Dwayne A. Day

The Corona Project Curtis Peebles,1997 In the early 1960s, when the United States and the Soviet Union faced each other in a nuclear standoff, a small band of engineers, designers, and intelligence officers secretly set out to do the impossible. Armed with little more than a few ideas and drawings of the payload, they created America's first reconnaissance satellite program - the Corona project - which for decades remained one of the nation's most closely guarded secrets. This is the story of their extraordinary efforts, from the first desperate requests for intelligence on the USSR, throuqh a series of heartbreaking failures, to Corona's ultimate success. This book focuses not only on the Corona project's great technical achievements but also on the remarkable human side of the story - on the engineers who built the satellites but could not divulge what they did even to their own families, and on the recovery pilots who competed to see who would be the first ace. Their stories appear for the first time in this book along with previously classified details of their recovery unit and a list of the ace pilots.

Eye in the Sky Dwayne Day,2015-05-26 Presenting the full story of the CORONA spy satellites' origins, Eye in the Sky explores the Cold War technology and far-reaching effects of the satellites on foreign policy and national security. Arguing that satellite reconnaissance was key to shaping the course of the Cold War, the book documents breakthroughs in intelligence gathering and achievements in space technology that rival the landing on the moon.

Spy Satellites Paul Kupperberg,2002-12-15 Examines the history, technology, and uses of spy satellites, looking especially at the various reconnaissance satellite programs of the United States, from the mid-twentieth century to the present.

Eye in the Sky Dwayne A. Day,1999-08-01 Presenting the full story of the Corona spy satellite program, Eye in the Sky documents not only one of the most important breakthroughs in twentieth-century intelligence gathering but also an achievement in space technology that rivals the landing on the moon.
