*The Royal Air Force Builds for War* Great Britain. Air Force Department. Air Historical Branch,1997 This text looks at the less glamorous war efforts such as constructing Nissan huts, airfields and sewage disposal schemes in Middle Wallop, conducting bomb trials in Orfordness, devising mud hut officers' messes in Nigeria and carved out caves in Massawa. This is a facsimile edition of a declassified Royal Air Force publication entitled Works. It is an engineer's history of the work of the Air Ministry Directorate-General from 1935 to 1945, and a technical paper on ten years of constructional work.

**Invasion Airfields** Winston Ramsey,2017-08-30 In his 1945 report to the Combined Chiefs-of-Staff on the success of Operation "Overlord", the Supreme Commander General Eisenhower wrote that on the morning of June 9 I?was able to announce that for the first time since 1940, Allied air forces were operating from France, and that within three weeks of D-Day, 31 Allied squadrons were operating from the beach-head bases. In their forecasts for the first three months following D-Day, the planners plotted the number of the advanced landing grounds that would be required in Normandy to support the Allied air forces up to September 1944. Using maps and aerial photographs, individual sites were surveyed and plans drawn up so that when each location was captured, either US Aviation Engineers, the Royal Engineers or RAF?Airfield Construction Wings, could move in without delay to begin work to build them. This book tells the story of every airfield that became operational by D+90, explaining the methods used to construct them and the units that flew from them. The vast majority of the temporary airstrips have now been returned to the farmland from which they came, but by using engineers? plans from the period and modern aerial photographs, we have portrayed the sites in true After the Battle fashion: as they were then and as they are today.

**The RAF and Aircraft Design** Colin S Sinnott,2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force - for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain. It discusses the management processes, policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time. By tracing the development of operational requirements, the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft. He describes the ideas and concepts of air warfare that were adopted in the 1920s, and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II.

**Build Your Own Paper Air Force** Trevor Bounford,2008 Trevor Bounford presents 35 working paper aeroplane models to print out, fold and fly. Detailed instructions in the book explain how to assemble each aircraft and the CD contains ready-to-print templates plus a whole range of patterns and colours to customize the planes to your own specifications.

RAF and USAAF Airfields in the UK During the Second World War Geoff Mills,Daniel Knowles,2022-03-31 Shortly after the end of the Second World War, the United Kingdom was described as one vast aircraft carrier anchored off the coast of Europe. During a seven year period 500 airfields were constructed to serve the needs first of the RAF and later the USAAF as they carried the war to German-occupied Europe. The airfields that were constructed took many different forms from training airfields and Advanced Landing Grounds to grass fighter airstrips and vast complexes used to accommodate heavy bombers. This book charts the history of each Second World War airfield in and around the UK providing a unique insight in to the construction, operational life and post-war history of each airfield. Alongside detailing the history of each airfield, this work comprehensively records the details of each unit that operated from airfields around the UK. The information provided in this meticulously researched book is supported by a wealth of 690 photographs providing an illustration into the life of each wartime station.

**Bomber Command Airfields of Yorkshire** Peter Jacobs,2017-05-30 As part of the Aviation Heritage Trail series, the accomplished military author and former RAF Officer Peter Jacobs takes us to the county of Yorkshire and to its many bomber airfields of the Second World War.From the opening day of hostilities, RAF Bomber Command took the offensive to Nazi Germany and played a leading role in the liberation of Europe. Yorkshires airfields played a key part throughout, initially as home to the Whitley squadrons of No 4 Group and then to the four-engine Halifax heavy bombers; indeed, Bomber Commands first night operation of the war was flown from one of the countys many bomber airfields. Then, as the bombing offensive gathered pace, Yorkshire welcomed the new all-Canadian No 6 (RCAF) Group, after which all of Bomber Commands major efforts during the hardest years of 1943/44 against the Ruhr, Hamburg and Berlin involved the Yorkshire-based squadrons.Most of Yorkshires wartime bomber airfields have long gone, but many have managed to retain the flying link with their wartime past. For example, the former RAF airfields of Finningley and Middleton St George, and the factory airfield of Yeadon, are now the sites of international airports, while Brighton, Burn, Full Sutton, Pocklington and Rufforth are still used for light aircraft flying or gliding and Elvington is home to the magnificent Yorkshire Air Museum.From airfields such as these came countless acts of personal courage and self-sacrifice, with two men being awarded the Victoria Cross, Britains highest award for gallantry. Stories of both men are included, as are tales of other personalities who brought these airfields to life. The stories of thirty-three airfields are told in total, with a brief history of each accompanied by details of how to find them and what remains of them today. Whatever your interest, be it aviation history or more local, the county of Yorkshire has rightly taken its place in the history of Bomber Command.

