Muscatine's Pearl Button Industry Melanie K. Alexander, 2007 The Mississippi River town of Muscatine produced billions of pearl buttons. By 1905, Muscatine made 37 percent of the world's buttons and earned the title of Pearl Button Capital of the World. The rise and fall of the pearl button occurred over a period of 75 years. John Frederick Boepple, a German immigrant button maker, launched the industry in 1891. The button and clamming industries started small but quickly overwhelmed the town. Clamming became the Mississippi River's gold rush while large automated factories and shell-cutting shops employed nearly half the local workforce. Entire families--men, women, and children--contributed to the industry, giving weight to the popular local saying No Muscatine resident can enter Heaven without evidence of previous servitude in the button industry. Although the industry peaked in 1916, several decades passed before the American-made pearl button buckled under the pressure of foreign competition, changing fashion, limited availability of shell, and the development and refinement of plastic buttons.

Elections in Asia and the Pacific: A Data Handbook Dieter Nohlen, Florian Grotz, Christof Hartmann, 2001-11-15 This two-volume work continues the series of election data handbooks published by OUP. It presents a first-ever compendium of electoral data for all the 62 states in Asia, Australia and Oceania from their independence to the present. Following the overall structure of the series, an initial comparative introduction on elections and electoral systems is followed by chapters on each state in the region. Written by knowledgeable and renowned scholars, the contributions examine the evolution of institutional and electoral arrangements, and provide systematic surveys of the up-to-date electoral provisions and their historical development. Exhaustive statistics on national elections and referendums are given in each chapter. Together with the other books of this series, *Elections in Asia and the Pacific* is a highly reliable resource for historical and cross-national comparisons of elections and electoral systems world-wide. The first volume of *Elections in Asia and the Pacific* includes a total of 32 independent states situated in the three 'western' regions of the Asian continent: the countries of the Middle East (including Turkey); the post-Soviet states of Central Asia and the Caucasus; and the countries situated in

South Asia (including Afghanistan and Myanmar).

Dealing with Death Oliver Nahm, 2017 Any sentence that begins 'All societies have' is either baseless or banal. Oliver Nahm sets out to disprove this statement, made by the renowned anthropologist Clifford Geertz. Analyzing the beliefs, myths, and legends of different religious groups surrounding death and dying, author Nahm shows that behind the façade of diversity there lie the same needs which are in turn met by similar solutions. With an interdisciplinary approach, Nahm uncovers important commonalities between diverse societies and demonstrates that such findings are neither baseless nor banal. Dissertation. Mennonite Farmers Royden Loewen, 2021-11-02 A comparative global history of Mennonites from the ground up. Winner of the Wallace K. Ferguson Prize by the Canadian Historical Association, Nominee of the Margaret McWilliams Award by the Manitoba Historical Society Mennonite farmers can be found in dozens of countries spanning five continents. In this comparative world-scale environmental history, Royden Loewen draws on a multi-year study of seven geographically distinctive Anabaptist communities around the world, focusing on Mennonite farmers in Bolivia, Canada, Indonesia, the Netherlands, Russia, the United States, and Zimbabwe. These farmers, who include Amish, Brethren in Christ, and Siberian Baptists, till the land in starkly distinctive climates. They absorb very disparate societal lessons while being shaped by particular faith outlooks, historical memory, and the natural environment. The book reveals the ways in which modern-day Mennonite farmers have adjusted to diverse temperatures, precipitation, soil types, and relative degrees of climate change. These farmers have faced broad global forces of modernization during the twentieth and early twenty-first centuries, from commodity markets and intrusive governments to technologies marked increasingly by the mechanical, chemical, and genetic. Based on more than 150 interviews and close textual analysis of memoirs, newspapers, and sermons, the narrative follows, among others, Zandile Nyandeni of Matopo as she hoes the spring-fed soils of Matabeleland's semi-arid savannah; Vladimir Friesen of Apollonovka, Siberia, who no longer heeds the dictates of industrial time of the Soviet-era state farm; and Abram Enns of Riva Palacio, Bolivia, who tells how he, a horse-and-buggy traditionalist, hired bulldozers to clear-cut a farm in the eastern lowland forests to grow soybeans, initially leading to dust bowl conditions. As Mennonites, Loewen writes, these farmers were raised with knowledge of the historic Anabaptist teachings on community, simplicity, and peace that stood alongside ideas on place

and sustainability. Nonetheless, conditioned by gender, class, ethnicity, race, and local values, they put their agricultural ideas into practice in remarkably diverse ways. *Mennonite Farmers* is a pioneering work that brings faith into conversation with the land in distinctive ways.

