Your Mountain is Waiting ,2019 The work of photographer and Rhode Island School of Design professor Steven B. Smith (born 1963) chronicles the transition of the Western landscape into suburbia. 'Steven B. Smith: Your Mountain is Waiting' documents the accelerating suburbanization of Smith's native Utah. Peeling back the layers of westward expansion with equal parts subtlety and irony, Smith captures the new McMansions springing up against the rocky, rust-red mountains and deep blue skies of the West. Smith is equally attentive to the cast of characters that fill these new landscapes--the people that build them, and the people that live in them.

Waiting for the East Wind Elise Van Loon, This dissertation explains stick charts from the Marshall Islands and how each one is unique to the navigator who created it. Stick charts are navigational tools that map the ocean's geography by illustrating how the atolls interrupt the ocean swells without giving any significant detail to the landmasses themselves. Examining these instruments may lead to an understanding of how the Marshallese people perceive maritime space. The stick charts are frequently compared to cartesian maps and the physical geography of the area. However, as time is a large factor in sailing, I examined the varied elements of several stick charts as a matter of time rather than space. The geographic distance between two atolls is constant, but the placement of the atolls on each chart fluctuates. The possibility for the different placements is due to the influences of the sea causing and outward journey to take more or less time than the return. Through investigating the charts and linking elements of seafaring, the artefacts may convey abstract illustrations or literal representations of their environment. This dissertation aims to not only analyse the Marshallese stick charts, but to collate components of their culture and heritage in order to explain the environment these charts were used in. This supports the idea that maritime space can be derived from how these charts were created. Based on each person's view of the sea, the information they deliver will be built on perception of time, distance, and obstacles.

Waiting to be Heard Bogusia J. Wojciechowska,2009 Waiting to be Heard is the voice of the persecuted, the brave, the hopeful, the betrayed and the determined. It is a testament to the strength of the human spirit and to a generation that did not see itself as 'victims,' but as 'survivors.' Studies of the War and post-War years have traditionally focused on political and military history. In recent years there has been a greater interest in the social consequences of the War. Nevertheless, discussions relating to the displacement of the Polish-born usually focus on the Holocaust interpreted as a Jewish-only phenomenon. Yet, in the years 1939-45, Poland lost 6,029,000, or 22%, of its total population, including approximately 3 million of its Christian residents. Many of those who survived the War, at its conclusion, were scattered all over the world; by the end of 1945, 249,000 members of the Polish Armed Forces were under British command, with 41,400 dependants in the United Kingdom, Italy, East and South Africa, New Zealand, India, Palestine, Mexico and Western Germany. These refugees have long sought a voice for their experiences. The website, www.PolishDiaspora.net, was created in 2006 by Dr. Wojciechowska as a forum for their voices. The international deluge of interest in the project resulted in Waiting to be Heard. While some participants had talked and written about their experiences before, the majority had not discussed their experiences with anyone outside their immediate social circle. And the memories are still painful, as exemplified by one participant who said, God, I askyou; allow me to forget those days and weeks when I lay on piles of corpses in the hope of finding a tiny bit of warmth; allow me to forget the licking of ice from the walls of the cattle wagons; allow me to lose my memory of those years

Why Are We Waiting? Nicholas Stern,2016-07-29 An urgent case for climate change action that forcefully sets out, in economic, ethical, and political terms, the dangers of delay and the benefits of action. The risks of climate change are potentially immense. The benefits of taking action are also clear: we can see that economic development, reduced emissions, and creative adaptation go hand in hand. A committed and strong low-carbon transition could trigger a new wave of economic and technological transformation and investment, a new era of global and sustainable prosperity. Why, then, are we waiting? In this book, Nicholas Stern explains why, notwithstanding the great attractions of a new path, it has been so difficult to tackle climate change effectively. He makes a compelling case for climate action now and sets out the forms that action should take. Stern argues that the risks and costs of climate change are worse than estimated in the landmark Stern Review in 2006--and far worse than implied by standard economic models. He reminds us that we have a choice. We can rely on past technologies, methods, and institutions--or we can embrace change, innovation, and international collaboration. The first might bring us some short-term growth but would lead eventually to chaos, conflict, and destruction. The second could bring about better lives for all and growth that is sustainable over the long term, and help win the battle against worldwide poverty. The science warns of the dangers of neglect; the economics and technology show what we can do and the great benefits that will follow; an examination of the ethics points strongly to a moral imperative for action. Why are we waiting?

Waiting for Daylight Janell Kleberg,2003-10 Waiting for Daylight consists of photographs taken while working cattle from horseback on the King Ranches in South Texas, Brazil, Argentina, and Australia. The photographs capture an era when people lived out their lives on lands that were often inhospitable with great herds of red cattle and fine cow horses. These beautiful, historic images communicate a feeling of constant renewal combined with the sense of suspended time.

The World is Waiting for You Barbara Kerley,2013 A stirring invitation to leap, dive, soar, plunge and thrill to the natural world's wonders and glories. --Kirkus Reviews **STARRED REVIEW** What do you want to be when you grow up? is a question kids get asked over and over. But very few connections are made for kids between the present and the future. This book shows kids a pathway from their current interests and talents to a future career or interest. And in so doing, it also encourages adventure, exploration, and discovery, three core principles of National Geographic's mission. It's a celebration of possibility--so simple and so profound. Jumping in puddles can inspire scuba diving. Dirty hands can lead to dinosaur bones Backyard star-gazing inspires future astronauts. Perfectly selected photos make the connections compelling and the future real for kids, then rich back matter brings the message home with inspirational quotes from the real-life adventurers pictured in the images. Grown-ups won't be able to resist sharing this inspirational message with kids, and kids won't be able to resist the invitation to let their imaginations run wild.

Waiting for Messiah Rainbow Chang,2021-03-11 The pandemic of the 2020 Easter season has been seen as transformative for human life. However, the transformation that modern science will bring into human life is even more fearfully exciting in the big picture of human history. The pandemic triggered a deep urgency in the author to question the Easter story in light of frontier science. When death is near us, we often think more about life and truth and are filled with the urge to experience them both. In the Christian story, God was born, died, and was resurrected on earth; ascended into heaven from earth; and will bring the kingdom of God on earth. What will be the continuation of our Easter story if the earth is no longer our home? What's the real meaning of the resurrection of the dead in his return if modern science has achieved everlasting life before his return? In this book, the questioning of truth is blended with a deep faith in the truth. It shows that waiting for the Messiah is

not a stilled life putting the future on pause but a dance of life. For the characters of this book, the dance of life in lockdown in a small town did not block their awareness of hunger, violence, and injustice happening in the world or limit their vision for the kingdom of God. That could be said about millions of lives at the time of Easter 2020, as millions of people have given their lives for others. Remembering the Easter of 2020 is remembering you.
