Creating Back Scenes for Model Railways and Dioramas David Wright, 2017-03-31 A model railway layout is greatly enhanced by a good back scene - if a modeller is prepared to go to great lengths to achieve realism in the locomotives, rolling stock and buildings, this should be carried through to the scenics. This book is a comprehensive guide for both railway and diorama modellers to create convincing back scenes. It covers choosing the right materials; rural and urban back scenes; traditional painted back scenes; producing back scenes with camera and/or computer; the correct use of forced perspective and scale reduction; getting the transition from layout to back scene right and, finally, lighting and presentation. Aimed at all modellers, especially but not exclusively railway modellers, and superbly illustrated with over 300 colour photographs and diagrams.

How to Build Realistic Model Railroad Scenery Dave Frary, 2005 Featuring today's newest products and equipment, this photo-packed guide features contemporary images of diesel locomotives and urban settings, plus updates to Dave's trademark scenery recipes. Includes new chapters on Western scenery and desert modeling, and city scenery and urban settings.

Build Big & Small Industries for Your Model Railroad, 2019-05-01 Build Big and Small Industries for Your Model Railroad provides hands-on modeling tips and techniques, step-by-step photos, and how-to advice for adding a variety of industries to a layout. This book features 17 projects in all dating back to the steam era to present day - ranging from simple to complex and large to small. Beginners will learn how to build a kit and integrate it to a scene, while more experienced modelers will learn how to kitbash and scratchbuild a structure and add it to a complete industry. Written by top experts in the field, including Pelle Soeborg, Gerry Leone, and Tony Koester, this wide-ranging book features the following industries: Cement plant. Cold storage warehouse. Local oil dealer. Asphalt transfer terminal. Brewery complex. Propane bulk dealer. Old-time factory. And more! Build Big and Small Industries for Your Model Railroad is the ideal book for all modelers who are looking for ways to add industries to their layouts!

Modelling Historic Buildings and Imaginary Structures David Wright, 2021-01-25 This book demonstrates the many different modelling techniques used in the creation of realistic historical buildings and convincing imaginary or fantasy structures. Aimed at the railway and diorama modeller, it includes photographs of existing structures, detailed illustrations and plans, followed by step-by-step photographs of the various stages in their creation; practical tips and constructive advice are provided alongside. Special emphasis has been placed on the use of scrap and low-cost materials. It gives guidance on modelling imaginary buildings and structures, with an example project presented from start to finish and also a complete fantasy-based model railway diorama, from concept and design through to the completed layout is covered. The author has written this book to inspire the modeller to try something innovative, and to attract new entrants to this creative hobby. Drawing on his own experience, he shares practical guidance to help the reader to produce models they will be proud of.

Constructing Buildings for Model Railways David Ashwood, 2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini movie set, construct a major London terminus and patch repair what could

be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.

Building City Scenery for Your Model Railroad John Pryke, 2000 Build a model railroad metropolis with tips and techniques on city planning, detailing structures, adding lights, signs, people and vehicles, in-street running, and much more.

Creating the Rural Scene David Wright, 2018-11-26 Packed with practical tips and advice this informative book explains the various techniques and materials that will help any modeller produce convincing models of the rural scene. It examines the history and development of the countryside, villages and infrastructure and covers rural industries. It demonstrates techniques for modelling farm buildings, machinery, vehicles and livestock and gives practical advice on modelling windmills and watermills. There are a selection of scenic projects included with step-by-step guidance and reference photographs. The book presents a total modelling project showing how to make a three dimensional model inspired by John Constable's The Hay Wain. Examines the history and development of the countryside, villages and infrastructure. An essential reference for anyone who wants to create a realistic representation of the rural scene using low-cost materials. Will be of great interest to railway modellers and those who make dioramas including military modellers. Superbly illustrated with 333 colour photographs that will help any modeller produce convincing models of the rural scene.

Creating a Military Modelling Diorama Terry Booker, 2021-07-26 Creating a diorama offers modellers a chance to display their figures and vehicles in a realistic setting, often providing a 'snapshot' of a moment in history. This book provides step-by-step instructions on how to plan, design and build a diorama and is suitable for new and more experienced modellers. With over 270 colour photographs, it considers all scales from 1/87 (H0) to 1/32 and their implications for the diorama builder. The importance of research to ensure historical accuracy is emphasized. Advice is given on the creation of dioramas in different scales and sizes. It demonstrates the techniques required to achieve effective results for landscapes, terrain and vegetation. Finally, examples are included from the Napoleonic Wars, American Civil War, World War I and World War II.

Model-making David Neat, 2013-12-21 Model-making: Materials and Methods focuses primarily on the wide variety of materials that can be employed to make models; those which have been favoured for a while and those which are relatively new. The book looks at how these materials behave and how to get the best out of them, then illustrates a range of relatively simple methods of building, shaping, modelling, surfacing and painting with them. Useful features of the book include: the different uses of models in various disciplines; the sequence of making; planning and construction, creating surfaces, painting and finishing; methods of casting, modelling and working with metals; step-by-step accounts of the making of specially selected examples; simple techniques without the need for expensive tools or workshop facilities; a 'Directory' of a full range of materials, together with an extensive list of suppliers. This book is intended for students of theatre production, art &

architecture, animation and theatre/television set designers where accurate scale models are necessary, and is also of interest to anyone involved with the process of making forms in 3D and the challenge of making small-scale forms in general. Superbly illustrated with 185 colour photographs.