Signal and Image Multiresolution Analysis Abdeldjalil Ouahabi,2012-12-27 Multiresolution analysis using the wavelet transform hasreceived considerable attention in recent years by researchers invarious fields. It is a powerful tool for efficiently representingsignals and images at multiple levels of detail with many inherentadvantages, including compression, level-of-detail display,progressive transmission, level-of-detail editing, filtering,modeling, fractals and multifractals, etc. This book aims to provide a simple formalization and new clarity onmultiresolution analysis, rendering accessible obscure techniques,and merging, unifying or completing the technique with encoding,feature extraction, compressive sensing, multifractal analysis andtexture analysis. It is aimed at industrial engineers, medicalresearchers, university lab attendants, lecturer-researchers andresearchers from various specializations. It is also intended tocontribute to the studies of graduate students in engineering,particularly in the fields of medical imaging, intelligentinstrumentation, telecommunications, and signal and imageprocessing. Given the diversity of the problems posed and addressed, this bookpaves the way for the development of new research themes, such asbrain-computer interface (BCI), compressive sensing,functional magnetic resonance imaging (fMRI), tissuecharacterization (bones, skin, etc.) and the analysis of complexphenomena in general. Throughout the chapters, informativeillustrations assist the uninitiated reader in betterconceptualizing certain concepts, taking the form of numerousfigures and recent applications in biomedical engineering,communication, multimedia, finance, etc.

Davenport Rich Johnson,Mary Louise Speer,John Willard,2000 The city of Davenport traces its beginnings to an 1832 treaty signed by Chief Keokuk of the Sauk Indians, which transferred a fifty-mile strip of land along the Mississippi River from the Yellow River in the north to the Des Moines

River in the south. Over the past 168 years, the resultant city has evolved from a frontier outpost to a premier gateway to the West, a commercial powerhouse on a prime river location to a Midwestern banking and financial center. This pictorial history documents the transformation of the city through more than 200 vintage photographs. Davenport was a major entrance to the West, as well as a destination itself during the 19th century. Pioneer families and immigrants alike found a haven in the rapidly growing city, and they founded department stores, construction companies, breweries, banks, and churches. Germans, Irish, Swedes, Hungarians, and African Americans all brought cultural traditions and ideas that contributed to the flavor of the city. The Great Depression, two world wars, and the economy's conversion from agriculture to commerce also delineated the boundaries of Davenport as we know it today.

Hippolytos Euripides,2015-01-01 In Euripides' drama, Hippolytus angers Aphrodite, the goddess of love, so much by worshiping the hunting goddess Artemis that she makes his stepmother, Phaedra fall in love with him. Peter Roth presents a bilingual version of Hippolytus with a new prose translation. The extensive commentary requires no prior knowledge of Greek, providing information on factual issues and questions of interpretation. An extensive introduction deals with performance arrangements, the underlying myth, the language and metrics, and general questions of interpretation.

Dubuque John T. Tigges,James L. Shaffer,2000 Situated on the west bank of the Mississippi River, Dubuque, founded in 1833, is the oldest city in Iowa. The region was originally inhabited by the Mesquakie Indians. Early settler Julien Dubuque was granted permission by the Mesquakie to work substantial lead deposits south of the present city limits, and 20 years later, under the terms of settlement of the Blackhawk War, the area was incorporated and given his name. The tiny settlement quickly grew into a thriving river town, and Dubuque matured as an important shipping center for farm commodities and products of the lead mining industry. The mighty Mississippi River saw the growth of lumber mills on its banks, and fostered trade with surrounding communities. Railroads came to the Hawkeye State from the east in 1855, and rails soon snaked their way north and west along the river, further solidifying the city's reputation as a center of trade. Dubuque's inhabitants have also made it a city of firsts. It is home to the oldest college in the state, boasted the first printing press in the entire Northwest Territory, features the shortest and steepest railway in the world, and published

Iowa's first newspaper in 1836.
