Fokker Dr. I Tomasz J. Kowalski,Marek Rys,2012-01-01 Illustrated color reference guide to the Fokker Dr. IThe Fokker Dr. I was built by Fokker-Flugzeugwerke in 1917 and saw service during World War I. Manfred Von Richthofen, better known as the the Red Baron, is perhaps the most widely recognized Fokker pilot, gaining his final 19 victories in the aircraft before his death in April 1918.This new title in the Legends of Aviation series comes complete with numerous photographs, 3D images and profiles of the World War I fighter aircraft.

*Fokker Dr. 1* Mark C. Wilkins,2020-06-28 This book presents the evolution and development of perhaps the most iconic German fighter of WWI--the Fokker Dr. 1 triplane or Dreidecker. The Dr. 1 was born from experiments in cantilever monoplanes and the excellent combat record of the Sopwith triplane, which appeared at the western front at the end of 1916. Only 320 Fokker Dr.1s were built, yet their imprint on aviation history was and is far reaching and enduring--perhaps due to those who flew them. Baron Manfred von Richthofen and his brother Lothar, as well as Werner Voss, Ernst Udet, and many others, all flew the triplane, helping burnish their image in collective memory. This book highlights the design and construction of the legendary Dr. 1, as well as showcasing many flying replicas and where they can be found. Also included are selected museums from around the world where Dr. 1s can currently be seen.

**Fokker Dr. 1 in Action** Heinz J. Nowarra,1989-01-01 Beskriver det fra 1. verdenskrig kendte, tyske kampfly Fokker Dr. I. Det var med denne flytype, at Manfred von Richthofen (Den røde baron) vandt sine mange luftkampdueller.

The Fokker Dr.1 & D VII in World War I Heinz J. Nowarra,1991 These early fighters used by Germany are considered by many to be the best of World War I.

Fokker D.VII Tomasz J. Kowalski,Szymon Grzwocz,Damiam Majsak,2018-02 World War I was the time of dynamic development of aviation. Aircraft created during that period and pilots who fought in them, became legends that have fascinated generations of pilots and aviation enthusiasts. Legends of Aviation in 3D is a publishing series with a goal to present legendary aircraft from the pioneer era of military aviation in an innovative way. Thanks to color 3D renderings we can almost touch the Fokker D.VII, see its details, get to know its meticulous airframe structure and understand the phenomenon of this legendary aircraft. With the virtual Fokker D.VII, Marek Rys' inspires us to explore the history of the aircraft afresh. The modern 3D images impressively harmonize with the old photographs. Tomasz Kowalski tells us the story of pilots flying the new Fokker biplanes and takes us to the dark and romantic period of the Great War when knights of the sky were born and killed. We are convinced that Tomasz Kowalski and Marek Rys's publication is a valuable addition to literature concerning the legendary Fokker D.VII and simultaneously a successful and exceptional attempt to present the earliest history of aviation in an original way. We have made all efforts to make the layout and quality of the series fulfill the needs of our readers.

**Fokker D.XXI Aces of World War 2** Kari Stenman,Peter de Jong,2013-04-20 The Dutch D.XXIs saw less than a week of action following the German invasion of the west on 10 May 1940, with many of the country's 28 fighters being destroyed on the ground. However, those that survived the initial onslaught inflicted losses on the Luftwaffe. By then, however, the D.XXI had found everlasting fame in Finland during the Winter War of 1939-40. Proving itself a real thorn in the side of the Soviets, the fighter, operating in primitive conditions and against vastly superior numbers, Finnish D.XXIs racked up an incredible score against the Red Air Force. The D.XXI also has the distinction of producing the first 'ace in a single mission' in World War 2, when then 1Lt Jorma Sarvanto shot down six Ilyushin DB-3 bombers on 6 January 1940. After spending a year providing home defence and flying coastal patrols during the early stages of the Continuation War in 1941, all surviving Finnish Fokker D.XXIs were relegated to the reconnaissance role, which they performed through to the end of hostilities in September 1944.

**Fokker DR.1 Triplane** Jarrod Cotter,2017-08-11 Undoubtedly the most famous Dr.1 pilot was Baron Manfred von Richtofen. Widely known as the “Red Baron”, von Richtofen was officially credited with 80 kills, 19 of them while flying a Dr.1. Richtofen became commander of the fighter squadron Jasta 11 in January 1917, where he flew the Albatross D.II and D.III. When he became a squadron commander, Richthofen took the flamboyant step of having his Albatros painted red. That would go on to be his iconic, red-painted aircraft, although not all of them were entirely red, nor was the “red” necessarily the brilliant scarlet that legend would suggest. Other pilots in Jasta 11 soon took to painting parts of their aircraft red, and their “official” was to make their leader less conspicuous, and to avoid him being singled out in a fight. In practice, red coloration became a unit identification. Richtofen continued to use red aircraft when he began to fly the Dr.1, hence the iconic “Red Baron” Fokker Triplane.

*Fokker D VII Aces of World War 1* Norman Franks,Greg VanWyngarden,2003-03-25 Designed in a great rush at the end of 1917 just in time to take part in the German standard fighter competition held in January/February 1918, the D VII easily walked away with first prize. As Germanys premier fighter unit, von Richthofens JG I (led by Hermann Göring in the wake of the 'Red Baron's' recent death) received the first examples of the D VII to reach the frontline in late April. Built to oppose the new generation of French SPAD XIIIs and British SE 5as and Camel fighters, the D VII was arguably the best all-round fighting scout of the Great War.
