**Everything Is Negotiable** Meg Myers Morgan,2018-12-04 Surprising ways we limit ourselves and our happiness, and how to challenge the internalized wisdom and circular thinking that holds us back As women, many of us are stuck in feedback loops about how to be successful and happy: striving to have it all at work and at home, letting ourselves be pressured into giving every part of our lives 100% until we're completely burnt-out, imagining only a strictly linear life path (college, job, marriage, kids), and accepting limitations without question. Yet the truth is, this book argues, most of the conventional wisdom about driving our life choices is total baloney. In Everything Is Negotiable, Meg Myers Morgan deconstructs preconceived notions about adulthood, parenthood, and career paths that have us limiting ourselves. Instead of following that linear plan, for example, she urges readers to take action now for what we want -- limitations be damned. With wit and verve, Morgan also tells us to forget trying to have it all, as the clichéphrase goes -- it'll never happen. And, Morgan argues, don't bother trying to give 100% -- we simply can't give anything 100% attention, ever! Instead, this book teaches us to navigate life's necessary trade-offs free of the baggage of our own expectations. Chock full of strategies for where and when to give our limited energy, what to demand from our careers, and how to make better choices, Everything Is Negotiable is for women ready to seize the lives they really want.

**The Arbornaut** Meg Lowman,2021-08-10 “An eye-opening and enchanting book by one of our major scientist-explorers.” –Diane Ackerman, author of The Zookeeper's Wife Nicknamed the “Real-Life Lorax” by National Geographic, the biologist, botanist, and conservationist Meg Lowman—aka “CanopyMeg”—takes us on an adventure into the “eighth continent” of the world's treetops, along her journey as a tree scientist, and into climate action Welcome to the eighth continent! As a graduate student exploring the rain forests of Australia, Meg Lowman realized that she couldn't monitor her beloved leaves using any of the usual methods. So she put together a climbing kit: she sewed a harness from an old seat belt, gathered hundreds of feet of rope, and found a tool belt for her pencils and rulers. Up she went, into the trees. Forty years later, Lowman remains one of the world's foremost arbornauts, known as the “real-life Lorax.” She planned one of the first treetop walkways and helps create more of these bridges through the eighth continent all over the world. With a voice as infectious in its enthusiasm as it is practical in its optimism, The Arbornaut chronicles Lowman's irresistible story. From climbing solo hundreds of feet into the air in Australia's rainforests to measuring tree growth in the northeastern United States, from searching the redwoods of the Pacific coast for new life to studying leaf eaters in Scotland's Highlands, from conducting a BioBlitz in Malaysia to conservation planning in India and collaborating with priests to save Ethiopia's last forests, Lowman launches us into the life and work of a field scientist, ecologist, and conservationist. She offers hope, specific plans, and recommendations for action; despite devastation across the world, through trees, we can still make an immediate and lasting impact against climate change. A blend of memoir and fieldwork account, The Arbornaut gives us the chance to live among scientists and travel the world—even in a hot-air balloon! It is the engrossing, uplifting story of a nerdy tree climber—the only girl at the science fair—who becomes a giant inspiration, a groundbreaking, ground-defying field biologist, and a hero for trees everywhere. Includes black-and-white illustrations
