Osamu Tagaya

Nakajima B5N 'Kate' and B6N 'Jill' Units Mark Chambers, Tony Holmes, 2017-06-29 Entering service during the Sino-Japanese War, the Nakajima B5N (code-named 'Kate') excelled and went on to achieve surprising and dramatic successes in the Japanese attack on Pearl Harbor. It also contributed to the sinking of the US aircraft carriers USS Lexington at the Battle of the Coral Sea, USS Yorktown at the Battle of Midway, and USS Hornet at the Battle of the Santa Cruz Islands. Its replacement, the Nakajima B6N 'Jill', while a marked improvement over its illustrious predecessor, was never able to achieve its full potential in combat due to advances in Allied aircraft, finding itself relegated to the dreaded Kamikaze strikes in the latter part of the war. Using previously unpublished photographs as well as colour illustrations, this book will cover the history of the 'Kate' and 'Jill' torpedo/attack bombers, including their design and development, as well as the combat highs and lows of the Imperial Japanese Navy's premier torpedo-bombers.

Mitsubishi Type 1 Rikko 'Betty' Units of World War 2 Osamu Tagaya, 2013-01-20 The most produced Japanese bomber of the war the G4M saw action on every front from the first day of the Pacific conflict through to VJ-Day. The 'Betty's' very long range made it a key weapon during the opening year of the war. However, to achieve this, the aircraft was built with very little protective armour for its crew or fuel tanks, and Allied pilots soon exposed its extreme vulnerability. In the first in a series of volumes examining the key Japanese aircraft of WW2, Dr Osamu Tagaya details the G4M's extensive combat history, and lists all the units which operated the bomber.

The Future of Naval Aviation Owen R. Cote, 2006 Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these demands by exploiting technologies and operational practices developed in the last decade that will greatly increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air Support; (3) The Sea Shield Must Be Dominant If the Sea Base Is to Be Effective; (4) Adapting; (5) The Spectrum from Presence to Major Combat; (6) Technology and the Spectrum of Threat; (7) The Value of Robust Airborne Early Warning (AEW) Aircraft; (8) No Substitute for Range in Carrier Aviation; (9) The Need for Airborne Electronic Attack (AEA) is Not Going Away; (10) Land-Based Maritime Patrol Aircraft; (11) Multimission Helicopters; (12) New Capabilities and Challenges; (13) Eliminating the Weather Sanctuary for Mobile Targets; (14) Providing a Dominant Defense of the Sea Base; (15) Shoot Archers Not Arrows; (16) Make Opposing Submarines Pay for Their Inevitable Indiscretions; (17) Get Back in the Counter-Surveillance Business; and (18) The Force of the Future.

Aichi D3A1/2 Val Peter Charles Smith, 1999 The Aichi Val was the principal dive bomber for the Japanese fleet, scoring considerable successes against American and British warships. From the attack on Pearl Harbour to the Kamikaze raids in the closing stages of the war, it was a potent weapon. Using official records and the testimony of the men that designed and flew the Val, Peter Smith has assembled this work, which should appeal to both historians and modellers.

Aichi 99 Kanbaku 'Val' Units Osamu Tagaya, 2013-02-20 The Aichi Type 99 Carrier Bomber (D3A) - code named 'Val' by Allied intelligence - was the mainstay of the Imperial Japanese Navy's carrier dive-bomber force from 1941 to 1943. It sank more Allied warship tonnage than any other Axis aircraft during World War 2. While the Val's participation in the major carrier battles has been widely covered in other English language sources, details of its operations have received scant attention in English. This book explores the Val's combat operations. Colour illustrations and photographs complement the development of dive-bombing methods in the IJN.

Red Sun Richard Ziegler, Patrick M. Patterson, 2001 These thought-provoking events are portrayed by a large cast of fictional characters that includes an honorable Japanese general, three generations of a Japanese-American family, a Hawaiian activist, and a present-day professor with startling ties to the occupation.

The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

Imperial Japanese Navy Aircraft Carriers 1921-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the Hosho. Throughout the 1920s and 1930s, it experimented with its carriers, perfecting their design and construction. As a result, by the time Japan entered World War II and attacked the United States at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. This book covers the design, development and operation of IJN aircraft carriers built prior to and during World War II. Pearl Harbor, Midway and the first carrier vs carrier battle, the battle of the Coral Sea, are all discussed.

