinate. Indeed, today Dellschau is recognized as one of America's leading visionary artists, ranked alongside such world luminaries as Henry Darger and Adolf Wol i. A single page of one of his notebooks now fetches thousands of dollars - and there are thousands of such pages, frenetic productivity being a hallmark of visionary artists. But Dellschau's work - consisting of ink and watercolor illustrations of fanciful flying machines to which he frequently pasted newspaper clippings, or press blooms as he called them - appears to tell a coherent story of the Sonora (California) Aero Club. Using an anti-gravity gas purportedly invented by one of its members, The Club allegedly turned out a series of experimental aircraft some 50 years before the Wright Brothers first took wing. A mere

flight of artistic fancy? Or did Dellschau actually spend his lost years documenting wildly improbable inventions? Were the Aero Club's airships also responsible for many UFO sightings in America? *The Secrets of Dellschau: The Sonora Aero Club & The Airships of The 1800s, a True Story* is the first book-length account of Dellschau's life and work.

**Scenes from an Automotive Wonderland** Gregory A. Cagle, 2018-03-16 Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera—not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

**Art Deco and British Car Design** Barrie Down, 2010 The Art Deco movement influenced design and marketing in many different industries in the 1930s, and the British motor industry of the time was no exception. This fascinating book is divided into two parts; the first explains and illustrates the Art Deco styling elements that link these streamlined car designs, describing their development, their commonality, and their unique aeronautical names, and is liberally illustrated with contemporary images. The book then goes on to portray British streamlined production cars made between 1933 and 1936, illustrated with color photographs of surviving cars. This is a unique account of a radical era in automotive design.

**Aerospace Structures and Materials** Yucheng Liu, 2016-10-07 This comprehensive volume presents a wide spectrum of information about the design, analysis and manufacturing of aerospace structures and materials. Readers will find an interesting compilation of reviews covering several topics such as structural dynamics and impact simulation, acoustic and vibration testing and analysis, fatigue analysis and life optimization, reversing design methodology, non-destructive evaluation, remotely piloted helicopters, surface enhancement of aerospace alloys, manufacturing of metal matrix composites, applications of carbon nanotubes in aircraft material design, carbon fiber reinforcements, variable stiffness composites, aircraft material selection, and much more. This volume is a key reference for graduates undertaking advanced courses in materials science and aeronautical engineering as well as researchers and professional engineers seeking to increase their understanding of aircraft material selection and design.

*The Secret Horsepower Race: Western Front Fighter Engine Development - Special Edition Merlin* Calum E. Douglas, 2021-04-25 The piston engines that powered Second World War fighters, the men who designed them, and the secret intelligence work carried out by both Britain and Germany would determine the outcome of the first global air war. Advanced jet engines may have been in development but every militarily significant air battle was fought by piston-engined fighters. Whoever designed the most powerful piston engines would win air superiority and with it the ability to dictate the course of the war as a whole. This is the never before told story of a high-tech race, hidden behind the closed doors of design offices and intelligence agencies, to create the war's best fighter engine. Using the fruits of extensive research in archives around the world together with the previously unpublished memoirs of fighter engine designers, author Calum E. Douglas tells the story of a desperate contest between the world's best engineers – the Secret Horsepower Race.

**The Dakota Hunter** Hans Wiesman, 2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author's life: "It is almost like an adventure novel except it is true" (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote

jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

**The True Secret of Writing** Natalie Goldberg, 2014-02-11 The author draws on her teaching background to share new writing guidelines and outline the steps for a personal or group writing retreat, providing coverage of such topics as working in silence and writing without criticism.

**The B-17 Flying Fortress** Steve Birdsall, 1965

**My Cool Classic Car** Chris Haddon, 2021-05-25 A celebration of 40 classic cars from around the world Fueled by passion, nostalgia, and perhaps eccentricity over necessity, Chris Haddon celebrates often overlooked cars and introduces the world's most classic cars and their owners. Some are immaculate, while some come with rust, but regardless of age and value, these cars are regularly used, loved, and clock up an impressive mileage. A celebration of automobiles with soul and personality. --Telegraph magazine Beautifully photographed pieces of nostalgia. --The Simple Things magazine

**Inside Charlie's Chocolate Factory** Lucy Mangan, 2014-09-09 Celebrate the 50 years of Charlie and the Chocolate Factory with this scrumdiddlyumptious book about the iconic novel and author! Inside Charlie's Chocolate Factory explores the unique appeal and lasting cultural impact of Roald Dahl's beloved classic. This non-fiction book looks at the development of the original story and characters, its social history, and the varying film and stage adaptations. With never-before-seen material from the archives, full-color photos and illustrations throughout, and quotes from Roald Dahl enthusiasts this gorgeously produced gift book is a great way for fans to celebrate Charlie, Wonka, and Roald Dahl!

