**Realising REDD+** Arild Angelsen, 2009-01-01 REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

**Of the Nature of Things** T. Lucretius Carus, 2022-09-15 *Of the Nature of Things* is a first-century BCE didactic poem by the Roman poet and philosopher Lucretius to explain Epicurean philosophy to a Roman audience. In this work, T. Lucretius Carus presents the view that the world can be described by the function of material forces and natural laws. So, one should not fear the

gods or death.

A Source Book in Chinese Philosophy, 2008-09-02 A Source Book in Chinese Philosophy is a milestone along the complex and difficult road to significant understanding by Westerners of the Asian peoples and a monumental contribution to the cause of philosophy. It is the first anthology of Chinese philosophy to cover its entire historical development. It provides substantial selections from all the great thinkers and schools in every period--ancient, medieval, modern, and contemporary--and includes in their entirety some of the most important classical texts. It deals with the fundamental and technical as well as the more general aspects of Chinese thought. With its new translation of source materials (some translated for the first time), its explanatory aids where necessary, its thoroughgoing scholarly documentation, this volume will be an indispensable guide for scholars, for college students, for serious readers interested in knowing the real China.

On Gold Mountain Lisa See, 1999 When she was a girl, Lisa See spent summers in the cool, dark recesses of her family's antiques store in Los Angeles' Chinatown. There, her grandmother and great-aunt told her intriguing, colourful stories about their family's past - stories of missionaries, concubines, tong wars, glamorous nightclubs, and the determined struggle to triumph over racist laws and discrimination. They spoke of how Lisa's great-great-grandfather emigrated from his Chinese village to the United States, and how his son followed him. As an adult, See spent five years collecting the details of her family's remarkable history. She interviewed nearly one hundred relatives and pored over documents at the National Archives, the immigration office, and in countless attics, basements, and closets for the intimate nuances of her ancestors' lives. The result is a vivid, sweeping family portrait that is at once particular and universal, telling the story not only of one family, but of the Chinese people in America - and of America itself, a country that both welcomes and reviles its immigrants like no other culture in the world.

*Conservation Biology for All* Navjot S. Sodhi, Paul R.

Ehrlich, 2010-01-08 *Conservation Biology for All* provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Innate Kevin J. Mitchell, 2020-03-31 What makes you the way you are--and what makes each of us different from everyone else? In *Innate*, leading neuroscientist and popular science blogger Kevin Mitchell traces human diversity and individual differences to their deepest level: in the wiring of our brains. Deftly guiding us through important new research, including his own groundbreaking work, he explains how variations in the way our brains develop before birth strongly influence our psychology and behavior throughout our lives, shaping our personality, intelligence, sexuality, and even the way we perceive the world.

We all share a genetic program for making a human brain, and the program for making a brain like yours is specifically encoded in your DNA. But, as Mitchell explains, the way that program plays out is affected by random processes of development that manifest uniquely in each person, even identical twins. The key insight of *Innate* is that the combination of these developmental and genetic variations creates innate differences in how our brains are wired--differences that impact all aspects of our psychology--and this insight promises to transform the way we see the interplay of nature and nurture. *Innate* also explores the genetic and neural underpinnings of disorders such as autism, schizophrenia, and epilepsy, and how our understanding of these conditions is being revolutionized. In addition, the book examines the social and ethical implications of these ideas and of new technologies that may soon offer the means to predict or manipulate human traits. Compelling and original, *Innate* will change the way you think about why and how we are who we are.--Provided by the publisher.

*Artificial Hells* Claire Bishop, 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-

term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

**The Nursery Rhyme Book** Andrew Lang, 1897 A collection of 332 nursery rhymes grouped under such categories as Historical, Tales, Proverbs, Songs, Games, and Jingles.

**Hacker, Hoaxer, Whistleblower, Spy** Gabriella Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the *Huffington Post* says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —*Wired* Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put

him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of "trolling," the ethics and metaphysics of hacking, and the origins and manifold meanings of "the lulz."

Transforming REDD+ Angelsen, A.,Martius, C.,de Sy, V.,Duchelle, A.E.,Larson, A.M.,Pham, T.T.,2018-12-12 Constructive critique. This book provides a critical, evidence-based analysis of REDD+ implementation so far, without losing sight of the urgent need to reduce forest-based emissions to prevent catastrophic climate change. *Statistical Mechanics* James Sethna,2006-04-07 In each generation, scientists must redefine their fields: abstracting, simplifying and distilling the previous standard topics to make room for new advances and methods. Sethna's book takes this step for statistical mechanics - a field rooted in physics and chemistry whose ideas and methods are now central to information theory, complexity, and modern biology. Aimed at advanced undergraduates and early graduate students in all of these fields, Sethna limits his main presentation to the topics that future mathematicians and biologists, as well as physicists and chemists, will find fascinating and central to their work. The amazing breadth of the field is reflected in the author's large

supply of carefully crafted exercises, each an introduction to a whole field of study: everything from chaos through information theory to life at the end of the universe.

