*Gospel* J. D. Greear,2011-10-01 Could the gospel be lost in evangelical churches? In this book, J.D. Greear shows how moralism and legalism have often eclipsed the gospel, even in conservative churches. Gospel cuts through the superficiality of religion and reacquaints you with the revolutionary truth of God's gracious acceptance of us in Christ. The gospel is the power of God, and the only true source of joy, freedom, radical generosity, and audacious faith. The gospel produces in us what religion never could: a heart that desires God. The book's core is a "gospel prayer" by which you can saturate yourself in the gospel daily. Dwelling on the

gospel will release in you new depths of passion for God and take you to new heights of obedience to Him. Gospel gives you an applicable, exciting vision of how God will use you to bring His healing to the world.

Terminal Identity Scott Bukatman,1993 Scott Bukatman's Terminal Identity--referring to both the site of the termination of the conventional subject and the birth of a new subjectivity constructed at the computer terminal or television screen--puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies. Demonstrating a comprehensive knowledge, both of the history of science fiction narrative from its earliest origins, and of cultural theory and philosophy, Bukatman redefines the nature of human identity in the Information Age. Drawing on a wide range of contemporary theories of the postmodern--including Fredric Jameson, Donna Haraway, and Jean Baudrillard--Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies. Then in a series of chapters richly supported by analyses of literary texts, visual arts, film, video, television, comics, computer games, and graphics, Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis, through its close encounters with technology, and finally to new self-recognition. This new virtual subject, as Bukatman defines it, situates the human and the technological as coexistent, codependent, and mutually defining. Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media, this volume sets a new standard in the study of science fiction--a category that itself may be redefined in light of this work. Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies--he arrives at new frontiers, providing a propitious launching point for further inquiries into the relationship of electronic technology and culture.
