The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency William Boone Bonvillian,Richard Van Atta,Patrick Windham,2020-01-09 The authors have done a masterful job of charting the important story of DARPA, one of the key catalysts of technological innovation in US recent history. By plotting the development, achievements and structure of the leading world agency of this kind, this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change, pandemics, cyber security and other global problems of our time. The DARPA Model provides a useful guide for governmental agency and policy leaders, and for anybody interested in the role of governments in technological innovation. —Dr. Kent Hughes, Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world’s most successful advanced technology agency. Drafted by the leading US experts on DARPA, it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume. It reviews DARPA’s unique role in the U.S. innovation system, as well as the challenges DARPA and its clones face today. As the American model is being considered for adoption by a number of countries worldwide, this book makes a welcome and timely contribution to the policy dialogue on the role played by governments in stimulating technological innovation. — Prof. Charles Wessner, Georgetown University The U.S. Defense Advanced Research Projects Agency (DARPA) has played a remarkable role in the creation new transformative technologies, revolutionizing defense with drones and precision-guided munitions, and transforming civilian life with portable GPS receivers, voice-recognition software, self-driving cars, unmanned aerial vehicles, and, most famously, the ARPANET and its successor, the Internet. Other parts of the U.S. Government and some foreign governments have tried to apply the ‘DARPA model’ to help develop valuable new technologies. But how and why has DARPA succeeded? Which features of its operation and environment contribute to this success? And what lessons does its experience offer for other U.S. agencies and other governments that want to develop and demonstrate their own ‘transformative technologies’? This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives, combining to chart an important story from the Agency’s founding in the wake of Sputnik, to the current attempts to adapt it to use by other federal agencies. Informative and insightful, this guide is essential reading for political and policy leaders, as well as researchers and students interested in understanding the success of this agency and the lessons it offers to others.

Foreign Investment, Human Rights and the Environment Shyami Puvimanasinghe,2007-05-11 Events like the Bhopal disaster, the sale of products harmful to human health and safety, and child labour, especially in resource-scarce settings, raise fundamental issues of human dignity and ecological integrity. From a legal perspective, and in the context of Foreign Direct Investment by Transnational Corporations in developing countries, they highlight the lacuna of a holistic international legal framework and its implementation. This book embodies a critique of the complex web of public international law principles on economics, human rights and the environment, and their convergence or lack thereof, related regional (South Asian) and domestic (Sri Lankan) legal arrangements, interventions of states and non-state actors towards just, equitable and sustainable development. It is a quest for a middle path in the multidisciplinary landscape of international law, development and North-South power dynamics; globalization of free trade and investment and of social and environmental interests; and salient aspects of the philosophical, socio-economic and legal fabric of South Asia, viewed against the evolving, controversial and elastic sphere of international relations and law where consensus has hitherto been an elusive dream.

Neuronal and Psychological Underpinnings of Pathological Gambling Bryan F Singer,Patrick Anselme,Mike James Ferrar Robinson,Paul Vezina,2014-11-04 Like in the case of drugs, gambling hijacks reward circuits in a brain which is not prepared to receive such intense stimulation. Dopamine is normally released in response to reward and uncertainty in order to allow animals to stay alive in their environment – where rewards are relatively unpredictable. In this case, behavior is regulated by environmental feedbacks, leading animals to persevere or to give up. In contrast, drugs provide a direct, intense pharmacological stimulation of the dopamine system that operates independently of environmental feedbacks, and hence causes “motivational runaways”. With respect to gambling, the confined environment experienced by gamblers favors the emergence of excitatory conditioned cues, so that positive feedbacks take over negative feedbacks. Although drugs and gambling may act differently, their abnormal activation of reward circuitry generates an underestimation of negative consequences and promotes the development of addictive/compulsive behavior. In Parkinson’s and Huntington’s disease, dopamine-related therapies may disrupt these feedbacks on dopamine signalling, potentially leading to various addictions, including pathological gambling. The goal of this Research Topic is to further our understanding of the neurobiological mechanisms underlying the development of pathological gambling. This eBook contains a cross-disciplinary collection of research and review articles, ranging in scope from animal behavioral models to human imaging studies.

Thinking about Science, Reflecting on Art Otávio Bueno,George Darby,Steven French,Dean Rickles,2017-08-07 Thinking about Science, Reflecting on Art: Bringing Aesthetics and Philosophy of Science Together is the first book to systematically examine the relationship between the philosophy of science and aesthetics. With contributions from leading figures from both fields, this edited collection engages with such questions as: Does representation function in the same way in science and in art? What important characteristics do scientific models share with literary fictions? What is the difference between interpretation in the sciences and in the arts? Can there be a science of aesthetics? In what ways can aesthetics and philosophy of science be integrated? Aiming to develop the interconnections between the philosophy of science and the philosophy of art more broadly and more deeply than ever before, this volume not only explores scientific representation by comparison with fiction but extends the scope of interaction to include metaphysical and other questions around methodology in mainstream philosophy of science, including the aims of science, the characterisation of scientific understanding, and the nature of observation, as well as drawing detailed comparisons between specific examples in both art and the sciences.

Business Model Generation Alexander Osterwalder,Yves Pigneur,2013-02-01 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 Business Model Canvas practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model

Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to the business model generation!

