Modelling the M3/M5 Stuart Light Tank Steven J. Zaloga, 2012-04-20 The M3 and M5 Stuart were the most significant light tanks of the US Army, as well as many other allied armies, during World War II. They have proved to be popular modelling subjects ever since, largely due to the large number of kits available in many different scales covering a broad selection of the different variants used. The Stuarts were also painted in a wide range of colourful camouflage schemes, reflecting their widespread service, and this adds to their appeal. This title shows a number of different ways to model this popular tank in 1/35 scale, covering construction, painting and weathering the vehicle.

M3A1 Stuart Mike Koenig, Ian McPherson, Michael Koenig, 2010-01-05 * Includes free decals and masking foil * Packed with color photos The M3 Stuart, formally Light Tank M3, was an American light tank of World War II. It was used by British and Commonwealth forces prior to the entry of the USA into the war, and thereafter by US and Allied forces until the end of the war. The name General Stuart or Stuart given by the British comes from the American Civil War General J.E.B. Stuart and was used for both the M3 and the derivative M5 Light Tank; in British service it also had the unofficial nickname of Honey, named when a tank driver remarked She's a honey. To the United States Army the tanks were officially known only as Light Tank M3 and Light Tank M5. The M3A1 Stuart, had a new turret with turret basket and no cupola, the gun vertical stabilizer installed and the Sponson machine guns removed. This volume contains numerous color photographs of this prolific vehicle, with free decals. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. M3 & M5 Stuart Light Tank 1940-45 Steven J. Zaloga, 2022-04-28 The M3 and M5 family of light tanks were the culmination of American tank development of the 1930s. By the time of the outbreak of the World War II, they were approaching obsolescence, as tank forces in Europe were shifting from light to medium tanks as the main element of their armored forces. First entering combat in the autumn of 1941 in the Western Desert with the British Army, the Stuart quickly proved its inadequacies. The M3 and M5 light tanks proved more suitable in the Pacific theater than in Europe, and fought successfully in many of the major battles including Guadalcanal, Tarawa and Peleliu. This title narrates this distinctive and unusual fighting vehicle's history.

Stuart Tank, Vol. 1 David Doyle, 2019-02-28 The Stuart light tanks were the first tanks taken into combat by US troops during WWII. Production of these vehicles can be broken into two categories: the early tanks powered by air-cooled radial engines, and late versions powered by twin V-8 engines. This volume explores the early, air-cooled vehicles, the M3, M3A1, and M3A3. Widely used both by the US Army and US Marines, as well as many Allied nations, these tanks, though lightly armed and armored, were mechanically sound and did much to stem the tide of Axis aggression during the early stages of the US entry into WWII. Through dozens of archival photos, including previously unpublished images, as well as detailed photographs of some of the finest existing examples of these vehicles, this early-war combat vehicle is explored and its history is explained. A companion volume will explore the later M5 and M5A1, and M8 Howitzer Motor Carriage versions. Part of the Legends of Warfare series.

Brazen Chariots Robert Crisp, 1959 The story of Operation Crusader launched by the Eighth Army on 18 November 1941, against the Axis forces which stood on the borders of Egypt and around beleaguered Tobruk.

Stuart Tank Vol. 2 David Doyle, 2019-10-28 The Stuart light tanks were the first tanks taken into combat by US troops during WWII. Production of these vehicles can be broken into two categories: the early tanks powered by air-cooled radial engines, and late vehicles powered by twin V-8 engines. This volume explores the late vehicles with Cadillac water-cooled engines, the M5 and M5A1, as well as the M8 Howitzer Motor Carriage. Widely used by both the US Army and US Marines, as well as many Allied nations, these tanks, though lightly armed and armored, were mechanically sound and were widely used by US forces in Europe and the Pacific, as well as by Allied nations. Through dozens of archival photos, including previously unpublished images, as well as detailed photographs of some of the finest existing examples of these vehicles, this early-war combat vehicle is explored, and its history is explained. A companion volume explores the early M3, M3A1, and M3A3 versions.

The Royal Canadian Armoured Corps John Marteinson, Michael R. McNorgan, Canadian War Museum, 2000 The Royal Canadian Armoured Corps has a proud and distinguished history. While the modern history of the Corps clearly begins with its official formation in the early days of the Second World War, its roots in the Canadian militia cavalry go back more than 180 years. Many histories have recorded the heritage of individual units, but most are no longer available and they focus on the deeds of their own members. The broader history of the mobile arm of the Canadian Army and of its actions as a whole has never been told. This handsome, profusely illustrated book, a Millennium project, is published to celebrate the 60th anniversary of the formation of the Royal Canadian Armoured Corps. The opening chapter deals with the service of the cavalry ancestors of the Armoured Corps in the War of 1812, the Rebellions of 1837-38 and the North-West Rebellion. The First World War and the interwar period saw the advent of the tank and other new forms of armour, and the organization developed and expanded enormously to meet the demands of the Second World War. The major part of the book deals with the service of the Corps in the Second World War as Canadian armoured units played important roles in the Allied invasion of Europe and the defeat of the Third Reich. Since the war, the Armoured Corps has been involved in most of Canada's military commitments, in Korea, in Europe with NATO, and in peacekeeping operations in many parts of the world. Book jacket.

