Economics Rules Dani Rodrik,2015 A leading economist trains a lens on his own discipline to uncover when it fails and when it works.

Three Shadows Cyril Pedrosa,2008-04-01 Can you ever escape your fate? Three shadows stand outside the house - and Louis and Lise know why the spectral figures are there. The shadows have come for Louis and Lise's son, and nothing anyone can do will stop them. Louis cannot let his son die without trying to prevent it, so the family embarks on a journey to the ends of the earth, fleeing death. Poignant and suspenseful, *Three Shadows* is a haunting story of love and grief, told in moving text and sweeping black and white artwork by Cyril Pedrosa.

Missile Mouse Jake Parker,2011 Missile Mouse, a secret agent for the Galactic Security Agency, must battle evil King Bognarsh who has enslaved an entire planet.

Economics Rules: The Rights and Wrongs of the Dismal Science Dani Rodrik,2015-10-13 “A hugely valuable contribution. . . . In setting out a defence of the best in economics, Rodrik has also provided a goal for the discipline as a whole.” —Martin Sandbu, Financial Times In the wake of the financial crisis and the Great Recession, economics seems anything but a science. In this sharp, masterfully argued book, Dani Rodrik, a leading critic from within, takes a close look at economics to examine when it falls short and when it works, to give a surprisingly upbeat account of the discipline. Drawing on the history of the field and his deep experience as a practitioner, Rodrik argues that economics can be a powerful tool that improves the world—but only when economists abandon universal theories and focus on getting the context right. *Economics Rules* argues that the discipline's much-derided mathematical models are its true strength. Models are the tools that make economics a science. Too often, however, economists mistake a model for the model that applies everywhere and at all times. In six chapters that trace his discipline from Adam Smith to present-day work on globalization, Rodrik shows how diverse situations call for different models. Each model tells a partial story about how the world works. These stories offer wide-ranging, and sometimes contradictory, lessons—just as children’s fables offer diverse morals. Whether the question concerns the rise of global inequality, the consequences of free trade, or the value of deficit spending, Rodrik explains how using the right models can deliver valuable new insights about social reality and public policy. Beyond the science, economics requires the craft to apply suitable models to the context. The 2008 collapse of Lehman Brothers challenged many economists' deepest assumptions about free markets. Rodrik reveals that economists' model toolkit is much richer than these free-market models. With pragmatic model selection, economists can develop successful antipoverty programs in Mexico, growth strategies in Africa, and intelligent remedies for domestic inequality. At once a forceful critique and defense of the discipline, *Economics Rules* charts a path toward a more humble but more effective science.

The Gray Rhino Michele Wucker,2016-04-05 The #1 English-language bestseller in China--the book that is shaping China's planning and policy for the future. A gray rhino is a highly probable, high impact yet neglected threat: kin to both the elephant in the room and the improbable and unforeseeable black swan. Gray rhinos are not random surprises, but occur after a series of warnings and visible evidence. The bursting of the housing bubble in 2008, the devastating aftermath of Hurricane Katrina and other natural disasters, the new digital technologies that upended the media world, the fall of the Soviet Union...all were evident well in advance. Why do leaders and decision makers keep failing to address obvious dangers before they spiral out of control? Drawing on her extensive background in policy formation and crisis management, as well as in-depth interviews with leaders from around the world, Michele Wucker shows in *The Gray Rhino* how to recognize and strategically counter looming high impact threats. Filled with persuasive stories, real-world examples, and practical advice, *The Gray Rhino* is essential reading for managers, investors, planners, policy makers, and anyone who wants to understand how to profit by avoiding getting trampled.

Great White Zeke Tim Boyle,2020-09-20 Great White Zeke is a picture book about a baby raised by Great White Sharks -- like a Tarzan sort of situation, but in the Pacific. How will this mama shark help a helpless baby survive? Can a baby do anything the other sharks can't do?Written and illustrated in delicious digital watercolor in just over two weeks, this 8.5 x 11 format book helps dispel the myth that sharks are mindless killing machines, and contains shark facts written by Oceanographer Apryl Boyle. Portions of the profits go to her non-profit El Porto Shark.

Sherman Michel Esteve,2020-07-30 “A superbly organized, well-written, detailed history of the Sherman tank” with hundreds of photos and diagrams included (Armor Magazine). The Medium Tank, M4, better known to the British as the Sherman, was the most widely used medium tank by the United States and western Allies in World War II. Reliable, relatively cheap to produce, and easy to maintain, thousands were distributed to the British Commonwealth and the Soviet Union by the Lend-Lease program. It first saw combat in North Africa, where it outclassed lighter German and Italian tanks. By 1944 the M4 was outgunned by the German heavy tanks, but it still contributed to the fight when deployed in numbers and supported by artillery and fighter-bombers. A detailed insight into the development and deployment of the M4, this book covers the design and construction of the chassis, turret, engine, armaments, and munitions, and differences between the variants of the M4. It covers the difficulties facing the crews who fought in this legendary tank, exploring the training they received and the different combat methods perfected by the Allies, including landing from a landing craft, maneuvering in the bocage of Normandy, and fighting in the snow. Fully illustrated with hundreds of contemporary and modern photographs and detailed diagrams, this complete account provides all the technical details of the construction of the M4, its maintenance and repair, and the logistics required to support it in combat. Whether you are a collector, a modeler, or simply passionate about military history, this book will provide you with an unparalleled insight into the M4. “Period photos, preservation shots, interior details, variant schematics, archival excerpts, armament and ammunition drawings, and more . . . Make it your introduction to this legendary tank family.” —Cybermodeler

Designing the T-34 Peter Samsonov,2019-12-27 When the German army launched Operation Barbarossa ☐ the invasion of the Soviet Union ☐ on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it ☐ the finest tank in the world☐ . Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war☐ s most revolutionary tank design.

