**A Methodology for Developing Multimodal User Interfaces of Information Systems** Adrian Stanculescu, 2008 The Graphical User Interface (GUI), as the most prevailing type of User Interface (UI) in today's interactive applications, restricts the interaction with a computer to the visual modality and is therefore not suited for some users (e.g., with limited literacy or typing skills), in some circumstances (e.g., while moving around, with their hands or eyes busy) or when the environment is constrained (e.g., the keyboard and the mouse are not available). In order to go beyond the GUI constraints, the Multimodal (MM) UIs appear as paradigm that provide users with great expressive power, naturalness and flexibility. In this thesis we argue that developing MM UIs combining graphical and vocal modalities is an activity that could benefit from the application of a methodology which is composed of: a set of models, a method manipulating these models and the tools implementing the method. Therefore, we define a design space-based method that is supported by model-to-model colored transformations in order to obtain MM UIs of information systems. The design space is composed of explicitly defined design options that clarify the development process in a structured way in order to require less design effort. The feasibility of the methodology is demonstrated through three case studies with different levels of complexity and coverage. In addition, an empirical study is conducted with end-users in order to measure the relative usability level provided by different design decisions.

Direct Response to the Commission on Race and Ethnic Disparities Report. David Gomadza,2021-04-08 The biggest Mystery! But how come in the 21st century a government or authority or even institutions can be regarded as practising structural or institutional racism with all these rights groups and laws? People are saying there is no racism while some are adamant that racism exists because the byproducts are exactly those that result from structural or institutional racist structures. So, is there something that exists that people can't pinpoint, but what is causing all this? This is the billion-dollar question. What are we missing? Is there something else that is going on that is creating the same effects that people especially young generations born here are complaining about? OK, first what is similar to racism, or what can yield the same effects as racism?

Two Zebras Human Anatomy in the Age of Wikipedia Ze'ev Silverman,2019-08-01 Seriously. Look in any large commercial bookstore—you'll be shocked by the sheer number of books written on the subject. Especially bookstores associated with a university, and even more so, universities with a medical school. You'll find Anatomy textbooks, many of them hefty tomes and others, slimmer, distilled, even pocket volumes. Also Anatomy atlases, some of these of the classic, masterfully hand-drawn kind and others, the increasingly popular slick photograph and illustration variety; and Anatomy dissection guides; and an Anatomy coloring book or two. Elsewhere, there are likely Anatomy-themed novels, and more. So what, other than hubris or a tragically delayed middle-age crisis would drive me to now add yet another Anatomy book to this hopelessly cluttered pile? The only answer I have to this obvious but no-less-worthy-for-being-so question is "None of those others are like mine." For one thing, there is the small matter of my three decades spent studying, organizing, drawing, explaining, encouraging, haranguing med students on three continents on all matters anatomical.
