Gunivortus Goos

**T(h)ing - ping or ðing** Gunivortus Goos, 2023-06-14 The historical term Thing refers to popular assemblies, open-air court sessions and parliaments. All three meanings are found in many examples in the book, including over 225 illustrations of which 182 in color. In addition 48 supporting maps are added. Thing as a juridical court session occurs most frequently, such as in old descriptions like: In this judgment seat, on the border of the two parishes, the Thing or Dinc, that is, the assembly of the court participants, gathered to take the oath, and in: The Wood-Thinge were held each time at this farmstead to redetermine the distribution of the march lands. The landlords and their heirs often came from far away to these Wood-Thinge. Many a nobleman's carriage, many a high-wheeled cart, and many a peasant's covered wagon must have stood here. Thinge, i.e. public meetings and court sessions, were preferably held under the leafy canopy of the linden tree, because it was believed that the scent of linden blossoms would make the disputants gentle and the judges benevolent. In addition, the linden tree was said to have a great protective effect. Very many of the presented Thingplaces have been preserved and many of them are impressive places to visit.

*Sustainability in the Textile and Apparel Industries* Subramanian Senthilkannan Muthu, Miguel Angel Gardetti, 2020-03-16 This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume comprehensively covers the various sustainable natural materials used in textiles that originate from raw materials sourcing. The book discusses agricultural production systems and standards for the development of sustainable textile fibers, the effects of chemical surface modification methods on the properties of textile fibers, and how antibacterial and antifungal textiles can be manufactured using natural resources.

*Formulation Product Technology* Dmitry Yu. Murzin, 2023-12-18 *Formulation Product Technology* focuses on materials chemistry and introduces industrial manufacturing technologies for different product types. Besides addressing the fundamentals and the corresponding unit operations, the author presents a full cycle of product development for the materials that are used in everyday live. Various performance and personal chemicals, such as paints, coatings, dyes, laundry detergents, glass and concrete, pesticides, diapers, skin care and hair care products, etc. are discussed starting from product selection and up to setup of manufacturing process. Additional new products discussed: dyes for textiles, decorative products, hand sanitizers, deodorants, pesticides. Easy-to-understand introduction to formulation product design. Covers all main product types of modern chemical industry.

**Exposure to Artificial UV Radiation and Skin Cancer** IARC Working Group on Risk of Skin Cancer and Exposure to Artificial Ultraviolet Light, International Agency for Research on Cancer, 2006 This report represents the views and expert opinions of an IARC Working Group that met in Lyon, France, 27-29 June 2005

**Methods of Soil Analysis** April L. Ulery, Soil Science Society of America, L. Richard Drees, 2008 The latest installment in the well-received Methods of Soil Analysis series, Methods of Soil Analysis. Part 5. Mineralogical Methods, presents valuable techniques that will enable researchers to analyze mineralogy for a wide variety of applications. An understanding of mineralogical composition provides crucial insight into the fundamental behavior of soils and their response to environmental conditions and management. Highlights include extensive coverage of new techniques, such as X-ray absorption and diffuse reflectance spectroscopy, and updated chapters on thermal analysis and selective dissolution methodologies. Each chapter provides the basic principles of the method, guides the reader through the method itself, and finally assists in the interpretation and analysis of results collected.

**Forensic Microscopy** Ritesh K Shukla, Neeti Kapoor, Ashish Badiye, 2022-07-12 Forensic Microscopy: Truth Under the Lenses provides an overview and understanding of the various types of microscopes and their techniques employed in forensic science. The book emphasizes both the theoretical and practical aspects of microscopy to enrich the reader's understanding of the various tools, techniques, and utility—including strengths and weaknesses—of types of microscopes in analyzing certain forms of evidence. The book begins with the history of microscopes, the basic optics for microscopy, then moves to advanced microscopies such as electron microscopes and atomic force microscopes. In addition to the various types of microscopes and how to use and best utilize them, the book looks at the analysis of specific types of evidence, including hair, fiber, fingerprint, body fluids, tool marks, ink, pollen grains, spores, diatoms, bullets, cartridges, among other evidence types. Since forensic science is an applied, hands-on discipline, the book includes both a theoretical and a practical approach to the topic. Key Features: Addresses simple to advanced microscopy techniques for the effective analyses of trace evidence Pairs chapters on a particular type of microscopy, explaining it thoroughly, before delving into specific usage for forensic applications Presents theories and as well as real-world application of concepts Provides abundant micro-photographs, including graphical representations and flow charts, to illustrate concepts clearly Forensic Microscopy serves as a helpful reference for undergraduate and postgraduate students in forensic science, forensic biology, forensic chemistry and related programs. It is also recommended for research students, academicians, technicians, industry and laboratory professionals working on trace evidence analysis.