Attack on Pearl Harbor Alan D. Zimm, 2013-10-19 Nothing previously published has offered such a close examination of Japanese strategy . . . an in-depth study of the Japanese planning, preparation and execution of the attack with particular focus on factors not thoroughly considered by other historians, if at all . . . detailed analyses that lead to a much better understanding of what the Japanese did, why they did it, and especially how the attack was very nearly an abject failure instead of a stunning success. Naval Institute Proceedings For seven decades, conventional wisdom has extolled the Japanese attack on Pearl Harbor as brilliant in its planning and execution . . . this masterful analysis topples that pillar of Pacific War history . . . with its amazing depth of meticulous research and analysis, this forceful book is essential reading for anyone with a serious interest in Pearl Harbor. World War II The first militarily professional description of the Pearl Harbor attack, and for those who are serious about military history and operations, it is a joy to read. . . a superb military analysis of the attack . . . not only renders all other histories of Pearl Harbor obsolete, it has set the bar high for other histories of the Pacific War. War In History

Shattered Sword Jonathan Parshall, Anthony Tully, 2011 Many consider the Battle of Midway to have turned the tide of the Pacific War. It is without question one of the most famous battles in history. Now, for the first time since Gordon W. Prange's bestselling *Miracle at Midway*, Jonathan Parshall and Anthony Tully offer a new interpretation of this great naval engagement. Unlike previous accounts, *Shattered Sword* makes extensive use of Japanese primary sources. It also corrects the many errors of Mitsuo Fuchida's *Midway: The Battle That Doomed Japan*, an uncritical reliance upon which has tainted every previous Western account. It thus forces a major, potentially controversial reevaluation of the great battle. The authors examine the battle in detail and effortlessly place it within the context of the Imperial Navy's doctrine and technology. With a foreword by leading WWII naval historian John Lundstrom, *Shattered Sword* will become an indispensable part of any military buff's library. Winner of the 2005 John Lyman Book Award for the Best Book in U.S. Naval History and cited by *Proceedings* as one of its Notable Naval Books for 2005.

Imperial Japanese Naval Aviator 1937-45 Osamu Tagaya, 2012-06-20 The fateful attack on Pearl Harbor forced the Western world to revise its opinion of Japan's airmen. Before the war, Japanese aviators had been seen as figures of ridicule and disdain; yet the ruthless skill and efficiency of their performance in December 1941 and the months that followed won them a new reputation as a breed of oriental superman. This book explores the world of the Imperial Japanese Naval airman, from the zenith of his wartime career until the turning of the tide, when the skill and experience of the average Japanese airman declined. Cultural and social background, recruitment, training, daily life and combat experience are all covered.

Nakajima B5N Kate Dariusz Paduch, 2022-01-31 When war broke out in the Pacific, the Japanese naval air force had the world's most advanced Nakajima B5N2 torpedo-bomber aircraft, which was far superior to the American Douglas TBD-1 Devastator and a generation ahead of the British Fairey Swordfish biplanes. The Japanese aircraft were faster, more maneuverable, and could drop torpedoes from a higher altitude. After a successful debut over Pearl Harbor, these machines were involved in every major naval battle until 1944, making a permanent mark on aviation history. It was not until 1943/1944 that this superb aircraft began to be replaced by the modern Nakajima B6N Tenzan. The road to the creation of B5N was not easy and was fraught with many failures.

The First Team and the Guadalcanal Campaign John B Lundstrom, 2005-07-01 From huddled command conferences to cramped cockpits, John Lundstrom guides readers through the maelstrom of air combat at Guadalcanal in this impressively researched sequel to his earlier study. Picking up the story after Midway, the author presents a scrupulously accurate account of what happened, describing in rich detail the actual planes and pilots pitted in the ferocious battles that helped turn the tide of war. Based on correspondence with 150 American and Japanese veterans, or their families, he reveals the thoughts, pressures, and fears of the airmen and their crews as he reconstructs the battles. These are the story of the Wildcat and Zero fighters, and the Dauntless, Avenger, Betty, Kate, and Val bombers. Lavishly illustrated with drawings, maps, and photographs, this fresh look at the campaign set a standard for aviation histories when first published in 1994.

Japan's Empire Disaster Jean Sénat Fleury, 2021-04-27 A former judge with a passion for history, Jean Sénat Fleury was born in Haiti and currently lives in Boston. He wrote several historical books, such as: The Stamp Trial, Jean-Jacques Dessalines: Words from Beyond the Grave, Toussaint Louverture: The Trial of the Slave Trafficking, Adolf Hitler: Trial in Absentia in Nuremberg, The Trial of Osama Bin Laden, Hirohito Guilty or Innocent: The Trial of the Emperor. His new book, Japan's Empire Disaster, provides an understanding of the expansionist policy practiced by Japan during the end of the nineteenth and the first period of the twentieth century. From the adoption of the Meiji constitution in 1889 and the first period of the Shōwa era (1927-1945), the military controlled the Japanese constitutional government. The result was years of political instability, more internal conflicts, violence, murders, assassinations, overseas aggression, and war crimes. The book demonstrates that in Japan, during the Pacific War, the real driving force of the war was the Imperial Japanese Army and the Imperial Japanese Navy. Hirohito, as supreme commander, gave full support to the army and navy. On multiple occasions, he sanctioned many government policies. In fact, he was responsible for the atrocities that the Japanese troops committed in Asia during the Pacific War. Japan's Empire Disaster is a book of information and training. The book describes Japan's opening to modernization with the 1853 arrival of commodore Matthew Calbraith Perry in the country, and also details the history of the wars launched by Emperor Meiji and Emperor Hirohito to build Japan's empire in the nineteenth and the twentieth centuries.

