Making the Modern World Vaclav Smil,2013-12-16 How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in *Making the Modern World: Materials and Dematerialization*. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. *Making the Modern World: Materials and Dematerialization* considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production as well as their dominant applications. The evolving productivities of material extraction, processing, synthesis, finishing and distribution, and the energy costs and environmental impact of rising material consumption are examined in detail. The book concludes with an outlook for the future, discussing the prospects for dematerialization and potential constraints on materials. This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics, environmental studies, energy analysis, mineral geology, industrial organization, manufacturing and material science.

Marine Mammal Physiology Michael A. Castellini,Jo-Ann Mellish,2015-11-18 Suppose you were designing a marine mammal. What would you need to think about to allow it to live in the ocean? How would you keep it warm? What would you design to allow it to dive for very long periods to extreme depths? Where would it find water to drink? How would you minimize the cost of swimming, and how would it find its prey in the deep and dark? These questions and more are examined in detail throughout this book. *Marine Mammal Physiology: Requisites for Ocean Living* is the first textbook focused on how marine mammals live in the sea from a physiological point of view. It explores the essential aspects of what makes a marine mammal different from terrestrial mammals, beyond just their environment. Unlike many publications and books that cover these species from almost all perspectives, this textbook takes a step back to focus on the physiological and biochemical characteristics that have allowed these mammals as a group to exploit effectively the marine environment that is so hostile to humans. The chapter topics are grouped into major themes: diving and locomotion, nutrition and energetics, reproduction, sensory systems, and environmental interactions. Each chapter is arranged around a common perspective and theme: the big picture challenge and summary and what is known specifically by order. To aid you even further, the authors include a Toolbox section in each chapter where they discuss the newest methods for understanding and working on the physiology of marine mammals.

The Life and Death of a Minke Whale in the Amazon Fábio Zuker,2022-06-07 As the Amazon burns, Fábio Zuker shares stories of resistance, self-determination, and kinship with the land. In 2007, a seven-ton minke whale was found stranded on the banks of the Tapajós River, hundreds of miles into the Amazon rainforest. For days, environmentalists, journalists, and locals followed the lost whale, hoping to guide her back to the ocean, but ultimately proved unable to save her. Ten years later, journalist Fábio Zuker travels to the state of Pará, to the town known as “the place where the whale appeared,” which developers are now eyeing for mining, timber, and soybean cultivation. In these essays, Zuker shares intimate stories of life in the rainforest and its surrounding cities during an age of raging wildfires, mass migration, populist politics, and increasing

deforestation. As a group of Venezuelan migrants wait at a bus station in Manaus, looking for a place more stable than home, an elder in Alter do Chão becomes the first Indigenous person in Brazil to die from COVID-19 after years of fighting for the rights and recognition of the Borari people. The subjects Zucker interviews are often torn between ties with their ancestral territories and the push for capitalist gain; *The Life and Death of a Minke Whale* in the Amazon captures the friction between their worlds and the resilience of movements for autonomy, self-definition, and respect for the land that nourishes us.

How I Became a Famous Novelist Steve Hely, 2011 A razor - sharp evisceration of celebrity culture and literary fame, *How I Became a Famous Novelist* is a satirical novel masquerading as a tell - all memoir. Sick of life as he knows it, Pete Tarslaw sets out to write a bestselling novel, armed with a formula for success cobbled together from previous bestsellers: he abandons truth, relies heavily on lyrical prose, creates a club with a mysterious mission, includes a murder and invokes "confusing sadness" at the end. Once the sales rankings for his novel *The Tornado Ashes Club* start their meteoric rise - thanks to a Christian evangelist, a recovering teen starlet and *Law and Order: Criminal Intent* - Tarslaw's inevitable decline looms, and his fall from grace will be nothing short of spectacular. *How I Became a Famous Novelist* is the hilarious tale of how Pete Tarslaw's "pile of garbage" became the most talked about, read, admired and reviled novel in America. It will change everything you think you know - about literature, appearance, truth, beauty, and those people out there who still care about books.