*Basic Concepts in Clinical Biochemistry: A Practical Guide* Vijay Kumar, Kiran Dip Gill, 2018-03-30 This book is a practical guidebook in biochemistry, for medical as well as life sciences' students. The book covers reference values, sample collection procedure and detailed protocol to perform experiments. Each experiment starts with a brief introduction of the protocol, followed by specimen requirements and procedure. The procedures are presented in a very lucid manner and discuss details of calculations and clinical interpretations, The book is divided into 29 chapters, It offers references, general guidelines and abbreviations and provides principles and procedures of clinical biochemistry tests, along with their diagnostic importance.

The Effects of UV Radiation in the Marine Environment Stephen De Mora, Serge Demers, Maria Vernet, 2000-03-09 This book, first published in 2000, provides a comprehensive, multidisciplinary review of UV radiation effects in the marine environment. It is aimed at researchers and graduate students in photobiology, photochemistry and environmental science. It will also be useful as a supplementary text for courses in oceanography, climatology and ecology.

Computer Vision and Image Processing Satish Kumar Singh, Partha Roy, Balasubramanian Raman, P. Nagabhushan, 2021-03-25 This three-volume set (CCIS 1376-1378) constitutes the refereed proceedings of the 5th International Conference on Computer Vision and Image Processing, CVIP 2020, held in Prayagraj, India, in December 2020. Due to the COVID-19 pandemic the conference was partially held online. The 134 papers were carefully reviewed and selected from 352 submissions. The papers present recent research on such topics as biometrics, forensics, content protection, image enhancement/super-resolution/restoration, motion and tracking, image or video retrieval, image, image/video processing for autonomous vehicles, video scene understanding, human-computer interaction, document image analysis, face, iris, emotion, sign language and gesture recognition, 3D image/video processing, action and event detection/recognition, medical image and video analysis, vision-based human GAIT analysis, remote sensing, and more.

Formation and Control of Biofilm in Various Environments Hideyuki Kanematsu, Dana M. Barry, 2020-01-25 This book provides excellent techniques for detecting and evaluating biofilms: sticky films on materials that are formed by bacterial activity and produce a

range of industrial and medical problems such as corrosion, sanitary problems, and infections. Accordingly, it is essential to control biofilms and to establish appropriate countermeasures, from both industrial and medical viewpoints. This book offers valuable, detailed information on these countermeasures. It also discusses the fundamentals of biofilms, relates various substrates to biofilms, and presents a variety of biofilm reactors. However, the most important feature of this book (unlike others on the market) is its clear focus on addressing the practical aspects from an engineering viewpoint. Therefore, it offers an excellent practical guide for engineers and researchers in various fields, and can also be used as a great academic textbook.

**Genetics and Biotechnology** Ulrich Kück, 2013-03-09 Mycology, the study of fungi, originated as a subdiscipline of botany and was a descriptive discipline, largely neglected as an experimental science until the early years of this century. A seminal paper by Blakeslee in 1904 provided evidence for self incompatibility, termed heterothallism, and stimulated interest in studies related to the control of sexual reproduction in fungi by mating-type specificities. Soon to follow was the demonstration that sexually reproducing fungi exhibit Mendelian inheritance and that it was possible to conduct formal genetic analysis with fungi. The names Burgeff, Kniep and Lindegren are all associated with this early period of fungal genetics research. These studies and the discovery of penicillin by Fleming, who shared a Nobel Prize in 1945, provided further impetus for experimental research with fungi. Thus began a period of interest in mutation induction and analysis of mutants for biochemical traits. Such fundamental research, conducted largely with *Neurospora crassa*, led to the one gene: one enzyme hypothesis and to a second Nobel Prize for fungal research awarded to Beadle and Tatum in 1958. Fundamental research in biochemical genetics was extended to other fungi, especially to *Saccharomyces cerevisiae*, and by the mid-1960s fungal systems were much favored for studies in eukaryotic molecular biology and were soon able to compete with bacterial systems in the molecular arena.

**Introduction to Crime Scene Photography** Edward M. Robinson, 2012-08-15 Introduction to Crime Scene Photography acquaints the reader with the essentials of basic crime scene photography techniques. It looks at the concepts related to composition and relates them to the types of photographs captured by crime scene photographers. It explains how to capture images based on the exposure settings chosen to produce the effect desired. It considers the techniques used needed to control and maximize Depth of Field (DOF), and reviews how the different lenses will affect an image. Organized into seven chapters, the book begins with an overview of crime scene photography and composition, including the three cardinal rules of good photography. It then proceeds with a discussion of the benefits of bounce flash and how to utilize this technique to properly compose the subject of interest. It also explains how to capture any image necessary at the crime scene by combining the concepts of composition, nonflash exposure, DOF, flash exposure, and the use of various types of lenses. In addition, the reader is introduced to various energy sources and filters, digital processing of evidentiary photography, and legal issues related to photographs and digital images. Examples and illustrations are provided throughout to demonstrate how the concepts examined tend to form a sort of symbiotic relationship. This text will benefit scene investigators and photographers, forensic consultants, forensic scientists, undergraduate students in forensic and/or criminal justice programs, law enforcement professionals, and anyone who wants to acquire the skills needed to be a successful crime scene photographer. Contains over 350 high-quality 4-color images Rules of Thumb are included to highlight key concepts

