House Vision Kenya Hara, 2013 In front of the backdrop of recent disasters Kenya Hara founded the platform house vision in order to contemplate possible new ways of living in the post-industrial age, while at the same time combining sustainable architecture with the latest technology. Containing essays by renowned architects and artists, House Vision continues where the eponymous exhibition left off. Toyo Ito, the winner of this year's Pritzker Prize, develops a vision of a house for a nostalgic future. India - The Shimmering Dream Max Reisch,2018-09-27

This extraordinary account of a remarkable journey made in 1933, through Iraq, Iran and Baluchistan (now part of Pakistan) to India is packed full of wonder, adventure, determination and love of travel and motorcycles. But what really sets this book apart are the wonderful descriptions of the people and cultures, now nearly forgotten, yet still hugely relevant in today's age: all brought evocatively to life by the stunning photos from 1933. At that time, the idea of travelling to India on a motorcycle through the Middle East was considered impossible; there were often no roads, not even any paths, and they were attempting to cross the burning deserts in the middle of August, on a tiny two-stroke motorcycle with barely enough power for the bike and rider, let alone a pillion passenger! This book is more than a fantastic adventure; it also offers some perceptive insights into the peoples, places and cultures of the time, as well as being full of drama, both personal and mechanical, as the motorcycle is urged on across the shimmering sands. A true window on the past - and a book which is definitely a 'must have' for all travel and motorcycle enthusiasts.

Radar at Sea Derek Howse,1993-02-09 This book tells in non-technical language how the British Navy contributed to the development of naval radar in World War 2.

Addressed to the general reader, it tells not only the technical story in simple terms, but also of the operational use of shipborne radar at sea - for warning, for fire control, for fighter direction, for navigation, in all theatres of war - and particularly about the people who designed and fitted the equipment, and those who used it at sea.

The Watery Maze Bernard Fergusson,1961 During Britain's darkest hour, in 1940, extraordinary measures were necessary for survival. This bleak period of defense against the Axis led to the formation of Combined Operations, a semi-independent unit composed of admirals, generals, and air marshals. It became Britain's offensive team which, in the end, was instrumental in the successful invasions of North Africa, Sicily, and Normandy. Here is the complete story of the creation of that unit, beginning with a series of daring raids on the coasts of Norway, France, Africa, and Madagascar. These raids often resulted in great loss of life, but the lessons they taught the command led to dramatic successes. Combined Operations grew up with the war and played a part in the ultimate Allied victory in Europe and also in the Suez campaign of 1956--Taken from the book jacket flap.