Milk! Mark Kurlansky, 2018-05-08 Mark Kurlansky's first global food history since the bestselling *Cod and Salt*; the fascinating cultural, economic, and culinary story of milk and all things dairy--with recipes throughout. According to the Greek creation myth, we are so much spilt milk; a splatter of the goddess Hera's breast milk became our galaxy, the Milky Way. But while mother's milk may be the essence of nourishment, it is the milk of other mammals that humans have cultivated ever since the domestication of animals more than 10,000 years ago, originally as a source of cheese, yogurt, kefir, and all manner of edible innovations that rendered lactose digestible, and then, when genetic mutation made some of us lactose-tolerant, milk itself. Before the industrial revolution, it was common for families to keep dairy cows and produce their own milk. But during the nineteenth century mass production and urbanization made milk safety a leading issue of the day, with milk-borne illnesses a common cause of death. Pasteurization slowly became a legislative matter. And today milk is a test case in the most pressing issues in food politics, from industrial farming and animal rights to GMOs, the locavore movement, and advocates for raw milk, who controversially reject pasteurization. Profoundly intertwined with human civilization, milk has a compelling and a surprisingly global story to tell, and historian Mark Kurlansky is the perfect person to tell it. Tracing the liquid's diverse history from antiquity to the present, he details its curious and crucial role in cultural evolution, religion, nutrition, politics, and economics.

Flash Crash Liam Vaughan, 2021-02-04 On May 6, 2010, financial markets around the world tumbled simultaneously and without warning. In the span of five minutes, a trillion dollars of valuation was lost. The Flash Crash, as it became known, represented the fastest drop in market history. When share values rebounded less than half an hour later, experts around the globe were left perplexed. What had they just witnessed? Navinder Singh Sarao hardly seemed like a man who would shake the world's financial markets to their core. Raised in a working-class neighbourhood in West London, Nav was a preternaturally gifted trader who played the markets like a computer game. By the age of thirty, he had left behind London's trading arcades, working instead out of his childhood home. For years the money poured in. But when lightning-fast electronic traders infiltrated markets and started eating into his profits, Nav built a system of his own to fight back. It worked--until 2015, when the FBI arrived at his door. Depending on whom you ask, Sarao was a scourge, a symbol of a financial system run horribly amok, or a folk hero--an outsider who took on the tyranny of Wall Street and the high-frequency traders. A real-life financial thriller, *Flash Crash* uncovers the remarkable, behind-the-scenes narrative of a mystifying market crash, a globe-spanning investigation into international fraud, and the man at the centre of them both.

Pinocchio Carlo Collodi,1914 A wooden puppet full of tricks and mischief, with a talent for getting into and out of trouble, wants more than anything else to become a real boy.

How This Book Was Made Mac Barnett,2016-09-06 You may think you know how this book was made, but you don't. Sure, the author wrote many drafts, and the illustrator took a long time creating the art, but then what? How'd it get into your hands? Well, open the cover and read through these pages to find out. Just beware of the pirates and angry tiger. New York Times best-selling creators Mac Barnett and Adam Rex reveal the nitty gritty process of making a book . . . with a few unexpected twists along the way! Budding writers and artists will laugh at the mix of reality and the absurd as the story makes its way to a shelf, and a reader.

The Eye Book Theo. LeSieg,1999-09-28 Our eyes see flies. Our eyes see ants. Sometimes they see pink underpants. Oh, say can you see? Dr. Seuss's hilarious ode to eyes gives little ones a whole new appreciation for all the wonderful things to be seen!

The Mushroom at the End of the World Anna Lowenhaupt Tsing,2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Tomorrow, and Tomorrow, and Tomorrow Gabrielle Zevin,2022-07-05 NEW YORK TIMES BEST SELLER • Sam and Sadie—two college friends, often in love, but never lovers—become creative partners in a dazzling and intricately imagined world of video game design, where success brings them fame, joy, tragedy, duplicity, and, ultimately, a kind of immortality. It is a love story, but not one you have read before. Delightful and absorbing. —The New York Times • Utterly brilliant. —John Green One of the Best Books of the Year: The New York Times, Entertainment Weekly, TIME, GoodReads, Oprah Daily From the best-selling author of *The Storied Life of A. J. Fikry*: On a bitter-cold day, in the December of his junior year at Harvard, Sam Masur exits a subway car and sees, amid the hordes of people waiting on the platform, Sadie Green. He calls her name. For a moment, she pretends she hasn't heard him, but then, she turns, and a game begins: a legendary collaboration that will launch them to stardom. These friends, intimates since childhood, borrow money, beg favors, and, before even graduating college, they have created their first blockbuster, *Ichigo*. Overnight, the world is theirs. Not even twenty-five years old, Sam and Sadie are brilliant, successful, and rich, but these qualities won't protect them from their own creative ambitions or the betrayals of their hearts. Spanning thirty years, from Cambridge, Massachusetts, to Venice Beach, California, and lands in between and far beyond, Gabrielle Zevin's *Tomorrow, and Tomorrow, and*

Tomorrow examines the multifarious nature of identity, disability, failure, the redemptive possibilities in play, and above all, our need to connect: to be loved and to love.

