Speculative Landscapes Ross Barrett, 2022-08-23 *Speculative Landscapes* offers the first comprehensive account of American artists' financial involvements in and creative responses to the nineteenth-century real estate economy. Examining the dealings of five painters who participated actively in this economy—Daniel Huntington, John Quidor, Eastman Johnson, Martin Johnson Heade, and Winslow Homer—Ross Barrett argues that the experience of property investment exposed artists to new ways of seeing and representing land, inspiring them to develop innovative figural, landscape, and marine paintings that radically reworked visual conventions. This approach moved beyond just aesthetics, however, and the book traces how artists creatively interrogated the economic, environmental, and cultural dynamics of American real estate capitalism. In doing so, *Speculative Landscapes* reveals how the provocative experience of land investment spurred painters to produce uniquely insightful critiques of the emerging real estate economy, critiques that uncovered its fiscal perils and social costs and imagined spaces outside the regime of private property.

The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Wilson, Frank C. Keil, 2001-09-04 Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and cognition. The MIT Encyclopedia of the Cognitive Sciences (MITECS) is a landmark, comprehensive reference work that represents the methodological and theoretical diversity of this changing field. At the core of the encyclopedia are 471 concise entries, from Acquisition and Adaptationism to Wundt and X-bar Theory. Each article, written by a leading researcher in the field, provides an accessible introduction to an important concept in the cognitive sciences, as well as references or further readings. Six extended essays, which collectively serve as a roadmap to the articles, provide overviews of each of six major areas of cognitive science: Philosophy; Psychology; Neurosciences; Computational Intelligence; Linguistics and Language; and Culture, Cognition, and Evolution. For both students and researchers, MITECS will be an indispensable guide to the current state of the cognitive sciences.

Minimal Ideas Werner Abraham, Samuel David Epstein, Höskuldur Thráinsson, C. Jan-Wouter Zwart, 1996-08-09 The articles in this volume are inspired by the Minimalist Program first outlined in Chomsky's MIT Fall term class lectures of 1991 and in his seminal paper "A Minimalist Program for Linguistic Theory". The articles seek to develop further some key idea in the Minimalist Program, sometimes in ways deviating from the course taken by Chomsky. The articles are preceded by a 40 page introduction into the minimalist framework. The introduction pays special attention to the question how the minimalist framework developed out of the Principles and Parameters (Government and Binding) framework. The introduction serves as a guide through the entire volume, presenting the issues to be discussed in the articles in detail, and offering a thematic overview over the volume as a whole. Most of the articles in this volume are concerned with issues raised in Chomsky's first two minimalist papers, namely "A Minimalist Program for Linguistic Theory" (1993, first distributed in 1992) and "Bare Phrase Structure" (1995a, first distributed 1994). In acknowledgment of this, each article starts out with a quote from Chomsky (1993, 1995a). This quote also serves to highlight the particular grammatical or theoretical issue that is primarily discussed in the relevant article. Several articles relate issues raised in Chomsky's first two minimalist papers to the basic ideas in Kayne's book, *The Antisymmetry of Syntax* (1994, distributed in part in manuscript form in 1993). In many respects, therefore, these articles develop alternatives to ideas proposed in chapter 4, "Categories and Transformations," of Chomsky's most recent book, *The Minimalist Program* (1995b). Some of the articles contain references to chapter 4, and some comments on similarities and differences between ideas developed in these papers and in chapter 4 of Chomsky 1995b can also be found in the Introduction to this volume.

Music, Performance and African Identities Toyin Falola, Tyler Fleming, 2012-03-15 Cutting across countries, genres, and time periods, this volume explores topics ranging from hip hop's influence on Maasai identity in current day Tanzania to jazz in Bulawayo during the interwar years, using music to tell a larger story about the cultures and societies of Africa.

Wave Propagation in Structures James F. Doyle, 2012-12-06 This book introduces spectral analysis as a means of investigating wave propagation and transient oscillations in structures. After developing the foundations of spectral analysis and the fast Fourier transform algorithm, the book provides a thorough treatment of waves in rods, beams, and plates, and introduces a novel matrix method for analysing complex structures as a collection of waveguides. The presentation includes an introduction to higher-order structural theories, the results of many experimental studies, practical applications, and source-code listings for many programs. An extensive bibliography provides an entry to the research literature. Intended as a textbook for graduate students of aerospace or mechanical engineering, the book will also be of interest to practising engineers in these and related disciplines.

The Country Gentleman, 1860 A journal for the farm, the garden, and the fireside, devoted to improvement in agriculture, horticulture, and rural taste; to elevation in mental, moral, and social character, and the spread of useful knowledge and current news.

The Matter of Zen Paul Wienpahl, 2016-05-05 This book, first published in 1964, concerns the practice of Zen Buddhism. The practice is a particular form of meditation. In Japan, the only country in which it is any longer seriously pursued, the practice is called zazen. The author directs attention to zazen because it is being overlooked in the current interest in Zen.
