Drugs that fight this viral infection, which attacks the liver, have been approved but many people go untreated because they mistakenly believe their symptoms are caused by something as common as the flu. There is a timeline on the history of detection and treatment of the disease.

**Once by the Pacific** Sarah Koops Vanderveen,2012 Laguna Beach became famous as an artists' colony in the 1920s, infamous as a mecca for hippies and surfers in the 1960s, and it still attracts free spirits and seekers of beauty. Among those inspired by its light, landscape, and people is poet Sarah Koops Vanderveen. In *Once by the Pacific*, she captures the rhythms of real life in a much-mythologized place that is ultimately, in her words, quirky, lovely, and authentic. Includes work by world-renowned photographer John Van Hamersveld.

**Beyond the Century of the Child** Willem Koops,Michael Zuckerman,2012-10-30 In 1900, Ellen Key wrote the international bestseller *The Century of the Child*. In this enormously influential book, she proposed that the world's children should be the central work of society during the twentieth century. Although she never thought that her century of the child would become a reality, in fact it had much more resonance than she could have

imagined. The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time. For the past half century, the study of the child has been dominated by two towering figures, the psychologist Jean Piaget and the historian Philippe Ariès. Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century, and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child. Piaget proposed that children's logic and modes of thinking are entirely different from those of adults. In the twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation, abuse, and neglect. Recent students of childhood have challenged the ideas those titans promoted; they ask whether the distancing process has gone too far and has begun to reverse itself. In a series of essays, *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times, from America and Europe to China and Japan, bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults. Together these scholars address the question whether, a hundred years after Ellen Key wrote her international sensation, the century of the child has in fact come to an end.

**Cocktail Nation - The Definitive Guide to the Lounge Universe** Koop Kooper, Koop Kooper, the Cocktail universe's high priest of all things hep, swinging, and swank, and cyber disc-jockey of his radio show, *The Cocktail Nation*, has unleashed the definitive guide to the Lounge universe. Replete with gassin interviews and cool pixeramas, he reveals the incredible diorama of Cocktail culture, lifestyle, and music. Koop mixes it up with cool luminaries and pioneers of the Cocktail soundtrack, such as hepster Jack Constanzo, the bongo player of the 1950s, shakes a martini with the leaders of the revival Combustible Edison, trades smart lip with comedian satirist Shelley Berman and 21st century hit-makers Martini Kings, heads down the dark streets of Cocktail noir, muscling it up with croonoir Jimmy Vargas, then it's off to the Vegas pool, where he conducts an underwater interview with gorgeous fire-eating mermaid Marina. Koop Kooper's *Cocktail Nation* book is a glorious panorama of all things Lounge, created by the swank meister of uber cool himself.

**Parenting Musically** Lisa Huisman Koops, 2019-11-01 Parents use music in family life to accomplish practical tasks, make relational connections, and guide their children's musical development. *Parenting Musically* portrays the musicking of eight diverse Cleveland-area families in home, school, and community settings. Themes from interviews focused on the families' hopes and dreams for their children musically, as well as the families' perceptions of media messages regarding parents and music, serve to deepen the documentation of how families use and perceive music in their daily lives. Family musical interactions are analyzed using the concepts of musical parenting (actions to support a child's musical development) and parenting musically (using music to accomplish extra-musical parenting goals), arguing the importance of recognizing and valuing both modes. An additional construct, practical/relational musicking, adds to the detailed analysis of family musical engagement. Practical musicking refers to musicking for a practical purpose, such as learning a scale or passing the time in a car; relational musicking is musicking that deepens relationships with self, siblings, parents, or community members, such as a grandmother singing to her grandchildren via Facetime as a way to feel connected. Families who embraced both practical and relational musicking expressed satisfaction in long-term musical involvement. Weaving together themes of conscious and intuitive parenting, the rewards and struggles of musical practice, and the role of mutuality in community musicking, the discussion draws on research in music education, psychology, family studies, and sociology. This book serves to highlight the multi-faceted nature of families' engagement in music; the author urges music education practitioners and administrators to consider this diversity when approaching curricular decisions. Written in a style accessible to laypersons, this book will interest a wide range of music educators as well as families, community members, and scholars and

practitioners in family studies, psychology, and sociology.

**The Book with No Pictures** B. J. Novak,2014-09-30 A #1 New York Times bestseller, this innovative and wildly funny read-aloud by award-winning humorist/actor B.J. Novak will turn any reader into a comedian—a perfect gift for any special occasion! You might think a book with no pictures seems boring and serious. Except . . . here's how books work. Everything written on the page has to be said by the person reading it aloud. Even if the words say . . . BLORK. Or BLUURF. Even if the words are a preposterous song about eating ants for breakfast, or just a list of astonishingly goofy sounds like BLAGGITY BLAGGITY and GLIBBITY GLOBBITY. Cleverly irreverent and irresistibly silly, The Book with No Pictures is one that kids will beg to hear again and again. (And parents will be happy to oblige.)