**The RAF and Aircraft Design, 1923-1939** Colin Sinnott,2001 This work describes the vitl role of the Air Ministry in the development of the RAF's fighters and bombers before WWII.

**RAF Air-to-Air Refuelling** Keith Wilson,2019-04-15 A photographic look at the history and development of the difficult and delicate process of in-flight refuelling.

Bases of Air Strategy Robin D. S. Higham,1998-01-01 Beskriver etableringen af militære flyvepladser på de britiske øer og for RAF i udlandet i anførte tidsperiode.

**Safety in Aviation and Astronautics** Simon Ashley Bennett,2021-11-25 Aviation safety and astronautics safety are taught as technical subjects informed, for the most part, by quantitative methods. Here, as in other fields, safety is often framed as an engineering problem requiring mathematics-informed solutions. This book argues that the socio-technical approach, encompassing theories grounded in sociology and psychology - such as active learning, high-reliability organising, mindfulness, leadership, followership and empowerment - has much to contribute to the safety performance of these vital industries. It sets out to inspire professionals to embed the whole-system approach into design and operation regimen and describes the reputational and financial benefits to manufacturers and operators that accrue from adopting a whole-system approach to design and operation. The book defines the socio-technical approach to risk assessment and management in aviation and astronautics (astronautics is taken to mean the design and operation of vehicles for use beyond the earth's atmosphere), then demonstrates the strengths and weaknesses of this approach through case studies of, for example, the Boeing 737MAX-8 accidents and the loss of the SpaceShipTwo orbiter. Grounding the discourse in familiar case studies engages busy aviation and astronautics professionals. The book's arguments are explained in such a way that they are readily comprehensible to non-experts. Key concepts are defined within a glossary. Photographs, charts and diagrams illustrate key points. Written for a practitioner audience, specifically aviation and astronautics professionals, this book provides a valuable and accessible social sciences perspective on safety that will be directly relevant to their roles.

RAF Transport Command Keith Wilson,2017-06-15 A pictorial history of Transport Command operations from 1943 to 1967 using images from the RAF Air Historical Branch.

**RAF Airfields of World War 2** Jonathan Falconer,2013-01-06 This book gives complete coverage of all the RAF airfields in World War 2 in Britain, including all the RAF Fighter, Bomber, Coastal, and Transport Command airfields and bases of the period. Each airfield is described with a short history, first-person accounts, and information on airfield buildings, illustrated with photographs and maps, making this book a complete and unique single-volume illustrated reference book covering all of the RAF's frontline airfields in the UK during World War 2. General chapters also cover airfield construction and organization, orders of battle for each command at notable points of the war, and a significant part of the book is its tabular listings of RAF frontline airfields, including full details of location and user squadrons/units. Present-day usage of the airfields and the buildings is also covered. Firsthand accounts by veterans of the four wartime commands add a layer of compelling personal testimony to the book.

**Build Your Own Paper Air Force** Trevor Bounford,2010 Trevor Bounford presents 35 working paper aeroplane models to print out, fold and fly. Detailed instructions in the book explain how to assemble each aircraft and the CD contains ready-to-print templates plus a whole range of patterns and colours to customize the planes to your own specifications.

