Dragons Coloring Book Christy Shaffer, 2002-03-01

Dragons have figured prominently in the legends and folk tales of countless cultures. Thirty ready-to-color images of fire-breathing mythical creatures with batlike wings, scaly skin, and a barbed tail – among them a flying dragon with three heads; Quetzalcoatl, a legendary feather-covered serpent; the Leviathan, a sea monster of enormous proportions; the African amphisbaena, a beast with heads on both ends of its body; and a real dragon, the Komodo, one of the world's largest living reptiles.

Mind Hacks Tom Stafford, Matt Webb, 2004-11-22

The brain is a fearsomely complex information-processing environment--one that often eludes our ability to understand it. At any given time, the brain is collecting, filtering, and analyzing information and, in response, performing countless intricate processes, some of which are automatic, some voluntary, some conscious, and some unconscious. Cognitive neuroscience is one of the ways we have to understand the workings of our minds. It's the study of the brain biology behind our mental functions: a collection of methods--like brain scanning and computational modeling--combined with a way of looking at psychological phenomena and discovering where, why, and how the brain makes them happen. Want to know more? Mind Hacks is a collection of probes into the moment-by-moment works of the brain. Using cognitive neuroscience, these experiments, tricks, and tips related to vision, motor skills, attention, cognition, subliminal perception, and more throw

The Summer Dragon Todd Lockwood, 2018-05 The debut novel from the acclaimed illustrator--a high fantasy adventure featuring dragons and deadly politics. Maia and her family raise dragons for the political war machine. As she comes of age, she hopes for a dragon of her own to add to the stable of breeding parents. But the war goes badly, and the needs of the Dragonry dash her hopes. Joan Procter, Dragon Doctor Patricia Valdez, 2018-03-13 For fans of Ada Twist: Scientist comes a fascinating picture book biography of a pioneering female scientist--who loved reptiles! Back in the days of long skirts and afternoon teas, young Joan Procter entertained the most unusual party guests: slithery and scaly ones, who turned over teacups and crawled past the crumpets.... While other girls played with dolls, Joan preferred the company of reptiles. She

carried her favorite lizard with her everywhere-- she even brought a crocodile to school! When Joan grew older, she became the Curator of Reptiles at the British Museum. She went on to design the Reptile House at the London Zoo, including a home for the rumored-to-be-vicious komodo dragons. There, just like when she was a little girl, Joan hosted children's tea parties--with her komodo dragon as the guest of honor. With a lively text and vibrant illustrations, scientist and writer Patricia Valdez and illustrator Felicita Sala bring to life Joan Procter's inspiring story of passion and determination. Dragons & Pagodas Aldous Bertram, 2021-09-21 A gorgeously illustrated survey of chinoiserie from the 18th century to today Chinoiserie is a term for Western art and design inspired by a largely invented vision of China. Marco Polo's sensational account of his visit to the exotic East in the 13th century sparked a fascination with China that reached a fever pitch in the 18th century and continues to this day. Art historian and artist Aldous Bertram has long been captivated by chinoiserie. *Dragons & Pagodas* is organized by

theme, including porcelain, color and pattern, flora, fauna, and architecture. Each chapter is bursting with images ranging from grand European summer palaces and whimsical pagoda follies to charming details of screens, porcelain figurines, and ornate plasterwork. Complete with Bertram's own chinoiserie-inspired watercolors and collages, *Dragons & Pagodas* is an irresistible confection and an example of chinoiserie in its own right. - Cloth bound with edge stain

Materials and Processes of Contemporary Sculpture Mahmoud Farag, 2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it. Prior to a few decades ago, most sculptors were restricted to carving stone and wood or casting plaster, ceramics and bronze for their creations. Contemporary sculptors, however, are no longer bound by the limitations of these traditional materials and processes, and can now create works in sizes, forms and textures that could not have been achieved previously. Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing. To fully utilize the full potential of such new materials, the sculptor needs to understand their points of strength, their limitations, and the most effective way of shaping them to achieve a given design. Although this book is written by a materials engineer, the subject matter is