**Standard Military Motor Vehicles** United States. War Department, 1943

**Flying on Your Own Wings** Chris Heintz, 2010-01-28 Some have said that if God had wanted us to fly, He would have given us wings. And yet, we were given the ability to dream, to think with our heads, to have courage in our hearts, and to build with our hands. Truly, we have been given everything we need: We really can fly on our own wings! Chris Heintz is a professional aeronautical engineer with a prolific career spanning over 40 years designing and building light aircraft. Recognized worldwide as a uniquely talented and accomplished designer, his aircraft are known and appreciated for their simplicity of construction, pilot-friendly cabins and controllability as well as remarkable performances. Today, Chris Heintz designs are flown throughout the world, mostly by recreational pilots who have assembled their own planes from a kit. His most popular models are also factory-assembled and sold as ready-to-fly sport aircraft on three continents. In FLYING ON YOUR OWN WINGS, Mr. Heintz shares his knowledge and insights into the art and science of light aircraft

design. He "walks" readers through the essential understanding and skills required to conceive, develop, build and even test-fly their own personal light airplane. Basic mathematics, essential aerodynamics and stress analysis are just a few of the chapters of this fascinating book. Heintz even provides a sample design to help would-be designers take their first step towards imagining and creating their own wings. Truly a beginner's guide to everything you need to know in order to achieve that age-old dream: To fly on your own wings!

*Encyclopedia of American Cars* Publications International, 2002 The most complete, authoritative, and well-illustrated automotive encyclopedia ever. Covers American cars from 1930 to 2002 and includes Chrysler, Ford, and GM, plus major independents, such as Duesenberg, Hudson, Checker, Shelby, and others. More than 3,500 photographs and thorough, clear text form a comprehensive portrait of the men and machines that contributed to the most exciting developments in American automotive history. Year-by-year reviews and detailed specifications of more than 50 makes of automobiles and over 24,000 individual models. **Convair Advanced Designs** Robert E. Bradley, 2010 Consolidated Vultee, which later became Convair, built some of the world's best flying boats in the 1930s, and the world's best bombers during World War II. Convair's six-engine B-36 strategic bomber was credited with keeping the world safe during the early throes of the Cold War. But before all these great aircraft took to the skies, scores of ideas and concepts were proposed and analyzed by company management to determine if production would even be feasible. CONVAIR ADVANCED DESIGNS is a book that brings these futuristic, but stillborn, concepts to life for the very first time. This book features many never-before-seen company photographs, models, and drawings of such futuristic concepts as a folding-rotor anti-submarine patrol bomber and a giant seaplane passenger transport launched from a high-speed rail car! Readers will also be fascinated to see how certain seemingly unbelievable designs evolved into actual production airplanes years later, such as the giant Convair Tradewind turboprop seaplane transport.

*The Story of Jeep* Patrick Foster, 2004-08-18 The Story of a Legend  
& break; & break; Pat Foster's award-winning The Story of Jeep is back - bigger, more colorful, and more complete than ever. **VHS: Video Cover Art** Thomas Hodge, 2015 Video cover art is a unique and

largely lost artform representing a period of unabashed creativity during the video rental boom of the 1980s to early 1990s. The art explodes with a succulent, indulgent blend of design, illustration, typography, and hilarious copywriting. Written and curated by Tom The Dude Designs Hodge, poster artist extraordinaire and VHS obsessive, with a foreword by Mondo's Justin Ishmael, this collection contains over 240 full-scale, complete video sleeves in the genres of action, comedy, horror, kids, sci-fi, and thriller films. It's a world of mustached, muscled men, buxom beauties, big explosions, phallic guns, and nightmare-inducing monsters. From the sublime to the ridiculous, some are incredible works of art, some are insane, and some capture the tone of the films better than the films themselves. All are amazing and inspiring works of art that captivate the imagination. It's like stepping back in time into your local video store!