Pablo & Jane and the Hot Air Contraption Jose Domingo,2015-10-20 A strange green glow is coming from the old house up on the hill, and when Pablo and Jane decide to inquire they make an unexpected discovery! Zapped into the Monster Dimension by the evil cat, Dr. Felinibus, they must now find a way home in the broken Hot Air Time Machine, with a little help from their friend Dr. Jules (a nineteenth century scientist trapped inside the body of a rat). Help Pablo, Jane, and Dr. Jules as they race for their lives through Lopsided London, Terrifying Transylvania, Horrid Hawaii to find the missing parts of their machine and avoid the terrors of the Monster Dimension.

Pressing Matters 10 Winka Dubbeldam,2022-06-10 Already number TEN, *Pressing Matters X* is a special issue reflecting a year of reflection and change, after several waves of the pandemic, Black Lives Matter protests and newly developed hybrid teaching methods. It follows last year's *Pressing Matters 9* that was completely rethought with the aim to present an Open Source publication that shares the Department of Architecture's concept of design-research,

an integral approach of critical thinking, rigorous research, and design, representing a deep understanding of the complex layers of architecture. Together with Jonathan Jackson & team of WSDIA, a more integral design was developed, allowing input from research [ARI labs], students, faculty and Penn's special events. This anniversary of Pressing Matters is celebrated by adding the decade color of silver to the usual recycled cardboard cover of Weitzman's architecture publication. It also represents a year of new opportunities brought by a complete rethinking of education through the introduction of remote learning, zoom lectures and meetings. A much larger international group of diverse jurors, experts, and critics could be invited as travel was of no hindrance for attendance. In conjunction with the 17th International Architecture Exhibition - La Biennale di Venezia, CityX Venice, a virtual exhibition of new and recent work by leading architects and designers from around the world, opened online in May. Winka Dubbeldam, who is Miller Professor and Chair of the Department of Architecture and Director of the Advanced Research and Innovation (ARI) Lab, served as one of the creative directors, inviting six faculty members to present examples of the design-research under way at Weitzman. We are also very excited that the Department of Architecture at the Weitzman was selected for the next Acadia 2022 Conference called Hybrids & Haecceities, which asks how technology enables, reflects, and challenges established disciplinary boundaries and design practices. Hybrids & Haecceities aligns with a fundamental shift away from abstract generalized models of design and production towards custom or bespoke design now possible at an unprecedented scale due to Industry 4.0. After a summer of protests the department immediately created a DEI committee, restructured its curriculum and student and faculty body to be more inclusive. The department also instigated a free summer school for the students as internships and jobs were hard to come by. The generous support of the great group of external experts really helped the students in their design for a temporary Covid testing station, issues such as prefabrication, social equity, and race and gender were discussed and became the source of inspiration for the exquisite designs published by Surface Media.

We handle money every day. We're used to handing over a few bills for a coffee or a few more bills for a book or a new item of clothing. But it's fairly rare these days to be able to turn just one dollar into anything. A dollar won't buy you a camera or a shark--but there is a way to make it into one! Dollar Origami teaches you how to turn your currency into almost anything with just a few folds. With simple instructions, full-color photos, and 100 sheets of paper to practice on before you use your own money, you'll be crafting beautiful butterflies, adorable penguins, and more in your own home in no time. Sometimes, your money can go farther than you think--and with Dollar Origami, it can also provide you with much more fun!
- Overlanders' Handbook** Chris Scott,2011 Chris Scott and his band of globetrotting contributors and specialists have put together the definitive manual for planning and undertaking a vehicle-dependent overlanding adventure across the wilds of Africa, Asia and Latin America. The Overlanders' Handbook is written in the same entertaining yet clear jargon-free English for which Chris's other books are known – it doesn't assume you know your plug gap from a radiator cap. Planning – When to go; typical costs; documentation; sponsorship; early overland journeys. Vehicle choice and preparation – The Overlanders' Handbook is the most comprehensive account in print, covering everything from adapting a cheap car to equipping a campervan or 4x4 for months on the road, or even building and outfitting your own accommodation module to mount on an all-terrain truck chassis. Life on the road – How to handle dodgy borders, haggle over a purchase, treat a dodgy stomach and cope with crazy driving conditions. Guidance on wild camping; navigation and mapping strategies; onward shipping; advice for solo women overlanders; travelling with children or with pets; vehicle repairs and troubleshooting; and off-road driving techniques. Continental route outlines – Guidelines on both popular and obscure overland routes through Africa, Asia and Latin America. Includes fuel prices, easiest borders and best seasons, visa strategies, danger zones and regional highlights. Overlanders' Tales – Half a dozen accounts of global adventures lasting months or even years – in vans, 4x4s and all-terrain trucks – from contributors aged from 9 to 69.
