**The Annihilation Score** Charles Stross,2016-06-28 From the Hugo Award-winning author of The Rhesus Chart comes another supernatural case from The Laundry Files... Dominique O’Brien—her friends call her Mo—lives a curious double life with her husband, Bob Howard. To the average civilian, they’re boring middle-aged civil servants. But within the labyrinthine secret circles of Her Majesty’s Government, they’re operatives working for the nation’s occult security service known as the Laundry, charged with defending Britain against dark supernatural forces threatening humanity. Unfortunately, one of those supernatural threats has come between Mo and Bob. An antique violin, an Erich Zahn original, made of white human bone, was designed to produce music capable of slaughtering demons. Mo is the custodian of this unholy instrument. It invades her dreams and yearns for the blood of her colleagues—and her husband. And despite Mo’s proficiency as a world-class violinist, it cannot be controlled...

**Computational Physics, Vol II** Konstantinos N. Anagnostopoulos, 2014-07-27 This book is an introduction to the computational methods used in physics and other

scientific fields. It is addressed to an audience that has already been exposed to the introductory level of college physics, usually taught during the first two years of an undergraduate program in science and engineering. The book starts with very simple problems in particle motion and ends with an in-depth discussion of advanced techniques used in Monte Carlo simulations in statistical mechanics. The level of instruction rises slowly, while discussing problems like the diffusion equation, electrostatics on the plane, quantum mechanics and random walks. The book aims to provide the students with the background and the experience needed in order to advance to high performance computing projects in science and engineering. But it also tries to keep the students motivated by considering interesting applications in physics, like chaos, quantum mechanics, special relativity and the physics of phase transitions. The book and the accompanying software is available for free in electronic form at <http://goo.gl/SGUEkM> ([www.physics.ntua.gr/%7Ekonstant/ComputationalPhysics](http://www.physics.ntua.gr/%7Ekonstant/ComputationalPhysics)) and a printed copy can be purchased from lulu.com at <http://goo.gl/XsSBdP> (vol I at <http://goo.gl/Pg1zHc> )

Boss Mustang Donald Farr,2019-04-23 The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation; racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In Boss Mustang: 50 Years, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team

that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.

*Chemical Engineering* Morton Denn, 2011-09-30

'Chemical engineering is the field of applied science that employs physical, chemical, and biological rate processes for the betterment of humanity'. This opening sentence of Chapter 1 has been the underlying paradigm of chemical engineering. *Chemical Engineering: An Introduction* is designed to enable the student to explore the activities in which a modern chemical engineer is involved by focusing on mass and energy balances in liquid-phase processes. Problems explored include the design of a feedback level controller, membrane separation, hemodialysis, optimal design of a process with chemical reaction and separation, washout in a bioreactor, kinetic and mass transfer limits in a two-phase reactor, and the use of the membrane reactor to overcome equilibrium limits on conversion. Mathematics is employed as a language at the most elementary level. Professor Morton M. Denn incorporates design meaningfully; the design and analysis problems are realistic in format and scope.

When Britain Saved the West Robin Prior, 2015-05-26 From the comfortable distance of seven decades, it is quite easy to view the victory of the Allies over Hitler's Germany as inevitable. But in 1940 Great Britain's defeat loomed perilously close, and no other nation stepped up to confront the Nazi threat. In this cogently argued book, Robin Prior delves into the documents of the time—war diaries, combat reports, Home Security's daily files, and much more—to uncover how Britain endured a year of menacing crises. The book reassesses key events of

1940—crises that were recognized as such at the time and others not fully appreciated. Prior examines Neville Chamberlain's government, Churchill's opponents, the collapse of France, the Battle of Britain, and the Blitz. He looks critically at the position of the United States before Pearl Harbor, and at Roosevelt's response to the crisis. Prior concludes that the nation was saved through a combination of political leadership, British Expeditionary Force determination and skill, Royal Air Force and Navy efforts to return soldiers to the homeland, and the determination of the people to fight on "in spite of all terror." As eloquent as it is controversial, this book exposes the full import of events in 1940, when Britain fought alone and Western civilization hung in the balance.
