Brand Touchpoints Aparna Sundar,2018 Brand touchpoints are used to reinforce the basic premise of branding, which is to distinguish brands from their competitors and remain memorable, ultimately keeping customers resolute in their allegiance. Information related through brand touchpoints increases brand familiarity, contributes to a brand's value, improves attitudes towards a brand, and in general is essential to maintain an ongoing relationship with consumers. Given the role of brand touchpoints, a look at contemporary issues is warranted. Brand Touchpoints is a collection of chapters by academics, practitioners and designers on the current evolution of brand communication. The book looks at existing issues in the marketplace and ways to influence the branding process. First, the changing role of brand touchpoints is reviewed in terms of the move from physical assets such as stores, trucks, and outdoor billboards to digital applications. A foundational sense of how consumers develop inferences surrounding brand touchpoints is then explored. Following this, prescriptive models for building brands to enhance the effectiveness of brand touchpoints are proposed. Then the ability of tangible touchpoints such as product design, packaging, and other tangible aspects of the brand to inform macro branding is reviewed. A case is made for more research on multisensory aspects of a brand. Chapters in the final section of the book explore brand touchpoints as it influences microtrends of prosocial consumers, children and ardent sports fans. To conclude, novel linkages in brand literature that set up an agenda for future research as it relates to consumer culture is discussed. The diverse set of chapters in this book offer a well-timed, in-depth summary of the various academic literature and industry phenomenon. Chapters are contributed by leading academic and industry experts which include: Chris Allen, University of Cincinnati; Clarinda Rodrigues, Linnaeus University; Claudio Alvarez, Baylor University; Conor Henderson, University of Oregon; Dominic Walsh, Landor Associates; Doug Ewing, Bowling Green State University; Drew Boyd, University of Cincinnati; Frank R. Kardes, University of Cincinnati; Frank Veltri, University of Oregon; Kathryn Mercurio, University of Oregon; Lars Bergkvist, Zayed University; Marc Mazodier, Zayed University; Matt Carcieri, The Jim Stengel Company; Maureen Morrin, Temple University; Peter Chamberlain, University of Cincinnati; Remi Trudel, Boston University; Sara Baskentli, City University of New York; Susan P. Mantel, University of Cincinnati; Susan Sokolowski, University of Oregon; Teresa Davis, The University of Sydney; Todd Timney, The University of Cincinnati; Xiaoqi Han, Western Connecticut State University

The Aesthetic Field Arnold Berleant,2002-06-01 Arguing that traditional answers to the question What is art? are partial at best, Arnold Berleant contends that we need to understand art as a complex aesthetic field encompassing all the factors that form the context and experience of art.

Alaska's Totem Poles Pat Kramer,2012-11-15 Through the mists of Alaska's rain forest, totem poles have stood watch for untold generations. Imbued with mystery to outsider eyes, the fierce, carved symbols silently spoke of territories, legends, memorials, and paid debts. Today many of these cultural icons are preserved for the public to enjoy in heritage parks and historical centers through southeast Alaska. And, after nearly a century of repression, totem carving among Alaska's Tlingit, Haida, Tsimshian peoples is flourishing again. In this newly revised edition of Alaska's Totem Poles, readers learn about the history and use of totems, clan crests, symbolism, and much more. A special section describes where to go to view totems. Author Pat Kramer traveled throughout the homelands of the Totem People—along Alaska's Panhandle, the coast of British Columbia, and into the Northwest—meeting the people, learning their stories, and researching and photographing totem poles. Foreword writer David A. Boxley also offers the unique perspective of a Native Alaskan carver who has been a leader in the renaissance. This is a handy guide for travelers in Southeast Alaska who want to learn more about Alaska's totems. There's even a guide of where to view totems in the state. Ravens, killer whales (Orca) and bears... they're all represented in the totem.

Totem Poles of the Pacific Northwest Coast Edward Malin,1994 This survey of totem poles from the Tlingit settlements of Alaska to the Kwakiutl villages of Vancouver Island examines the traditions that led to their creation. It includes both the author's vivid drawings of totem poles and historical photographs of early native settlements.

Packaging the Brand Gavin Ambrose,Paul Harris,2017-09-07 While many other areas of design have commercial aspects, the success of a piece of packaging design is inextricably linked with its ability to sell a product. Packaging the Brand discusses the implications of this commercial function for a designer. It explores methods of visually communicating the value of a product to its target audience and examines the entire lifespan of a piece of packaging: from its manufacture and construction, to its display in various retail environments, to its eventual disposal and the associated environmental concerns.

