The Iron Manufacturer's Guide to the Furnaces, Forges and Rolling Mills of the United States J. Peter Lesley, 1859

Alabama Blast Furnaces Joseph H. Woodward, 2007 Go to resource on all the furnaces that made Alabama internationally significant in the iron and steel industry This work is the first and remains the only source of information on all blast furnaces built and operated in Alabama, from the first known charcoal furnace of 1815 (Cedar Creek Furnace in Franklin County) to the coke-fired giants built before the onset of the Great Depression. Woodward surveys the iron industry from the early, small local market furnaces through the rise of the iron industry in support of the Confederate war effort, to the giant internationally important industry that developed in the 1890s. The bulk of the book consists of individual illustrated histories of all blast furnaces ever constructed and operated in the state, furnaces that went into production and four that were built but never went into blast. Written to provide a record of every blast furnace built in Alabama from 1815 to 1940, this book was widely acclaimed and today remains one of the most quoted references on the iron and steel industry.

Shenandoah Iron Norman H. Scott,2018-04-14 Most people know of the rich Civil War history of the Shenandoah Valley of Virginia but few know that the Valley was also rich in iron smelting history. The first furnace west of the Blue Ridge Mountains was built in this region. For over 144 years the area produced iron ore and smelted ore into pig iron. The region's iron history covered the eras of the bloomery forge, charcoal cold-blast furnace and finally hot-blast coke furnace. Shenandoah Iron includes the transporting, mining and smelting activities of this industrial enterprise and explains in detail how iron ore is transformed into iron. Over 24 cold-blast furnaces are described and the two modern hot-blast furnaces are depicted. Over 80 iron mines are identified. The contributions of German-Americans who settled the valley and dominated the iron business are highlighted. The practice of industrial slavery and the impact of the Civil War on the iron industry are explored. This 350 page book includes 137 photographs, maps and drawings to illustrate the contributions that the Shenandoah counties of Clarke, Frederick, Page, Rockingham, Shenandoah and Warren made to the iron smelting industry of the Shenandoah Valley of Virginia.

Iron Furnaces of Lawrence County, Ohio Lori Shafer,2019-04-29 The Hanging Rock Iron Region encompassed Lawrence, Scioto, Jackson, Vinton, Hocking and Gallia Counties in Ohio; and Greenup, Boyd, Carter, and Lawrence Counties in Kentucky. In 1826, when the first furnace was lit in Lawrence County, Ohio, the history of the county and its people would be changed forever. Each furnace would leave its own mark in the sands of time.

Each iron master would have his or her own tale to tell. The golden age of iron would end in the early 1900's, but visitors to the county can still see traces of these monsters of industry. Some of their stories can be found withi