**Airfields of the D-Day Invasion Air Force** Peter Jacobs,2009-10-29 As part of the Aviation Heritage Trail series, the airfields and interest in this book are concentrated in a particular area – in this case Kent, Surrey, East Sussex, Essex and Greater London. The South east of England emerged from six years of war with a rich diversity of RAF bomber and fighter airfields used by the 2nd Tactical Air Force, both before and after the D-Day landings. Much of this proud legacy is now threatening to disappear. However, the tourist can combine visits to an abundance of disused and active airfields, country houses and museums with countless attractions, imaginative locations and broadland and coastal hideaways that have no equal. The airfields and other places of interest include Northolt, Manston, Sculthorp, Dunsfold, Swanton Morley, Hunsdon, Gravesend, Detling, Biggin Hill, Kenley, Redhill, Gatwick, Heston, Hornchurch, Chailey, Coolham, Horne, West Malling and Newchurch. This book looks at the history and personalities associated with each base, what remains today and explores the favourite local wartime haunts where aircrew and ground crew would have sought well-deserved entertainment and relaxation. Other museums and places that are relevant will also be described and general directions on how to get them included.

**Military Airfields of Britain** Ken Delve,2005-08-07 This series of books provides a fresh user-friendly look at the military airfields of the British Isles. The series is split geographically, each book including a number of counties on a regional basis. Entries cover every military airfield within the counties, from WW1 to the present day and comprise: Brief history of the airfield, construction and use including decoy sites; Comprehensive list of flying units with dates and aircraft types; List of HQ units based at the airfield; Details of memorials; Maps and plans of almost every airfield; Location details; and a selection of period photographs. The first volume is dominated by the airfields built for the US 8th Army Air Force during WW2. These concrete airstrips played a vital part in the war effort. Today, most of the airfields lie abandoned, but some, like Marham, survive having been important Cold War bases.

A Detailed History of RAF Manston 1941-1945 Joe Bamford,John Williams,Peter Gallagher,2017-01-22 A Detailed History of RAF Manston 1941-1945 covers the station's history during the period that the RAF was on the offensive against the Luftwaffe. Having been badly damaged during the Battle of Britain and the only airfield to have been put out of action, Manston rose from the ashes to become a base for numerous fighter units that attacked Hitler's 'Fortress Europe'. From 1941 onwards, Manston was used by damaged aircraft returning from operations, especially those from Bomber Command. Consequently, a large runway was built and was one of three in the country that was equipped to deal with emergencies. In 1944, 501 Squadron was formed with the Hawker Tempest to destroy enemy armour, aircraft and the feared V1; Squadron Leader Joe Berry was credited to destroying sixty-one V1s. Another first was the arrival of the Meteor jet fighter in August 1944. After the war, Manston became a base for a number of civil airlines, but continued in its role as a major diversion airfield and an emergency landing ground.

A History of RAF Drem at War Malcolm Fife,2016 A comprehensive history of the Second World War Fighter Command airfield at RAF Drem located near Edinburgh. It was one of Scotland's most important airfields in this conflict. Its predecessor, the Royal Flying Corps Gullane air station is included in the account. When war broke out in 1939 among the first targets attacked by the Luftwaffe was the Royal Navy base at Rosyth. The Spitfires at RAF Drem were scrambled to protect this vital installation and were engaged in some of the first air battles over Britain. The exploits of its pilots received much attention from the press at the time. By mid-1940, much of the fighting had gravitated to the south of England. Spitfires and Hurricanes based at Drem would, however, continue to patrol the skies over the Firth of Forth until the end of the war. Night fighter squadrons were also based here, first flying the Blenheim and later the Mosquito. Appropriately the Drem lighting system for assisting the landing of aircraft at night was invented here. The Fleet Air Arm also had a presence at RAF Drem, with a squadron for the training of night fighter pilots. The airfield ended the war on a high note when three white painted Ju 52s arrived with German generals to surrender their forces in Norway. Like many other military airfields, Drem closed shortly after the end of hostilities and the runways were plowed up and returned to agriculture.
