Scenery for Model Railroads, Dioramas & Miniatures Robert H. Schleicher, 1999

Cat and the Mouse and the Runaway Train Peter Bently, 2014-08-07 From the winner of the Roald Dahl Funny Prize comes a pacy rhyming adventure, perfect for any child who loves trains. When a naughty little mouse steals cheese from the station master, a battle between cat and mouse follows! But they put their differences aside when a big, red steam train comes tearing down the track straight towards them! Exquisitely illustrated, this cat and mouse chase is a truly memorable ride that will be good for many repeated trips. 'This is a book that children will really enjoy... It's a book that will give children's sense of adventure a boost up the bottom.' - Rhino Reads

***Mikoyan MiG-31: Famous Russian Aircraft* Yefim**

Gordon,Dmitriy Komissarov,2020 As early as 1965, when the MiG-25 interceptor was in the midst of its test program, the Mikoyan Design Bureau started work on an even more capable two-seat interceptor meant to provide adequate protection for the huge expanses of Siberia and the Soviet Far East. Though superficially resembling a MiG-25 with tandem cockpits, the aircraft was soon designated the MiG-31. Initially dubbed Super Foxbat in the West but soon renamed Foxhound, the MiG-31 first flew on 16 September 1975 and, after a five-year trials program, achieved

initial operational capability in 1980. Full-scale deliveries began in 1982 to units covering the Moscow Air Defense Zone, the Arctic and the Far East. One of the effects was that the SR-71s now stayed away from the Soviet borders. Efforts to improve the Foxhound began right away. In-flight refueling capability was added in 1989 to overcome the problem of inadequate range. Next, the MiG-31B, featuring upgraded avionics and better weapons, entered production in 1990; existing MiG-31s were brought up to the new standard (except for IFR capability) as the MiG-31BS. The radically improved 'Generation 4+' MiG-31M featuring a new WCS and new R-37 ultra-long-range AAMs first flew in 1985 but never entered production because of funding shortages. Today, the MiG-31s remains one of modern Russia's key air defense assets, and new versions keep appearing. The book gives the complete development and service history of this remarkable aircraft and is richly illustrated with color photos and color artwork throughout.

Flames Beyond Gettysburg Scott L. Mingus, 2011 The Gettysburg Campaign has been examined in detail from nearly every aspect but one: the key role played by Richard Ewell's Second Corps during the final days in June. This is the first in-depth study of these crucial summer days that not only shaped the

course of the Gettysburg Campaign, but altered the course of our nation's history.
