Creating Back Scenes for Model Railways and Dioramas David Wright,2017-03-31 A model railway layout is greatly enhanced by a good back scene - if a modeller is prepared to go to great lengths to achieve realism in the locomotives, rolling stock and buildings, this should be carried through to the scenics. This book is a comprehensive guide for both railway and diorama modellers to create convincing back scenes. It covers choosing the right materials; rural and urban back scenes; traditional painted back scenes; producing back scenes with camera and/or computer; the correct use of forced perspective and scale reduction; getting the transition from layout to back scene right and, finally, lighting and presentation. Aimed at all modellers, especially but not exclusively railway modellers, and superbly illustrated with over 300 colour photographs and diagrams.

Constructing Buildings for Model Railways David Ashwood,2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini movie set, construct a major London terminus and patch repair what could be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.

Modelling Historic Buildings and Imaginary Structures David Wright,2021-01-25 This book demonstrates the many different modelling techniques used in the creation of realistic historical buildings and convincing imaginary or fantasy structures. Aimed at the railway and diorama modeller, it includes photographs of existing structures, detailed illustrations and plans, followed by step-by-step photographs of the various stages in their creation; practical tips and constructive advice are provided alongside. Special emphasis has been placed on the use of scrap and low-cost materials. It gives guidance on modelling imaginary buildings and structures, with an example project presented from start to finish and also a complete fantasy-based model railway diorama, from concept and design through to the completed layout is covered. The author has written this book to inspire the modeller to try something innovative, and to attract new entrants to this creative hobby. Drawing on his own experience, he shares practical guidance to help the reader to produce models they will be proud of.

This book provides step-by-step instructions on how to plan, design and build a diorama and is suitable for new and more experienced modellers. With over 270 colour photographs, it considers all scales from 1/87 (H0) to 1/32 and their implications for the diorama builder. The importance of research to ensure historical accuracy is emphasized. Advice is given on the creation of dioramas in different scales and sizes. It demonstrates the techniques required to achieve effective results for landscapes, terrain and vegetation. Finally, examples are included from the Napoleonic Wars, American Civil War, World War I and World War II.

Shelf Layouts for Model Railroads Iain Rice,2009 Includes specific pointers on shelf layouts. Uses examples for N scale, H0 scale, and ON30 scale trains. Covers a variety of scales, modeling eras, and room applications.

The Nutshell Studies of Unexplained Death Corinne May Botz, 2004-09-28 The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.