**European Approaches to United Nations Peacekeeping** Joachim Alexander Koops,Giulia Tercovich,2017 This edited volume provides a comprehensive analysis of European approaches to United Nations peacekeeping by assessing past practice, present obstacles and future potentials related to nine core European countries' contributions to blue helmet operations. By providing in-depth case studies on Denmark, France, Germany, Ireland, Italy, Norway, Sweden, The Netherlands and the United Kingdom, this book offers an evaluation of European approaches as well as a wide range of facilitating and constraining factors related to the above mentioned countries' future involvement in UN peacekeeping. The book places particular emphasis on the recent involvement of European countries in the UN operation in Mali (MINUSMA) and explores to what extent this experience might lead to further marked increases of European supplies of troops and capabilities and thus a broader 'European return' to UN peacekeeping. Each chapter offers an up-to-date case study on key countries' policies, challenges and opportunities for a stronger re-engagement in UN Peacekeeping It provides a comprehensive analysis of the main challenges and concrete ways ahead for overcoming institutional, political, financial and military obstacles (both at European capitals and within the UN system) on the path towards a stronger re-engagement of European troop contributing countries in the field of UN Peacekeeping. Furthermore, each chapter includes a set of policy-relevant recommendations for future ways ahead. The chapters in this book were originally published in International Peacekeeping.

*Historical Developmental Psychology* Willem Koops,Frank Kessel,2020-05-21 This book explores and underlines the thesis that developmental psychology cannot function fruitfully without systematic historical scholarship. Scientific thinking not only depends on empirical-analytical research, but also requires self-reflection and critical thinking about the discipline's foundations and history. The relevance of history was made especially clear in the writings of William Kessen, who analyzed how both children and child development are shaped by the larger cultural forces of political maneuverings, practical economics, and implicit ideological commitments. As a corollary, he emphasized that the science of developmental psychology

itself is culturally and historically shaped in significant ways. Discussing the implications of these insights in the book's introduction, Koops and Kessel stress that we need a Historical Developmental Psychology. In the book's following chapters, historians of childhood – Mintz, Stearns, Lasseonde, Sandin, and Vicedo – demonstrate how conceptions of childhood vary across historical time and sociocultural space. These foundational variations are specified by these historians and by developmental psychologists – Harris and Keller – in the research domains of emotions, attachment, and parenting. This collection demonstrates the importance of bridging, both intellectually and institutionally, the gap between the research of historians, and both current and future research of developmental psychologists. This book was originally published as a special issue of the European Journal of Developmental Psychology.

*The Development and Structure of Conscience* Willem Koops, Daniel Brugman, Tamara J. Ferguson, Andries F. Sanders, 2009-10-16 This book focuses on the structure and development of conscience, a subject that has been dominant in developmental psychology since the 18th century. International experts in the field contribute to this broad overview of the relevant research on the development of moral emotions and on the Kohlbergian-originated cognitive aspects of moral development. The first section of the book focuses on the cultural conditions that create the context for the development of conscience, such as moral philosophy, religion, and media violence. Building on the theory and research on emotion, other chapters cover issues including the development of shame, self regulation and moral conduct, social cognition, and models of guilt. The book also covers moral reasoning, moral identity, moral atmosphere, moral behavior, and discusses subjects such as lying, how to measure moral development, the impact of parenting, the dysfunctions of conscience evident in narcissism, psychopathy, issues surrounding gender, and aggression. The Development and Structure of Conscience will be ideal reading for researchers and students of developmental and educational psychology.

**Cybercrime and Jurisdiction** Bert-Jaap Koops, Susan W. Brenner, 2011-08-27 Combating cybercrime requires law-enforcement expertise, manpower, legislation, and policy priorities within the ambit of crime-fighting. Because of the utterly transnational character of cybercrime, countries must focus on international investigation and prosecution. As cultural and legal traditions play a major part in countries' views on the exercise of criminal law and sovereignty, a unified approach to this phenomenon requires serious reflection. This book intends to contribute to a more concerted international effort towards effectively fighting cybercrime by offering an in-depth survey of views and practices in various jurisdictions. It includes chapters on the Council of Europe's Cybercrime Convention and on international co-operation in criminal matters. Thirteen country reports, written by experts in the field, are included in alphabetical order. The book concludes by discussing one of the most urgent steps that needs to be taken: resolving positive jurisdictional conflicts when several jurisdictions seek to prosecute a cybercriminal at the same time.

**Responsible Innovation 2** Bert-Jaap Koops, Ilse Oosterlaken, Henny Romijn, Tsjalling Swierstra, Jeroen van den Hoven, 2015-04-30 This book

discusses issues regarding conceptualization, governance and implementation of responsible innovation. It treats different approaches to making responsible innovation a reality and it contains new case studies that illustrate challenges and solutions. Research on Responsible Innovation is by its nature highly multidisciplinary, and also pro-active, design-oriented and policy-relevant. Until a few years back, the concept of Responsible Innovation was hardly used - nowadays it is increasingly receiving attention from both researchers and policy makers. This is indispensable reading for anyone interested in or working on innovation.

*Heavy Cruisers of the Admiral Hipper Class* Gerhard Koop, Klaus-Peter Schmolke, 2014-07-22 The warships of the World War II era German Navy are among the most popular subject in naval history with an almost uncountable number of books devoted to them. However, for a concise but authoritative summary of the design history and careers of the major surface ships it is difficult to beat a series of six volumes written by Gerhard Koop and illustrated by Klaus-Peter Schmolke. Each contains an account of the development of a particular class, a detailed description of the ships, with full technical details, and an outline of their service, heavily illustrated with plans, battle maps and a substantial collection of photographs. These have been out of print for ten years or more and are now much sought after by enthusiasts and collectors, so this new modestly priced reprint of the series will be widely welcomed. This volume covers the Admiral Hipper class, among the largest heavy cruisers to serve in World War II. Intended to be a class of five, they enjoyed contrasting fortunes: Seydlitz and Lützow were never completed; Blücher was the first major German warship sunk in action; Admiral Hipper became one of the most successful commerce raiders of the war; while the Prinz Eugen survived to be expended as a target in one of the first American nuclear tests in 1946.