**Borish's Clinical Refraction - E-Book** William J. Benjamin, 2006-06-21 Now updated and expanded to cover the latest technologies, this full-color text on clinical refraction uses an easy-to-read format to give optometry students and practitioners all the important information they need. Also covers a wide range of other aspects of the eye exam, including anterior and posterior segment evaluations, contact lens, ocular pharmacology, and visual field analysis. Four new chapters cover wavefront-guided refraction, optical correction with refractive surgeries, prosthetic devices, and patients with ocular pathology. Offer precise, step-by-step how-to's for performing all of the most effective refractive techniques. Presents individualized refractive approaches for the full range of patients, including special patient populations. Contributors are internationally recognized, leading authorities in the field. New full-color design with full-color images throughout. Completely updated and expanded to include current technologies. A new chapter on Optical Correction with Refractive Surgeries, including keratoplasty, traditional refractive surgeries (e.g. LASIK and PRK), crystalline lens extraction with and without pseudophakia, the new presbyopic surgery, etc. A new chapter on Wavefront Guided Refraction provides information on the advantages and limitations the Hartmann-Shack Method for objective refraction plus aberrometry and the refraction and the use of in the correction of the eye with spectacles, contact lenses, and refractive surgery. A new chapter on Patients with Ocular Pathology reflects the most current knowledge of patients with ocular pathologies. Provides information on Optical Correction with Prosthetic Devices, including corneal onlays, stromal implants, phakic intraocular lenses, etc. Includes new chapters and/or discussions on such topics as: Aberrations of the Eye, Refractive Consequences of Eye Pathology, Diagnosis and Treatment of Dry Eye, Diagnosis of Pathology of the Anterior Segment, Diagnosis of Glaucoma, and Diagnosis of Pathology of the Posterior Segment. Visual Acuity chapter expanded to include the effect of refractive error on visual acuity and statistics on how much of a change in visual acuity is significant. Objective Refraction, Corneal Topography, and Visual Field Analysis chapters include the addition of new electro-optical and computer techniques and equipment. Chapters on Multifocal Spectacle Lenses and Contact Lenses now cover newer progressive addition lenses and contact lenses that are now on the market. Electrodiagnosis chapter revised to take a more clinical approach.

**Neural Information Processing** Biao Luo, Long Cheng, Zheng-Guang Wu, Hongyi Li, Chaojie Li, 2023-11-26 The nine-volume set constitutes the refereed proceedings of the 30th International Conference on Neural Information Processing, ICONIP 2023, held in Changsha, China, in November 2023. The 1274 papers presented in the proceedings set were carefully reviewed and selected from 652 submissions. The ICONIP conference aims to provide a leading international forum for researchers, scientists, and industry professionals who are working in neuroscience, neural networks, deep learning, and related fields to share their new ideas, progress, and achievements.

**Beyond Extreme Close-Up Photography** Julian Cremona, 2018-09-23 Extreme macrophotography opens up a new world for photographers, particularly biologists. By photographing subjects way beyond just life size magnifications, this book takes you a step closer to the very cells that make up organisms. Written with clarity and detail, Julian Cremona's book is the perfect guide and sister title to Extreme Close-Up Photography and Focus Stacking. His enthusiasm for and knowledge of his subject makes this book an essential companion for everyone interested in photography and discovering the minutiae of the natural world. Advises on equipment and on low-cost and DIY photography solutions. Explains how to use a microscope and its potential for photographers. Instructs how to light, support and prepare a subject for best results. Covers focus stacking: how to produce composite images with incredible depth of field. Encourages experimentation and suggests ways to develop extreme close-up ideas. A superb guide to taking stunning, detailed photographs at x5 to x30 magnification and more. Captures nature as rarely seen before. Will be of great interest to photographers, biologists, naturalists, scientists and natural historians. A natural companion title to Extreme Close-Up Photography and Focus Stacking.

**Ageing Studies and Lifetime Extension of Materials** Les Mallinson, 2012-12-06 The first International Conference on Ageing Studies and Lifetime Extension of Materials was held on the July 12-14, 1999 at St. Catherine's College, Oxford, United Kingdom. Over 230 delegates attended during the three days and heard nearly ninety papers, together with over thirty poster presentations. Sixteen of these papers were keynotes from invited speakers eminent in their field of research. The proceedings were organised into six separate sessions: observation and understanding of real-time and accelerated ageing; experimental techniques; modelling and theoretical studies; lifetime prediction and validation; lifetime extension; and material design for ageing. In doing this, it was hoped to cover most issues of scientific concern in the field of materials ageing. One important aspect was that the conference did not concentrate on any

particular group or type of material; rather the aim was to attract contributions from workers engaged in ageing studies with as wide a range of materials as possible. In this way, it was hoped that delegates could interact with and learn from those whom they perhaps would not normally come across and that metallurgists could learn from polymer scientists, ceramicists could talk to modellers, and so on, in this important field. A read through the diverse papers contained within these proceedings will confirm that this aim was happily satisfied. Why hold such a meeting? In the modern world, engineered systems are expected to last longer.
