The photographs in this sixteen-month calendar showcase greats from Ferrari, McLaren, Williams, Lotus, Brabham, and Mercedes, portraying not just the vehicles' engineering and technological brilliance but also their inherent beauty—the captivating result of Formula 1's mix of competition, creativity, and technical ingenuity that makes these racers works of mechanical art. With a convenient page that shows the months of September, October, November, and December 2021, followed by individual pages for the months of 2022, keep yourself on track throughout the year while enjoying Formula 1's most captivating and successful race cars from the 1950s to today.

The Picture World of Racing Cars C. J. Norman, 1989 Surveys different types of race cars, the skills needed to drive Grand prix cars, and the challenges of driving on the race car circuit.

Race Cars H. R. Sheffer, 1982 A brief history of automobile racing, highlighting different types of racing cars used over the years.

Racing and Collecting Slot Cars Robert H. Schleicher, Covers slot racing cars and tracks, how to duplicate real race tracks in scale, troubleshooting and performing maintenance on slot cars, racing terms, and how to organize a race event.

Richard Petty Tim Bongard, Robert Coulter, 2000-08 What were the first cars Richard Petty drove? Was his number always 43? When did he start painting the cars Petty Blue? How did Petty Enterprises end up with Pontiac? The list goes on and on. The more the authors researched, the more they realized that large portions of the King's career are obscure, a mystery to the legions of stock car racing fans and modelers who have discovered the sport in recent years. All this information and more is included for the die-hard race fan or modeler.

Inside IMSA's Legendary GTP Race Cars J. A. Martin, Michael J. Fuller, Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical "parity"? This was what the International Motor Sports Association's (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them, Inside IMSA's Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.

The Art of the Formula 1 Race Car 2024, 2023-08-15 This 16-month calendar, highlights 13 of the most exciting F1 race cars from 70-plus years of competition, captured in the studio portraits of master automotive photographer James Mann. The photographs in *The Art of the Formula 1 Race Car 2024* showcase greats such as Ferrari, McLaren, Williams, Lotus, Brabham, Mercedes, and more, portraying the vehicles' engineering and technological brilliance and also their inherent beauty—the captivating result of Formula 1's mix of competition, creativity, and technical ingenuity that makes these racers works of mechanical art. This 12 × 12 wall calendar includes a convenient opening page showing the months of September, October, November, and December 2023, followed by individual pages for the months of 2024. Keep yourself on track throughout the year while enjoying Formula 1's most intriguing and successful race cars from the 1950s to today.

Dirt Track Auto Racing, 1919-1941 Don Radbruch, 2003-12-11 Prior to World War I, auto racing featured expensive machines and teams financed by auto factories. The teams toured the country, and most of the races were held in large cities, so the vast majority of Americans never saw a race. All this changed after World War I, though, and in the 1920s and 1930s there were approximately 1,000 dirt tracks in the United States and Canada. The dirt tracks offered small-time racing—little prize money and minimal publicity—but people loved it. This pictorial history documents dirt track racing, with what are today called sprint cars, around the United States from 1919 to 1941. Information on dirt track racing in Canada during this time is also provided. Regionally divided chapters detail the drivers, tracks, and specific races of each area of the country. Some of the drivers went on to win fame and fortune while others faded into obscurity. Tracks included well known facilities as well as out-of-the-way sites few people had ever heard of. The cars ranged from state of the art machines to the more common home built specials based on Model T or Model A Ford parts. Taken together, the drivers, tracks, and races of this era were instrumental in making auto racing the popular sport it is today.

Legendary Race Cars Basem Wasef, 2009-10-09 Illustrated profiles of the greatest motorsports pairings of man and machine, from the winner of the first Indy 500 race to the Audi R10 that dominated Le Mans for nearly a decade.

Indy Race Cars Janet Piehl, 2007-01-01 Describes Indy race cars and traces the history of the Indianapolis 500 race.

Inside IMSA's Legendary GTP Race Cars James A. Martin, Michael J. Fuller, 2008-04-15 Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched—in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical “parity”? For over 100 years, the Indy cars and their drivers have drawn hundreds of thousands of spectators to Speedway, Indiana, with another 6 million people watching the race on television or by live stream.
