**French Police Cars** Cristina Berna, Eric Thomsen, 2024-02-08 Police cars are usually very visible in our society, advertising the important role of police and much loved by children. The role of the police is to enforce the law, to ensure the safety, health, and possessions of citizens, and to prevent crime and civil disorder. French police is organised in two national bodies - Police nationale for cities with 5.000 inhabitants and up and the Gendarmerie for the smaller communities and assisting the Police nationale when required. The pictures are organized according to region, with Paris as a separate entry. The authors have made a similar book on American police cars and the styles are quite different between the two countries. We hope you will enjoy our selection of photos.

*The City and the Railway in the World from the Nineteenth Century to the Present* Ralf Roth, Paul Van Heesvelde, 2022-07-18 This volume explores the relationship between cities and railways over three centuries. Despite their nearly 200-year existence, The City and the Railway in the World shows that urban railways are still politically and historically important to the modern world. Since its inception, cities have played a significant role in the railway system; cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons, goods, and information. They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas. In 25 essays, this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings, as well as in the second urbanisation of the global South with migration from rural to urban landscapes. The volume's broad geographical range includes discussions of railway networks, railway stations, and urban rails in countries such as India, Japan, England, Belgium, Romania, Nigeria, the USA, and Mexico. The City and the Railway in the World will be a useful tool for scholars interested in the history of transport, travel, and urban change.

*A History of Intellectual Property in 50 Objects* Claudy Op den Kamp, Dan Hunter, 2019-06-20 What do the Mona Lisa, the light bulb, and a Lego brick have in common? The answer - intellectual property (IP) - may be surprising, because IP laws are all about us, but go mostly unrecognized. They are complicated and arcane, and few people understand why they should care about copyright, patents, and trademarks. In this lustrous collection, Claudy Op den Kamp and Dan Hunter have brought together a group of contributors - drawn from around the globe in fields including law, history, sociology, science and technology, media, and even horticulture - to tell a history of IP in 50 objects. These objects not only demonstrate the significance of the IP system, but also show how IP has developed and how it has influenced history. Each object is at the core of a story that will be appreciated by anyone interested in how great innovations offer a unique window into our past, present, and future.

**Chinese Global Exploration In The Pre-columbian Era: Evidence From An Ancient World Map** Sheng-wei Wang, 2023-10-16 How early did the Chinese explore the world? Did the Treasure Fleets, led by Admiral Zheng He, discover many parts of the world before Christopher Columbus? While it is known that Christopher Columbus discovered America and Europe ushered in the Age of Discovery, there is an ongoing debate on the 'unknown' areas depicted in Western maps from the period and earlier. There is agreement among scholars that certain areas seem to have been mapped out prior to the arrival of Western explorers. Chinese Global Exploration in the Pre-Columbian Era: Evidence from an Ancient World Map analyses the world's first modern map - known as Kunyu Wanguo Quantu (KWQ) 万国全图 in Chinese, translated as the 'Complete Geographical Map of All Kingdoms of the World' to demonstrate evidence of Chinese global exploration in the Pre-Columbian era. The map of concern was first printed by Italian missionary, Matteo Ricci in 1602, and has been purported to be of entirely European origin, based on Ricci's former maps which he had brought to China in 1582. This book, thus, seeks to be transformational in presenting essential new insights on Pre-Columbian world history and Chinese global exploration, moving away from the norm of the studies of geography and cartography by:

French Fire Engines Cristina Berna, Eric Thomsen, 2024-02-12 Fire fighting engines are brightly colored, red or yellow and shiny chrome. Their sirens ask people kindly to get out of the way, because here is now an emergency. Children loves these vehicles and their heroes. Napoleon Bonaparte is generally attributed as creating the first professional firefighters in France, known as Sapeurs-Pompiers, from the French Army. The corps was created under the Commandant of engineers in 1810. The Sapeurs-Pompiers was organized after a fire at the ballroom in the Austrian Embassy in Paris which injured several dignitaries. For a practical overview the pictures are organized according to region, with Paris as a separate entry. We hope you will enjoy our selection of photos.

French Riviera Tourist Guide (Guide touristique Côte d'Azur) - Illustrated Edition (Édition illustrée) Nicolae Sfetcu, Bilingual English/French Book (Livre bilingue anglais/français) French Riviera is one of the first modern resort areas. It began as a winter health resort at the end of the 18th century. With the arrival of the railway it became the playground and vacation spot of British, Russian, and other aristocrats, such as Queen Victoria and King Edward VII, when he was Prince of Wales. In the summer, it also played home to many members of the Rothschild family. In the first half of the 20th century, it was frequented by artists and writers, including Pablo Picasso, Henri Matisse, Edith Wharton, Somerset Maugham, and Aldous Huxley, as well as wealthy Americans and Europeans. After World War II, it became a popular tourist destination and convention site. Many celebrities, such as Elton John and Brigitte Bardot, have homes in the region. The French Riviera is a major yachting and cruising area with several marinas along its coast. According to the Côte d'Azur Economic Development Agency, each year the Riviera hosts 50% of the world's superyacht fleet, with 90% of all superyachts visiting the region's coast at least once in their lifetime. As a tourist centre it benefits from 300 days of sunshine per year, 115 kilometres (71 mi) of coastline and beaches, 18 golf courses, 14 ski resorts and 3,000 restaurants. Although the Riviera is famous for the glamour of St. Tropez, Monaco or the Cannes Film Festival, there are many other less well known attractions, such as the perched villages of Eze and Gourdon, the perfumeries of Grasse and the glass blowers of Biot, the potters in Vallauris. The Riviera has been the inspiration for many well-known artists such as Picasso and many of their works are on display in local museums and art galleries.
