Two Hundred Days - a Portrait of Portugal Mark

Benham,2015-09-01 I have sought to show, with some intimacy, a side of Portugal whose values and way of life seem, in many ways, congenial with my own. From market traders to fishermen, pilgrims to gypsies, I was drawn to those whose lives seem somewhat

distant from the glare of the fast changing modern world, and who form the underbelly of a country where change is rapidly accelerating. I found these people to be polite and warm-hearted, often leading a traditional way of life, usually guided by religious beliefs and principles. They live and thrive in a diverse landscape; from the open plains of southern Alentejo to the more mountainous north. Along the west coast the terrain is wild and rugged, with glorious – often empty – beaches, and majestic cliffs that have been sculpted by the pounding waves of the Atlantic Ocean. To the east lies an interior of mountains and broad river valleys.

Portugal Elyse Booth,2020-07-31 Take a trip through the streets of Lisbon, Portugal. This coffee table photography book is a great opportunity to take a trip in the comfort of your own home. Experience the vibrant colours of the cityscapes and waterfront sculptures. All of the murals and cultural graffiti bring the city to life.

Biomimetic Architecture and Its Role in Developing Sustainable, Regenerative, and Livable Cities Mohsen

Aboulnaga, Samaa E. Helmy, 2022-09-01 This book focuses on understanding biomimetic architecture and its role as a sustainable design tool. It presents the role of biomimicry in mitigation and adaptation to climate change and examines how biomimetic architecture can provide healthy solutions to limit the spread of COVID-19 in buildings and cities. Coverage includes global examples of biomimetic approaches and buildings, an evaluation of the performance of biomimicry applications in architecture to illustrate best practices, and an exploration of how nature can offer inspiration in building design to conserve resources and save energy use as well as curb carbon emissions – a reaffirmed goal of COP 26 and an outcome of Glasgow Climate Pact. Finally, the book presents guidelines to enhance urban areas and healthier spaces in buildings to meet COVID-19 social distance regulations and beyond. Examines global applications of biomimicry in architecture; Highlights the importance of biomimicry in driving livability in cities and buildings; Explores the role of biomimetic architecture in mitigating climate change. “The line of argument developed is highly relevant to the present, in addition to being

original and pertinent to research on urban regeneration, especially in regard to the exploration of the use of biomimicry architecture in response to changing urban demands.” —Alessandra Battisti,

Ph.D., Professor of Architecture, University of Rome La Sapienza-

Spooky Technology: A reflection on the invisible and otherworldly qualities in everyday technologies Daragh Byrne, Dan Lockton, Matthew Cruz, Christi Danner, Karen Escarcha, Katherine Giesa, Meijie Hu, Yiwei Huang, Miranda Luong, Anuprita Ranade, Gordon Robertson, Elizabeth Wang, Lisa (Yip Yan) Yeung, Catherine Yochum, 2021-08-31 Spooky Technology explores our understanding of the invisible technologies in our everyday lives, from objects with ‘intelligence’ to systems in our homes that talk to us (and each other). The book is an inventory of spooky technologies, compiled by Carnegie Mellon students reviewing work across art, design, HCI, psychology, human factors research, and other fields, that has been done in this field, or adjacent to it, both historically and more recently, with commentary, essays, and interviews with creators and artists. We often hear that the technologies in our everyday lives would appear to be ‘magic’ and potentially terrifying to people in the past—instantaneous communication with people all over the world, access to a vast,

ever-growing resource of human knowledge right there in the palm of our hand, objects with ‘intelligence’ that can sense and talk to us (and each other). But rarely are these ‘otherworldly’ dimensions of technologies explored in more detail. There is an often unspoken presumption that the march of progress will inevitably mean we all adopt new practices, and incorporate new products and new ways of doing things into our lives—all cities will become smart cities; all homes will become smart homes. But these systems have become omnipresent without our necessarily understanding them. They are not just black boxes, but invisible: entities in our homes and everyday lives which work through hidden flows of data, unknown agendas, imaginary clouds, mysterious sets of rules which we perhaps dismiss as ‘algorithms’ or even ‘AI’ without really understanding what that means. On some level, the superstitions and sense of wonder, and ways of relating to the unknown and the supernatural (deities, spirits, ghosts) which humanity has felt in every culture throughout history have not gone away, but started to become transferred and transmuted into new forms.

Tourism Innovation in Spain and Portugal João Leitão,Vanessa Ratten,Vitor Braga,2021-09-29 Tourism is one of the sectors that have undergone substantial change for several decades and in particular due to the restrictions and change in national and

international policies since the beginning of the COVID-19 pandemic. This book focuses on how tourism has been innovative, especially in light of these changes, by providing new and novel ways of introducing change into the marketplace. The book focuses on Spain and Portugal, thereby offering an interesting perspective as to how the Iberian Peninsula has adapted based on the new market conditions. This book is the first to focus specifically on these countries and offers an economic geography perspective on tourism innovation. This will provide useful and practical information about how a region has hurt but also thrived in times of global turmoil.

A Fistful of Shells Toby Green, 2019-01-31 Winner of the Nayef Al-Rodhan Prize for Global Cultural Understanding 2019 Shortlisted for the Cundill History Prize and the Pius Adesanmi Memorial Award 'Astonishing, staggering' Ben Okri, Daily Telegraph A groundbreaking new history that will transform our view of West

Africa By the time of the 'Scramble for Africa' in the late nineteenth century, Africa had already been globally connected for many centuries. Its gold had fuelled the economies of Europe and Islamic world since around 1000, and its sophisticated kingdoms had traded with Europeans along the coasts from Senegal down to Angola since the fifteenth century. Until at least 1650, this was a trade of equals, using a variety of currencies - most importantly shells: the cowrie shells imported from the Maldives, and the nzimbu shells imported from Brazil. Toby Green's groundbreaking new book transforms our view of West and West-Central Africa. It reconstructs the world of kingdoms whose existence (like those of Europe) revolved around warfare, taxation, trade, diplomacy, complex religious beliefs, royal display and extravagance, and the production of art. Over time, the relationship between Africa and Europe revolved ever more around the trade in slaves, damaging Africa's relative political and economic power as the terms of monetary exchange shifted drastically in Europe's favour. In spite of these growing capital imbalances, longstanding contacts ensured remarkable connections between the Age of Revolution in Europe and America and the birth of a revolutionary nineteenth century in Africa. *A Fistful of Shells* draws not just on written histories, but on

archival research in nine countries, on art, praise-singers, oral history, archaeology, letters, and the author's personal experience to create a new perspective on the history of one of the world's most important regions.