A Wolf Called Wander Rosanne Parry, 2019-05-07 A New York Times bestseller! "Don't miss this dazzling tour de force."—Katherine Applegate, Newbery Medal winning author of *The One and Only Ivan* This gripping novel about survival and family is based on the real story of one wolf's incredible journey to find a safe place to call home. Illustrated throughout, this irresistible tale by award-winning author Rosanne Parry is for fans of Sara Pennypacker's *Pax* and Katherine Applegate's *The One and Only Ivan*. Swift, a young wolf cub, lives with his pack in the mountains learning to hunt, competing with his brothers and sisters for hierarchy, and watching over a new litter of cubs. Then a rival pack attacks, and Swift and his family scatter. Alone and scared, Swift must flee and find a new home. His journey takes him a remarkable one thousand miles across the Pacific Northwest. The trip is full of peril, and Swift encounters forest fires, hunters, highways, and hunger before he finds his new home. Inspired by the extraordinary true story of a wolf named OR-7 (or Journey), this irresistible tale of survival invites readers to experience and imagine what it would be like to be one of the most misunderstood animals on earth. This gripping and appealing novel about family, courage, loyalty, and the natural world is for fans of Fred Gipson's *Old Yeller* and Katherine Applegate's *Endling*. Includes black-and-white illustrations throughout and a map as well as information about the real wolf who inspired the novel. Plus don't miss Rosanne Parry's stand-alone companion novel, *A Whale of the Wild*.

Architects of Emortality Brian Stableford, 2000-05-15 Brian Stableford launched an ambitious future history series with *Inherit the Earth*, to widespread praise. Stableford has created in this novel a totally believable world, and wrapped it around a series of mysterious events, surprise revelations, double crosses, confused motivations, rumors, lies, plots, and counterplots. . . . Tightly controlled and suspenseful throughout, said *Science Fiction Chronicle*. *Library Journal* said, The ethical questions posed by the prospect of conquering the aging process underscore this fast-paced SF adventure, adding depth to a story that will appeal to fans of high-tech SF and conspiracy theories. This future world is a complex society obsessed with the technology of life extension and on the brink of creating true immortals. Now, in *Architects of Emortality*, Stableford gives us a story set hundreds of years in the future, filled with people who can hope for 300-year lifespans and a fortunate few whose lives will be in the thousands of years. This society is on the edge of radical change, where people have the time to develop eccentric lifestyles and personal obsessions, a world sometimes reminiscent of the distant future of Michael Moorcock's *Dancers at the End of Time* series. And there has been a series of murders that threaten the future stability of the world, murders executed by bioengineered flowers. Police officers Watson and Holmes investigate, but the central figure quickly becomes the amateur detective Oscar Wilde, a student of history who has taken on the persona of his namesake. And the question is not so much who the murderer is, but how and why. Filled with memorable characters and powerful and striking images of the richly altered world of the future, *Architects of Emortality* is a satisfying and complete story that also adds depth and detail to the evolving series. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Net of Being Alex Grey, 2012-11-20 How Alex Grey's visionary art is evolving the cultural body

through icons of interconnectedness • Includes over 200 reproductions of Grey's artwork • Contains spectacular photos of Grey's collaboration with the cult band TOOL plus his worldwide live-painting performances • Offers Grey's reflections on how art evolves consciousness with a new symbology of the Networked Self • Winner of the 2013 Nautilus Silver Book Award in Photography and Art

Revealing the interwoven energies of body and soul, love and spirit that illuminate the core of each being, Alex Grey's mystic paintings articulate the realms of consciousness encountered during visits to entheogenic heaven worlds. His painting Net of Being--inspired by a blazing vision of an infinite grid of Godheads during an ayahuasca journey--has reached millions as the cover and interior of the band TOOL's Grammy award-winning triple-platinum album, 10,000 Days. Net of Being is one of many images Grey has created that have resulted in a chain reaction of uses--from apparel and jewelry to tattoos and music videos--embedding these iconic works into our culture's living Net of Being. The book explores how the mystical experience expressed in Alex Grey's work opens a new understanding of our shared consciousness and unveils the deep influence art can have on cultural evolution. The narrative progresses through a successive expansion of identity--from the self, to self and beloved, to self and community, world spirit, and cosmic consciousness, where bodies are transparent to galactic energies. Presenting over 200 images, including many never-before-reproduced paintings as well as masterworks such as St. Albert and the LSD Revelation Revolution and Godself, the book also documents performance art, live-painting on stage throughout the world, and the "social sculpture" called CoSM, Chapel of Sacred Mirrors, that Grey cofounded with his wife and creative collaborator, artist Allyson Grey.