**Nutrition and Physical Degeneration: A Comparison of Primitive and Modern Diets and Their Effects** Weston A. Price, Trung Nguyen, 2016-01-08 The answers for perfect teeth, unblemished skin, and pristine hair are in this book. Dr. Price was 75 years ahead of his time. In this book, he demonstrates that isolated groups of people living in accordance with Nature have the best overall physical and mental health. Diseases inflicting “modern” humans are unheard of in most of these study groups. Dr. Weston Andrew Price, DDS, was called the “Isaac Newton of Nutrition” and the “Darwin of Nutrition.” This edition of Dr. Price’s classic is modernized with the epub format. It is easier to read on smartphones and tablets. It also includes updated statistics and additional images. Dr. Price shows that illness, disease, behavior, criminality, anemia, voice, and even cheek-line, are all within the domain of Nutrition. “If civilized man is to survive, he must incorporate the fundamentals of primitive nutritional wisdom into his modern lifestyle.” —Dr. Weston A. Price, DDS

Aramis, or The Love of Technology Bruno Latour, 1996-04-01 Bruno Latour has written a unique and wonderful tale of a technological dream gone wrong. The story of the birth and death of Aramis—the guided-transportation system intended for Paris—is told in this thought-provoking and fictional account by several different parties: an engineer and his professor; company executives and elected officials; a sociologist; and finally Aramis itself, who delivers a passionate plea on behalf of technological innovations that risk being abandoned by their makers. As the young engineer and professor follow Aramis’s trail—conducting interviews, analyzing documents, assessing the evidence—perspectives keep shifting: the truth is revealed as multilayered, unascertainable, comprising an array of possibilities worthy of Rashomon. This charming and profound book, part novel

and part sociological study, is Latour at his thought-provoking best.

*Godard On Godard* Jean-luc Godard, 1986-03-22 Jean-Luc Godard, like many of his European contemporaries, came to filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for *La Gazette du Cinéma* to his later writings for *Cahiers du Cinéma*, reflects his dazzling intelligence, biting wit, maddening judgments, and complete unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself—his own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of *Breathless*, *A Woman Is a Woman*, *My Life to Live*, *Alphaville*, *La Chinoise*, and *Weekend*, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

**The Oxford Handbook of Chinese Cinemas** Carlos Rojas, Eileen Chow, 2013-04-25 What does it mean for a cinematic work to be Chinese? Does it refer specifically to a work's subject, or does it also reflect considerations of language, ethnicity, nationality, ideology, or political orientation? Such questions make any single approach to a vast field like Chinese cinema difficult at best. Accordingly, *The Oxford Handbook of Chinese Cinemas* situates the term more broadly among various different phases, genres, and distinct national configurations, while taking care to address the consequences of grouping together so many disparate histories under a single banner. Offering both a platform for cross-disciplinary dialogue and a mapping of Chinese cinema as an

expanded field, this Handbook presents thirty-three essays by leading researchers and scholars intent on yielding new insights and new analyses using three different methodologies. Chapters in Part I investigate the historical periodizations of the field through changing notions of national and political identity — all the way from the industry's beginnings in the 1920s up to its current forms in contemporary Hong Kong, Taiwan, and the global diaspora. Chapters in Part II feature studies centered on the field's taxonomical formalities, including such topics as the role of the Chinese opera in technological innovation, the political logic of the Maoist film, and the psychoanalytic formula of the kung fu action film. Finally, in Part III, focus is given to the structural elements that comprise a work's production, distribution, and reception to reveal the broader cinematic apparatuses within which these works are positioned. Taken together, the multipronged approach supports a wider platform beyond the geopolitical and linguistic limitations in existing scholarship. Expertly edited to illustrate a representative set of up to date topics and approaches, The Oxford Handbook of Chinese Cinemas provides a vital addition to a burgeoning field still in its formative stages.

*The Way of Lao Tzu* Wing-tsit Chan ,2015-10-14 No one can understand China or be an intelligent citizen of the world without some knowledge of the Lao Tzu, also called the Tao-te ching (The Classic of the Way and Its Virtue), for it has modified Chinese life and thought throughout history and has become an integral part of world literature. Therefore any new light on it, however little, should prove to be helpful. There have been many translations of this little classic, some of them excellent. Most translators have treated it as an isolated document. Many have taken it as religious literature. A few have related it to ancient Chinese philosophy. But none has viewed it in the light of the entire history of Chinese thought. Furthermore, no translator has consulted extensively the many commentaries regarding the text, much less the thought. Finally, no translator has written a complete commentary from the

perspective of the total history of Chinese philosophy. Besides, a comprehensive and critical account of the recent debates on Lao Tzu the man and Lao Tzu the book is long overdue. The present work is a humble attempt to fill these gaps. This 1963 work is organized as follows: I. The Philosophy of Tao 1. Historical Background and the Taoist Reaction 2. The Meaning of Tao 3. The Emphasis on Man and Virtue 4. Weakness and Simplicity 5. Unorthodox Techniques 6. Lao Tzu and Confucius Compared 7. Lao Tzu and Chuang Tzu Compared 8. Influences on Neo-Taoism, Buddhism, and Neo-Confucianism 9. The Taoist Religion 10. Taoism in Chinese Life II. Lao Tzu, the Man 1. Traditional Accounts 2. Lao Tzu's Birthplace and Names 3. Lao Tzu's Occupation 4. Confucius' visit to Lao Tzu 5. Lao Lai Tzu and Lao P'eng 6. The Grand Historian 7. Summary and Conclusion III. Lao Tzu, the Book 1. Reactions Against Tradition 2. Arguments About Contemporary References 3. Arguments About Style 4. Arguments About Terminology 5. Arguments About Ideas 7. Titles and Structure 8. Commentaries 9. Translations The Lao Tzu (Tao-te ching)