The Oxford Handbook of Mesoamerican Archaeology Deborah L. Nichols,Christopher A. Pool,2012-09-24 The Oxford Handbook of Mesoamerican Archaeology provides a current and comprehensive guide to the recent and on-going archaeology of Mesoamerica. Though the emphasis is on prehispanic societies, this Handbook also includes coverage of important new work by archaeologists on the Colonial and Republican periods. Unique among recent works, the text brings together in a single volume article-length regional syntheses and topical overviews written by active scholars in the field of Mesoamerican archaeology. The first section of the Handbook provides an overview of recent history and trends of Mesoamerica and articles on national archaeology programs and practice in Central America and Mexico written by archaeologists from these countries. These are followed by regional syntheses organized by time period, beginning with early hunter-gatherer societies and the first farmers of Mesoamerica and concluding with a discussion of the Spanish Conquest and frontiers and peripheries of Mesoamerica. Topical and comparative articles comprise the remainder of Handbook. They cover important dimensions of prehispanic societies--from ecology, economy, and environment to social and political relations--and discuss significant methodological contributions, such as geo-chemical source studies, as well as new theories and diverse theoretical perspectives. The Handbook concludes with a section on the archaeology of the Spanish conquest and the Colonial and Republican periods to connect the prehispanic, proto-historic, and historic periods. This volume will be a must-read for students and professional archaeologists, as well as other scholars including historians, art historians, geographers, and ethnographers with an interest in Mesoamerica.

Johannes Kepler and the New Astronomy James R. Voelkel,2001-10-11 Johannes Kepler (1571-1630) is remembered, along with Copernicus and Galileo, as one of the greatest Renaissance astronomers. A gifted analytical thinker, he made major contributions to physics, astronomy, and mathematics. Kepler was trained as a theologian, yet did not hesitate to challenge church doctrine and prevailing scientific beliefs by supporting the theory of a Sun-centered solar system. As Imperial Mathematician to the Holy Roman Emperor, he analyzed the precise observations of the heavens that his predecessor, the great astronomer Tycho Brahe, had recorded. The book follows the ingenious scientist along the difficult pathway from raw data to his monumental discovery--the three Laws of Planetary Motion. Kepler also made fundamental contributions to optical theory, including a correct description of the function of the eye and a new and improved telescope design. His unique Rudolfine Tables, universal calculations of planetary motion, were unprecedented in their accuracy. James Voelkel vividly describes these scientific achievements, providing enough background in astronomy and geometry so even beginners can follow Kepler's thinking and enjoy this book. Equally captivating is his account of Kepler's tumultuous life, plagued by misery, disease, war, and fervent religious persecution.Oxford Portraits in Science is an ongoing series of scientific biographies for young adults. Written by top scholars and writers, each biography examines the personality of its subject as well as the thought process leading to his or her discoveries. These illustrated biographies combine accessible technical information with compelling personal stories to portray the scientists whose work has shaped our understanding of the natural world.

The Haunting of Vancouver Island Shanon Sinn,2017-10-10 A compelling investigation into supernatural events and local lore on Vancouver Island. Vancouver Island is known worldwide for its arresting natural beauty, but those who live here know that it is also imbued with a palpable supernatural energy. Researcher Shanon Sinn found his curiosity piqued by stories of mysterious sightings on the island--ghosts, sasquatches, sea serpents--but he was disappointed in the sensational and sometimes disrespectful way they were being retold or revised. Acting on his desire to transform these stories from unsubstantiated gossip to thoroughly researched accounts, Sinn uncovered fascinating details, identified historical inconsistencies, and now retells these encounters as accurately as possible. Investigating 25 spellbinding tales that wind their way from the south end of the island to the north, Sinn explored hauntings in cities, in the forest, and on isolated logging roads. In addition to visiting castles, inns, and cemeteries, he followed the trail of spirits glimpsed on mountaintops, beaches, and water, and visited Heriot Bay Inn on Quadra Island and the Schooner Restaurant in Tofino to personally scrutinize reports of hauntings. Featuring First Nations stories from each of the three Indigenous groups who call Vancouver Island home--the Coast Salish, the Nuu-chah-nulth, and the Kwakwaka'wakw--the book includes an interview with Hereditary Chief James Swan of Ahousaht.
