Discovering Ritual Meditation Carlton B. Brown,2016-01-16 This book provides you means and methods for accessing expanded or higher states of consciousness. It gives you a plan on using these experiences to awaken to yourself as consciousness, to help you profoundly heal, and to self-realize. You will then live in innate presence and subsequently transform your life. I discovered ancient priesthood ritual methods for accessing expanded states of consciousness while researching the archaeology of the Sun god religions of Egypt, India, and Central and South America. Ritual Meditation and Transcendental Self-Inquiry methods, derived from these discoveries, will help you know yourself as consciousness within and beyond objective reality. You will find this book useful if you already meditate and know profound spiritual and healing experiences are possible—but don't know how. You already understand that magic mushrooms can dramatically improve the symptoms and quality of life for people with an array of psychoemotional issues relating to death anxiety, depression, anxiety, chemical addictions, post-traumatic stress, and difficult emotions resulting from early life abuse—but don't know how to use them. If you're a hobby archaeologists looking for objective answers to our ancient enigmatic past then you will witness some unique archaeological discoveries in reading this book. Go on, put me in your basket, read me, then practice with humility, and i guarantee you that you will transform your life and what happens after you die.

Sherds of History Myriam Arcangeli,2015-01-20 Ceramics serve as one of the best-known artifacts excavated by archaeologists. They are carefully described, classified, and dated, but rarely do scholars consider their many and varied uses. Breaking from this convention, Myriam Arcangeli examines potsherds from four colonial sites in the Antillean island of Guadeloupe to discover what these everyday items tell us about the people who used them. In the process, she reveals a wealth of information about the lives of the elite planters, the middle and lower classes, and enslaved Africans. By analyzing how the people of Guadeloupe used ceramics—whether jugs for transporting and purifying water, pots for cooking, or pearlware for eating—Arcangeli spotlights the larger social history of Creole life. What emerges is a detail rich picture of water consumption habits, changing foodways, and concepts of health. *Sherds of History* offers a compelling and novel study of the material record and the “ceramic culture” it represents to broaden our understanding of race, class, and gender in French-colonial societies in the Caribbean and the United States. Arcangeli's innovative interpretation of the material record will challenge the ways archaeologists analyze ceramics.

Geoethics in Peru Sandra Paula Villacorta Chambi,2022-02-25 The book discusses geoscience issues in Peru from a geoethical perspective, based on the leading experience of the Peruvian section of the International Association for Promoting Geoethics, in its seven years of activity. The introduction will present past and current activities to promote geoethics in Peru, such as the organization of the MinerLima exhibition (that has teaching purposes); the implementation of geoethics in georisk communication with vulnerable populations, as well as the promotion of adequate knowledge about national geological heritage. The other chapters will describe the main geoethical issues in Peru, related to georisk management and communication, mining, paleontology and geoheritage, geoducation. Some proposals for actions that should be taken to improve societal awareness and to make progress in problem-solving from a geoethical perspective will be discussed for each issue. In the final chapter Peruvian geoscience implications and new roles for geoscientists will be discussed, providing clues to their participation in the management of socio-environmental problems that affect Latin American region. It will be also underlined how geoethics represents a new theoretical and practical approach that may contribute in the current process to modernize geoscience education in Latin America. In this sense, this publication provides a solid base to apply the theoretical framework of Geoethics in Peru that may be suggested as an

example to promote geoethics in other Latin American countries. As a result, the need to inform and prepare the population of growing countries such as Peru to face the problems of the modern world is evident. In order to attract more readers in Latin America, each chapter will be provided with a summary in Spanish.

Rainwater Harvesting Anil Lalwani,2022-09-09 Our dependency on groundwater resources and overuse thereof has led to a decline in water table so that in the last couple of decades the focus has shifted back to the traditional practices of rainwater harvesting, and ways and means have been sought to promote Rainwater harvesting in Urban areas to recharge the stressed groundwater systems. This book discusses in brief the classifications of Rainwater harvesting, and the various rainwater harvesting systems that are currently applied. The most important aspect for achieving any groundwater recharge is the availability of source water, this can be evaluated by analyzing the monsoon rainfall pattern, its frequency, number of rainy days, and maximum rainfall in a day and its variation in space and time. The Deccan basalts are one of the most enigmatic rocks in India and pose a very difficult task when it comes to ground water exploration and groundwater recharge, especially in the urban areas where due to constraint of space one needs to resort to borewells for recharge purpose. It is important for any such undertaking to understand the applicability and sustainability aspects of Rainwater harvesting as it is being practiced. This book tries to differentiate the Basaltic Aquifers from the other hard-rock Aquifers, and highlights the difficulties in trying to implement rainwater harvesting by groundwater recharge with the basaltic terrain. It also deals with the issue of long term sustainability of roof top Rainwater to meet the growing demands of fresh water. It also highlights some of the shortcomings in the methodologies used and the requirements for being considered in the various categories of green building rating agencies. It furthermore clarifies the possibility and limitations of dependence of roof top harvesting in addressing the question of water shortages, which is of common occurrence within most urban centres of India. It also helps in clarifying major misconceptions that are currently prevailing regarding Roof top Rainwater harvesting especially within the low capacity aquifers within the hard rock terrain of the Deccan basalts.

The Independent Republic of Arequipa Thomas F. Love,2017-11-29 Arequipa, Peru's second largest city, has the most intense regional culture in the central Andes. Arequipeños fiercely conceive of themselves as exceptional and distinctive, yet also broadly representative of the nation's overall hybrid nature—a blending of coast (modern, white) and sierra (traditional, indigenous). The Independent Republic of Arequipa investigates why and how this regional identity developed in a boom of cultural production after the War of the Pacific (1879–1884) through the mid-twentieth century. Drawing on decades of ethnographic fieldwork, Thomas F. Love offers the first anthropological history of southwestern Peru's distinctive regional culture. He examines both its pre-Hispanic and colonial altiplano foundations (anchored in continuing pilgrimage to key Marian shrines) and the nature of its mid-nineteenth century revolutionary identity in cross-class resistance to Lima's autocratic control of nation-building in the post-Independence state. Love then examines Arequipa's early twentieth-century mestizo identity (an early and unusual case of browning of regional identity) in the context of raging debates about the national question and the Indian problem, as well as the post-WWII development of extravagant displays of distinctive bull-on-bull fighting that now constitute the very performance of regional identity. Love's research reveals that Arequipa's traditional local culture, symbolically marked by populist, secular, and rural elements, was in fact a project of urban-based, largely middle-class cultural entrepreneurs, invented to counter continuing Limeño autocratic power, marked by nostalgia, and anxious about the inclusion of the nation's indigenous majority as full modern citizens.