Weapons of the Tankers Harry Yeide, A survey of the different types of tanks used by armored battalions in the United States Army during World War II.

"Ironsides" Harold A. Skaarup, 2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour

as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

M5 and M5A1 Stuart Light Tank David Doyle,2006-07 Named after the Civil War general Jeb Stuart, the Stuart was used by the British Army in North Africa during World War II. Although the tank lacked firepower and had bad internal layout, it was quick and mechanically reliable, earning it the nickname 'Honey'. This title offers wartime photos of the M5A1 US Light Tank, better known as the Stuart.

World War II Album Volume 6 Ray Merriam,2015-02-17 Merriam Press World War II Album Volume 6 (Second Edition, 2014). A pictorial history of the M1 Combat Car and the M2 Light Tank. The M1 Combat Car was a light tank used by the U.S. Cavalry in the late 1930s. After the Spanish Civil War, most armies, including the U.S. Army, realized that they needed gun armed tanks and not vehicles armed merely with machine guns, and so the M1 became obsolete. The M1 was the immediate predecessor of the M2 Light Tank. The Light Tank M2 was an American pre-World War II light tank that saw combat with the U.S. Marine Corps' 1st Tank Battalion on Guadalcanal in 1942. M2A4s served in Burma and India with the British 7th Hussars and 2nd Royal Tank Regiment. The M2A4 was the immediate predecessor of the M3 Stuart series of light tanks. 222 photos, 3 drawings, 1 cutaway drawing, 1 sectional side view drawing, 1 four-view drawing.

M3 Medium Tank vs Panzer III Gordon L. Rottman,2008-05-20 ...the first-person perspectives offered by Kirby and Köhler put this book on my recommended books list. These personal experiences definitely stirred some interest for me to research more on the design, evolution, and field performance of each of the two tanks.- C. Peter Chen, World War II Database (July 2008) Smarting from their defeat at El Alamein and with directives to save the North African campaign, Rommel's battle-hardened armored divisions confronted a fresh opponent in the form of the newly arrived Americans. This would be a duel between the stalwart of the Wehrmacht armored divisions - the Panzerkampfwagen III - and the American's as yet untested first armored division. In reality both would prove unequal to the task as they floundered amidst the rugged hills and ravines of the Tunisian landscape. This book charts the design and development of these two disparate rivals - their vastly different armament and armor as well as their tactical concepts. Mutually hampered by the climate, terrain, and lack of experience, this was a desperate struggle for supremacy. Moreover, it was a duel with far-reaching implications. For the Americans it was their first baptism of fire and the outcome would determine their future war strategy. For the Germans, this was the final throw of the dice to regain the overwhelming superiority they had enjoyed during the first years of the war. Analyzing the strengths and weaknesses of these two deadly opponents, this book explores the successes and failures of the Grant and Panzer III as they clashed at the critical battles of North Africa. Moreover it is an insight into the lives of the tank crews themselves as they struggled with the twin horrors of tank warfare and the fight for survival amidst some of the most inhospitable terrain on earth.

Inside the Great Tanks Hans Halberstadt,1998 This outstanding history is packed with modern color photography of World War II's best-known tanks. Among the armored fighting vehicles covered are the legendary M4 Sherman, the most famous tank of WWII; the Churchill and Cromwell, which battled their way from Normandy to Hamburg; the Russian T-34, triumphant over the Germans from Stalingrad to the streets of Berlin; and the M60 Patton and Super Sherman, which saw fierce fighting in the Middle East. The collection even includes a rare German Hetzer, a tank-destroyer which took its toll on Allied armor in the last months of the War.

Environmental Conservation, Clean Water, Air & Soil (CleanWAS) Muhammad Aqeel Ashraf,Wan Syaidatul Aqma,2017-02-15 As we embark into the 21st century, we need to address new challenges ranging from population growth, climate change, and depletion of natural resources to providing better health care, food security and peace to humankind, while at the same time protecting natural ecosystems that provide the services which allow life to flourish on Earth. To meet those challenges, profound changes are required in the way that societies conduct their everyday affairs, ways that will lead to better preservation, protection and sustainable management of natural resources with long lasting impacts. The aim of CleanWAS 2016 is to provide productive opportunities for academics and practitioners from interdisciplinary fields of Environmental Sciences to meet, share and bring expertise and ideas in related disciplines. The CleanWAS conference was first organized in the year 2012. It is an annual event organised by the International Water, Air and Soil Conservation society (INWASCON) and is supported by various Malaysian (UKM, UMS, UIAM) and Chinese universities (CUG, NKU, SYSU).

A Midshipman's War Frank Wade,2005 The World War II Mediterranean sea battles are not well known. Many of our ships were sunk, but Malta was saved. North Africa was cleared and Sicily taken in 1943.

M60 Main Battle Tank 1960-91 Richard Lathrop,John McDonald,2012-09-20 Entering service in the early 1960s, the M60 tank was in production for 23 years and formed the backbone of US Army and Marine armoured units during the Cold War. Over 15,000 were built in four basic models: the M60, M60A1, M60A2, and the M60A3. Although the M60 had been phased out of US Army service by the time Iraq invaded Kuwait in 1990, M60s were amongst the first Allied tanks to enter Kuwait City with the US Marines. This book examines the design and deployment of the M60, a very widely used vehicle that is still in service today.
