Flying the Knife Edge Matt McLaughlin, 2016-02-24

'Flying the Knife Edge' is the story of an ordinary man experiencing extraordinary things as a bush pilot in remote Papua New Guinea in the 1990s. This critically acclaimed memoir chronicles New Zealander Matt McLaughlin's adventures on the knife edge of bush pilot ops in one of the world's most dangerous flying environments. A hair raising tale

Civil Aircraft Jim Winchester, 2007 Describes various aircrafts, from enormous planes that carry hundreds of passengers to personal planes.

Last Chance to Fly Robert Mitchell, 2017-09-25

First in the Field Guy Warner, 2011-12-01 651 was the first Air Observation Post (AOP) Squadron, formed at Old Sarum on August 1 1941 to work closely with army units in artillery spotting and liaison. It was still part of the RAF but all the pilots, drivers and signalers were from the Royal Artillery, while the RAF supplied the Adjutant, Engineer Officer and technicians. It is therefore the premier Army Air Corps squadron. Its first aircraft were an assortment of Taylorcraft Plus Cs and Ds, three Piper Cubs and a Stinson Voyager. Then later that year all 651s aircraft were replaced by the version of the Plus D manufactured by Taylorcraft in Britain and renamed the Auster I. These were deployed on active service in November 1942, to Algeria and then Tunisia, as part of Operation Torch. Its main duties were the direction of artillery fire, reconnaissance and light liaison. By May 1943 Tunisia was under Allied control and 651 moved to Sicily in support of offensive operations by 8th Army in August. Now equipped with Auster IIIs and flying by night and day, support was given to XIII Corps on the coast of the island, registering targets and directing counter-battery fire, including that of Royal Naval warships.

On September 4, it became the first AOP unit to cross the Straits of Messina to participate in the invasion of Italy, again with 8th Army. In May 1944, the Squadron flew in support of 2nd Polish Corps during the capture of Monte Cassino, a major obstacle in the advance of Allied forces on Rome. Throughout the remainder of the war the Auster IVs and Vs of 651 Squadron worked with almost every division in Italy as they came in and out of the front line. Over the years that followed, 651 Squadron served in Austria, Palestine on internal security duties (where a landing was made on the aircraft carrier HMS Ocean in 1947), Eritrea protecting Italian civilians from Shifta bandits, Libya, Iraq during the Persian Oil Dispute, Egypt patrolling the Canal Zone and Cyprus, where in August 1953 HQ and 1910 Flights were the first AOP assets to deploy there. Further marks of Auster were introduced, AOP 6s, 9s and T.7s. In 2000 it was selected as the Attack Helicopter Fielding Squadron to bring the Westland Apache AH.1 into service, in which role it served very successfully for the next three years at Middle Wallop. Then in 2004 it was all change again with a move to RAF Odiham to operate the Defender AL.1 in the ISTAR (Intelligence, Surveillance, Target Acquisition, and Reconnaissance) support role as part of the Joint Special Forces Aviation Wing. Since that time it has been continuously engaged in operations.

BIGGLES AND THE RESCUE FLIGHT Capt. W.E. Johns, 2023-10-31 Peter Fortymore can't believe his brother is dead so he conceives a desperate plan. He'll run away from school, 'borrow' a plane and fly off to France to find him. In the chaos of the First World War, he and his friend manage to get away with it until they're rumbled by their Flight Commander—Biggles.

The Travels of Reverend Ólafur Egilsson Ólafur Egilsson,2018-03-11 A seventeenth-century minister tells his story of abduction by pirates, and a solo journey from Algiers to Copenhagen, in this remarkable historical text. In summer 1627, Barbary corsairs raided Iceland, killing dozens and abducting almost four hundred people to sell into slavery in Algiers. Among those taken was Lutheran minister Olafur Egilsson. Reverend Olafur—born in the same year as William Shakespeare and Galileo Galilei—wrote *The Travels* to chronicle his experiences both as a captive and as a traveler across Europe as he journeyed alone from Algiers to Copenhagen in an attempt to raise funds to ransom the Icelandic captives that remained behind. He was a keen observer, and the narrative is filled with a wealth of detail—social, political, economic, religious—about both the Maghreb and Europe. It is also a moving story on the human level: We witness a man enduring great personal tragedy and struggling to reconcile such calamity with his understanding of God. *The Travels* is the first-ever English translation of the Icelandic text. Until now, the corsair raid on Iceland has remained largely unknown in the English-

speaking world. To give a clearer sense of the extraordinary events connected with that raid, this edition of *The Travels* includes not only Reverend Olafur's first-person narrative but also a collection of contemporary letters describing both the events of the raid itself and the conditions under which the enslaved Icelanders lived. Also included are appendices containing background information on the cities of Algiers and Salé in the seventeenth century, on Iceland in the seventeenth century, on the manuscripts accessed for the translation, and on the book's early modern European context.

Security Forces in Northern Ireland 1969-92 Tim Ripley, 1993-01-28 The conflict in Northern Ireland remains unlike any other campaign conducted by the British Army this century. There have been no set-piece battles, no decisive victories or crushing defeats; just a grinding, relentless series of small scale operations in response to riots, bombings, sectarian murders and terrorist ambushes. Tim Ripley, a specialist in modern military affairs and research associate at Lancaster University's Centre for Defence and International Security Studies, profiles the operations, tactics, uniforms and equipment of the British and Irish Security Forces and the main terrorist groups involved in 'the Troubles' from 1969-92.

Biggles and the Black Raider William Earl Johns, 1953 Biggles brings to justice the 'Black Elephant', a Zulu warrior who has been terrorising the Central African villages.

Stuck on the Drawing Board Richard Payne, 2004 The essential history of Britain's failed aircraft designs.

The Dream Machine Richard Whittle, 2010-04-27 WHEN THE MARINES decided to buy a helicopter-airplane hybrid "tiltrotor" called the V-22 Osprey, they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage: an aircraft able to take off,

land, and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. By 2000, the Osprey was nine years late and billions over budget, bedeviled by technological hurdles, business rivalries, and an epic political battle over whether to build it at all. Opponents called it one of the worst boondoggles in Pentagon history. The Marines were eager to put it into service anyway. Then two crashes killed twenty- three Marines. They still refused to abandon the Osprey, even after the Corps' own proud reputation was tarnished by a national scandal over accusations that a commander had ordered subordinates to lie about the aircraft's problems. Based on in-depth research and hundreds of interviews, *The Dream Machine* recounts the Marines' quarter-century struggle to get the Osprey into combat. Whittle takes the reader from the halls of the Pentagon and Congress to the war zone of Iraq, from the engineer's drafting table to the cockpits of the civilian and Marine pilots who risked their lives flying the Osprey—and sometimes lost them. He reveals the methods, motives, and obsessions of those who designed, sold, bought, flew, and fought for the tiltrotor. These stories, including never before published eyewitness accounts of the crashes that made the Osprey notorious, not only chronicle an extraordinary chapter in Marine Corps history, but also provide a fascinating look at a machine that could still revolutionize air travel.