60 Stories About 30 Seconds Bruce Van Dusen,2020-09-15 1977. New York City. Cool and crime-ridden, cheap and wild. Bruce Van Dusen shows up in town with a film degree and \$150 to his name. He wants to make movies. The only ones anyone will pay him to make? Little ones. Thirty seconds long. Commercials. He has no idea what he's doing and the money sucks. But he's a director. He gets hired by a client on life support in the most depressing hospital in New York. Gets peed on by a lion. Explains peristalsis to a Tony winner. Makes a movie and goes to Sundance. Goes back to little movies when it bombs. Keeps hustling, shooting anything. Is an a**hole, pays the price, finally learns when and how to be an a**hole and becomes one of the industry's stars. Years go by and it's not what he expected. It's harder, weirder, and funnier. But it worked out. It worked out great, actually.

Lessons from the Financial Crisis Rob Quail,2010-06-08 The world's best financial minds help us understand today's financial crisis With so much information saturating the market for the everyday investor, trying to understand why the economic crisis happened and what needs to be done to fix it can be daunting. There is a real need, and demand, from both investors and the financial community to obtain answers as to what really happened and why. Lessons from the Financial Crisis brings together the leading minds in the worlds of finance and academia to dissect the crisis. Divided into three comprehensive sections-The Subprime Crisis; The Global Financial Crisis; and Law, Regulation, the Financial Crisis, and The Future-this book puts the events that have transpired in perspective, and offers valuable insights into what we must do to avoid future missteps. Each section is comprised of chapters written by experienced contributors, each with his or her own point of view, research, and conclusions Examines the market collapse in detail and explores safeguards to stop future crises Encompasses the most up-to-date analysis from today's leading financial minds We currently face a serious economic crisis, but in understanding it, we can overcome the challenges it presents. This well-rounded resource offers the best chance to get through the current situation and learn from our mistakes.

Mathematics and the Historian's Craft Michael Kinyon,Glen van Brummelen,2006-06-18 The Kenneth May Lectures have never before been published in book form Important contributions to the history of mathematics by well-known historians of science Should appeal to a wide audience due to its subject area and accessibility

Vehicle Dynamics and Control Rajesh Rajamani,2011-12-21 Vehicle Dynamics and Control provides a comprehensive coverage of vehicle control systems and the dynamic models used in the development of these control systems. The control system applications covered in the book include cruise control, adaptive cruise control, ABS, automated lane keeping, automated highway systems, yaw stability control, engine control, passive, active and semi-active suspensions, tire-road friction coefficient estimation, rollover prevention, and hybrid electric vehicles. In developing the dynamic model for each application, an effort is made to both keep the model simple enough for control system design but at the same time rich enough to capture the essential features of the dynamics. A special effort has been made to explain the several different tire models commonly used in literature and to interpret them physically. In the second edition of the book, chapters on roll dynamics, rollover prevention and hybrid electric vehicles have been added, and the chapter on electronic stability control has been enhanced. The use of feedback control systems on automobiles is growing rapidly. This book is intended to serve as a useful resource to researchers who work on the development of such control systems, both in the automotive industry and at universities. The book can also serve as a textbook for a graduate level course on Vehicle Dynamics and Control.

Advances and New Trends in Environmental Informatics Volker Wohlgemuth,Frank Fuchs-Kittowski,Jochen Wittmann,2016-09-02 This book presents the latest findings and ongoing research in the field of green information systems as well as green information and communication technology (ICT). It provides insights into a whole range of cross-cutting concerns in ICT and environmental sciences and showcases how information and communication technologies allow environmental and energy efficiency issues to be handled effectively. Offering a selection of extended and reworked contributions to the 30th International Conference EnviroInfo 2016, it is essential reading for anyone wanting to extend their expertise in the area.

Applications and Theory of Petri Nets 2004 Jordi Cortadella,Wolfgang Reisig,2004-06-15 This book constitutes the refereed proceedings of the 25th International Conference on Applications and Theory of Petri Nets, ICATPN 2004, held in Bologna, Italy in June 2004. The 19 revised full regular papers and 5 revised tool presentation papers presented together with 6 invited papers were carefully reviewed and selected from 62 submissions. All current issues on research and development in the area of Petri nets are addressed, in particular concurrent systems design and analysis, modular systems development, formal specification, model validation, model checking, workflow management, flow charts, networking, formal methods in software engineering, etc.

Vehicle Propulsion Systems Lino Guzzella,Antonio Sciarretta,2007-09-21 The authors of this text have written a comprehensive introduction to the modeling and optimization problems encountered when designing new propulsion systems for passenger cars. It is intended for persons interested in the analysis and optimization of vehicle propulsion systems. Its focus is on the control-oriented mathematical description of the physical processes and on the model-based optimization of the system structure and of the supervisory control algorithms.

Statistics for High-Dimensional Data Peter Bühlmann,Sara van de Geer,2011-06-08 Modern statistics deals with large and complex data sets, and consequently with models containing a large number of parameters. This book presents a detailed account of recently developed approaches, including the Lasso and versions of it for various models, boosting methods, undirected graphical modeling, and procedures controlling false positive selections. A special characteristic of the book is that it contains comprehensive mathematical theory on high-dimensional statistics combined with methodology, algorithms and illustrations with real data examples. This in-depth approach highlights the methods' great potential and practical applicability in a variety of settings. As such, it is a valuable resource for researchers, graduate students and experts in statistics, applied mathematics and computer science.
