The average is somewhere between four and fifteen years! and more... This is a book series inspired by kids for kids! Kids learn about new and interesting facts so that a combination of both the curious and the new materials and facts together with the visual aspect of the pictures. Children are entertained with the coolness factor of the discovery book plus they learn some new and a little bit harder to retain facts simultaneously with the cool stuff and this is how the child is going to retain all of the information. The discovery books work in synchronization with the brain and not against the brain like some dull textbooks try to teach things. It is a fact that kids just love these discovery picture books about weird animals and weird stuff that the animals are doing because they love the coolness and grooviness factor of the books. Parents are super satisfied because their children show interest for things on a higher level of interest as usual. The discovery concept of this frog book, for example, transforms a little bit drier information and facts into brain-friendly information that the child will retain & that the child will be able to use as active information later on. This discovery book is brain-friendly and works in synchronization with your child's brain, not against it. If your child asks lots of questions you actually have the proof that providing discovery books to your child actually works because children who discover with their own senses and in an active and interactive way are able to develop intelligence on a much higher level than children who are not asking any questions and who are passively sitting in front of a TV all day long. Stimulation of thought and contemplation increases intelligence and the brain power and TV kills the brain cells of your child. Parents & home-schoolers alike are reporting unprecedented results from using her books as learning materials & they get results even with children who usually hate reading books & have to learn dry information.

Hi-- It's us, Ms. Graham's class. We didn't mean to mess things up. But we did. We took things too far, and now Ms. Graham is in trouble--for something we did. We made a mistake. The question is, can we fix it? Ms. Graham taught us that we get to choose the kind of people we want to be and that a single act can create ripples. So get ready, world--we're about to make some ripples. Sincerely, Kayley, Kai, Henry, Aviva, Cecilia, Blake, Sharon, Emily (and Kermit, class frog) Everyone makes mistakes. But what happens when your mistake hurts someone else? Told in eight perspectives--including one in graphic novel form, Operation Frog Effect celebrates standing up and standing together, and tells the unforgettable story of how eight very different kids take responsibility for their actions and unite for a cause they all believe in.
