Foucault 2.0 Eric Paras,2020-01-14 A dramatically new interpretation of the development of the thought of Michel Foucault, one of the 20th century's most influential thinkers. In this lucid and groundbreaking work, Eric Paras reveals that our understanding of the philosophy of Michel Foucault must be radically revised. Foucault's critical axes of power and knowledge -which purposefully eradicated the concept of free will- reappear as targets in his later work. Paras demonstrates the logic that led Foucault to move from a microphysics of power to an aesthetics of individual experience. He is the first to show a transformation that not only placed Foucault in opposition to the archaeological and genealogical positions for which he is renowned, but aligned him with some of his fiercest antagonists. Foucault 2.0 draws on the full range of the philosopher's writing and of the work of contemporaries who influenced, and sometimes vehemently opposed, his ideas. To fill the gaps in Foucault's published writings that have so far limited our conception of the arc of his thought, Paras analyzes the largely untapped trove of lectures Foucault delivered to teeming Paris audiences as Professor of the College de France for more than a decade. At the same time, Foucault 2.0 highlights the background against which Foucault carried out his most foundational work: the unrest of 1968, the prison reform movement of the early 1970s, and the Iranian Revolution of 1979. Carefully assembling the fragments of a thinker who remains but half-understood, Eric Paras has composed a seminal book, essential reading for novices and initiates alike.

Perestroika in Paris Jane Smiley, 2021-11-02 NATIONAL BESTSELLER • From the Pulitzer Prize-winning and best-selling author: a captivating, brilliantly imaginative story of three extraordinary animals—and a young boy—whose lives intersect in Paris in this feel-good escape” (The New York Times). Paras, short for Perestroika, is a spirited racehorse at a racetrack west of Paris. One afternoon at dusk, she finds the door of her stall open and—she's a curious filly—wanders all the way to the City of Light. She's dazzled and often mystified by the sights, sounds, and smells around her, but she isn't afraid. Soon she meets an elegant dog, a German shorthaired pointer named Frida, who knows how to get by without attracting the attention of suspicious Parisians. Paras and Frida coexist for a time in the city's lush green spaces, nourished by Frida's strategic trips to the vegetable market. They keep company with two irrepressible ducks and an opinionated raven. But then Paras meets a human boy, Etienne, and discovers a new, otherworldly part of Paris: the ivy-walled house where the boy and his nearly-one-hundred-year-old

great-grandmother live in seclusion. As the cold weather nears, the unlikeliest of friendships bloom. But how long can a runaway horse stay undiscovered in Paris? How long can a boy keep her hidden and all to himself? Jane Smiley's beguiling new novel is itself an adventure that celebrates curiosity, ingenuity, and the desire of all creatures for true love and freedom.

The Paras 1940–84 Gregor Ferguson, 1984-09-27 Osprey's examination of the British Airborne Forces, from World War II (1939-1945) to the Falklands War (1982). On the night of 7 February 1941 the first British parachute unit was sent into action. Their target was the Tragino Aqueduct in Italy, and although the mission itself did not go to plan, the effect on Italian morale of this landing in the heart of their country was considerable. It was also a

valuable achievement for the parachutists to have proved themselves in action, even on so small a scale, at a time when Britain was reeling from defeat to defeat. Since then, British Airborne Forces have proved themselves in action time and time again, in a variety of different theatres from Europe to the Falklands.

Mind Is Flat Nick Chater, 2018-08-07 In a radical reinterpretation of how the mind works, an eminent behavioral scientist reveals the illusion of mental depth. Psychologists and neuroscientists struggle with how best to interpret human motivation and decision making. The assumption is that below a mental "surface" of conscious awareness lies a deep and complex set of inner beliefs, values, and desires that govern our thoughts, ideas, and actions, and that to know this depth is to know ourselves. In this profoundly original book, behavioral scientist Nick Chater contends just the opposite: rather than being the plaything of unconscious currents, the brain generates behaviors in the moment based entirely on our past experiences. Engaging the reader with eye-opening experiments and visual examples, the author first demolishes our intuitive sense of how our mind works, then argues for a positive interpretation of the brain as a ceaseless and creative improviser.

National Security, Personal Privacy and the Law Sybil Sharpe, 2019-10-21 There have been significant changes in public attitudes towards surveillance in the last few years as a consequence of the Snowden disclosures and the Cambridge Analytica scandal. This book re-evaluates competing arguments between national security and personal privacy. The increased assimilation between the investigatory powers of the intelligence services and the police and revelations of unauthorised surveillance have resulted in increased demands for transparency in information gathering and for greater control of personal data. Recent legal reforms have attempted to limit the risks to freedom of association and expression associated with electronic surveillance. This book looks at the background to recent reforms and explains how courts and the legislature are attempting to effect a balance between security and personal liberty within a social contract. It asks what drives public concern when other aspects seem to be less contentious. In view of our apparent willingness to post on social media and engage in online commerce, it considers if we are truly consenting to a loss of privacy and how this reconciles with concerns about state surveillance.