Japanese Naval Air Force Fighter Units and Their Aces, 1932-1945 Ikuhiko Hata, Yasuho Izawa, Christopher Shores, 2012-09-20 An extensive guide to Japan's Naval Air Force Fighter Units and their ace pilots during conflicts in the 1930s and '40s, now in English. The book begins by looking at the land- and aircraft carrier-based navy fighter units and their operations from 1932 to 1945, as well as their history and achievements. This is followed with biographical details for all pilots who claimed eight or more aerial victories. The thorough appendix provides detailed listings of all pilots known to have claimed five or more victories (and thus considered to be "aces"), listings of the graduation from

training of all Japanese Navy fighter pilots, and of fighter pilot casualties. Photographs, maps, and artist's side-view drawings and paintings of aircraft relevant to each of the units are also included. This revised edition is a companion volume to Japanese Army Air Force Fighter Units and Their Aces, 1931-1945.

I Will Run Wild Thomas McKelvey Cleaver, 2020-09-17 This fascinating volume - now available in paperback offers a vivid narrative history of the early stages of the Pacific War, as US and Allied forces desperately tried to slow the Japanese onslaught that began with the sudden attack on Pearl Harbor in December 1941. In many popular histories of the Pacific War, the period from the Japanese attack at Pearl Harbor to the US victory at Midway is often passed over because it is seen as a period of darkness. Indeed, it is easy to see the period as one of unmitigated disaster for the Allies, with the fall of the Philippines, Malaya, Burma and the Dutch East Indies, and the wholesale retreat and humiliation at the hands of Japan throughout Southeast Asia. However, there are also stories of courage and determination in the face of overwhelming odds: the stand of the Marines at Wake Island; the fighting retreat in the Philippines that forced the Japanese to take 140 days to accomplish what they had expected would take 50; the fight against the odds at Singapore and over Java; the stirring tale of the American Volunteer Group in China; and the beginnings of resistance to further Japanese expansion. In these events, there are many individual stories that have either not been told or not been told widely which are every bit as gripping as the stories associated with the turning tide after Midway. *I Will Run Wild* draws on extensive first-hand accounts and fascinating new analysis to tell the story of Americans, British, Dutch, Australians and New Zealanders taken by surprise from Pearl Harbor to Singapore that first Sunday of December 1941, who went on to fight with what they had at hand against a stronger and better-prepared foe, and in so doing built the basis for a reversal of fortune and an eventual victory.

Hawker Hurricane IIc, 2021-07-05 This book compiles 4-view color profiles, scale plans, and photo details of the single variant of the Hawker Hurricane IIc. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also includes photos of the details in B&W and color and 4-view color profiles of the Hawker Hurricane IIc flown by Sgt Antoni Beda.

Imperial Japanese Navy Aces 1937-45 Henry Sakaida, 2012-10-20 The outcome of the Pacific War was heavily influenced by the results of naval battles between the Imperial Japanese fleet and the US Navy. One of the key elements was Japan's large fighter component, which had gained experience over Manchuria, China and Mongolia in the late 1930s. Flying A5Ms, at least 21 pilots achieved 'acedom' securing air superiority for the invaders. Manufacturer Mitsubishi derived much from these campaigns, producing one of the best fighters of the War, the A6M Zero-Sen. Navy pilots proved to be highly skilled when engaged by the Allied forces, Pacific. Pilots like Nishizawa, Sagita and Sakai scoring more than 60 kills apiece.

Sunburst Mark Peattie, 2013-09-02 This acclaimed sequel to the Peattie/Evans prizewinning work, *Kaigun*, illuminates the rise of Japanese naval aviation from its genesis in 1909 to its thunderbolt capability on the eve of the Pacific war. In the process of explaining the navy's essential strengths and weaknesses, the book provides the most detailed account available in English of Japan's naval air campaign over China from 1937 to 1941. A final chapter analyzes the utter destruction of Japanese naval air power by 1944.

South Pacific Air War Volume 1 Peter Ingman, Michael John Claringbould, 2017-11 This volume chronicles aerial warfare in the South Pacific from December 1941 until March 1942, during which air operations by both sides became a daily occurrence. As Imperial Japanese Navy flying boats and landbased bombers penetrated over vast distances, a few under-strength squadrons of the Royal Australian Air Force put up a spirited fight. However it was the supreme power of aircraft carriers that had the biggest impact. Four Japanese fleet carriers facilitated the capture of Rabaul over a devastating four-day period in January 1942. The following month, the USS Lexington's fighter squadron VF-3 scored one of the most one-sided victories of the entire Pacific War. By March 1942 the Japanese had landed on mainland New Guinea, and the scene was set for a race to control Port Moresby. This is the full story of both sides of an air war that could have been won by either

incumbent, but for timing, crucial decisions and luck. The two authors are uniquely qualified to tell this story. Raised in Port Moresby, Michael Claringbould is a globally-acknowledged expert on the New Guinea air war and Japanese aviation in particular. Peter Ingman is an acclaimed military history author specialising in the early Pacific War period.
