**A Tower of Giraffes** Anna Wright,2015-11-03 A drove of pigs, a romp of otters, an ostentation of peacocks, and a tower of giraffes. . . . This clever book introduces young readers to some of the words we use to refer to animals in a group. The ink, watercolor, and fabric collage art is brightly colored and uniquely sets this fun book apart from the crowd. Each page presents information about an animal and its group behavior, such as how geese fly in a V-shape and honk to encourage the leaders, and that sometimes tens of thousand of flamingos meet up in one location. Young readers will have a great time and create a wellspring of new vocabulary words.

**A Tower of Giraffes** Anna Wright,2015-06-04 A tower of giraffes, a drove of pigs, a romp of otters. The names of the animal groups portrayed here are as intriguing as the illustrations: a sophisticated yet-accessible, fun and very recognisable mix of pen and ink, watercolour and fabric collage. Anna Wright's unusual pictures reveal the character behind the familiar and humorously shown animals.

**Images Of Animals** Eileen Crist,2010-06-02 A fascinating exploration of the language we use for animal behavior.

**Touch-and-Feel Tower Animals** Patricia Hegarty,2019-09-03 Take a trip through the jungle with a tiger, an elephant, and more busy animals in this quirky touch-and-feel book. Explore the jungle with a group of happy, noisy animals! Meet a snake slithering along the ground, a hungry crocodile looking for lunch, a giggling monkey

swinging through the trees, and an elephant playing at the watering hole. Each spread features a die-cut, touch-and-feel element that is positioned vertically and is visible on the cover and throughout the book. As the pages are turned the touch-and-feel elements are visible on the left hand page and the right hand page in this cleverly designed book!

*The Wildlife Techniques Manual* Nova J. Silvy, 2020-07-28 The #1 selling wildlife management book for 40 years, now updated for the next generation of professionals and students. Since its original publication in 1960, The Wildlife Techniques Manual has remained the cornerstone text for the professional wildlife biologist. Now fully revised and updated, this eighth edition promises to be the most comprehensive resource on wildlife biology, conservation, and management for years to come. Superbly edited by Nova J. Silvy and published in association with The Wildlife Society, the 50 authoritative chapters included in this work provide a full synthesis of methods used in the field and laboratory. Chapter authors, all leading wildlife professionals, explain and critique traditional and new methodologies and offer thorough discussions of a wide range of relevant topics. To effectively incorporate the explosion of new information in the wildlife profession, this latest edition is logically organized into a 2-volume set: Volume 1 is devoted to research techniques and Volume 2 focuses on pragmatic management methodologies. Volume 1 describes research design and proper analytic methods prior

to conducting research, as well as methods and considerations for capturing and handling wild animals and information on identification and marking of captured animals. It also includes new chapters on nutritional research and field sign identification, and on emerging topics, including structured decision-making. Finally, Volume 1 addresses measurements of wildlife abundance and habitat and research on individual animals. Volume 2 begins with a section on the relationship between research and management including public outreach, described in a context that encourages engagement prior to initiation of management. An adaptive management approach is described as a cornerstone of natural resource management, followed by a section on managing landscapes and wildlife populations. The volume also includes new chapters on ethics in wildlife science and conservation, conflict resolution and management, and land reclamation. A standard text in a variety of courses, the Techniques Manual, as it is commonly called, covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages. This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource, one that professionals and students in wildlife biology, conservation, and management simply cannot do without.

Anne and Her Tower of Giraffes Karlin

Gray, 2022-09-06 The remarkable true story of the world's first giraffologist: Dr. Anne Innis Dagg. Anne was three years old when she first laid eyes on a giraffe. As her blue eyes gazed into the giraffe's big brown eyes at the zoo, she was mesmerized. She longed to learn more about the graceful creatures. But time and again, from preschool to graduate school, there was no scientific information to be found. Finally, Anne decided she would have to teach herself. So, she traveled to South Africa alone – and shocked everyone by studying giraffes in the wild! It's a tall order to follow in the footsteps of this pioneer. But kids will be inspired to try!

**Political Animals** Jesse Donahue, Erik Trump, 2007 Political Animals offers a unique study and perspective on the relationship between politics and the art found in American zoos and aquariums.

Jesse Donahue and Erik Trump examine the ways that zoos and aquariums have successfully served as sculptural gardens for the masses and have incorporated art and architecture that convey political messages about both the patrons and the animals. This book demonstrates how art has been used for a range of economic and political purposes including providing jobs, a medium to reach out to minority interest groups, a fundraising tool, and a surrogate for the animals themselves. Donahue and Trump skillfully analyze and compare zoos to other areas of public art to highlight the calculated strategies on the part of the zoos that have incorporated a range of artistic styles for different audiences. Incorporating photographs of zoo and aquarium art from around the country, *Political Animals* is an exciting and captivating text for the mind and eye.
