Designing Disney John Hench, 2009-01-06 *Designing Disney* sets into history and puts into context the extraordinary contributions of the late John Hench, who, at the age of 94, still came into his office at Imagineering each day. His principles of theme park design, character design, and use of color made him a legendary figure, not only for Disney fans but also for students and aficionados of architecture, engineering, and design. *Designing Disney* reveals the magic behind John's great discoveries and documents his groundbreaking in several key areas: "Design Philosophy" examines the values, attitudes, aesthetics, and logic that went into the original concepts for Disney theme parks. In "The Art of the Show" and "The Art of Color," Hench reveals the essence of what makes the parks work so well. And in "The Art of Character," he lets the reader in on the how and why of the Disney characters' inherent popularity—their timeless human traits, archetypal shape and gestures that suggest these qualities graphically, and their emotional resonance in our lives.

Millard offers young readers moving insights into the business of being family, and how 'belonging' can be a wide and generous experience. Neatly sidestepping overt sentimentality, much of the charm of this work lies in the gentleness and goodness inherent in the people who inhabit the book' - WA Premier's Literary Award judges, 2008 'together the individual characters in this story nurture and encourage each other, revealing a heart-warming picture of how delightfully rewarding fostering can be for all concerned. this third book in the Kingdom of Silk series is as engaging as the first two titles. Cat and Fish Joan Grant, 2005 Cat and Fish, the most unlikely of friends, introduce each other to their very different worlds, which leads to trouble and forces them to find a way to celebrate their differences and remain friends.

Cat on the Island Gary Crew, 2008 It was raining outside, so I said: 'Gramps, tell me a story.' This is the true story of David and his father, who came to Stephens Island - a remote and pristine island off Cook Strait between the North and South Islands of New Zealand in 1894. There they built a lighthouse to protect ships entering the strait. Oblivious of the potential damage to the environment, they chopped down the trees and ferns where the local birds sheltered, thereby demolishing their habitat. But worse than that, they brought their pregnant cat with them. The tiny Stephens Island wrens, being flightless, had no natural

defences against the predators and were wiped out in less than two years. The event is cited as the only instance where one species has been directly responsible for the extinction of another. Of course, once they realised what had happened, conservation authorities began the official eradication of the cats, but by then the damage had been done. The strikingly beautiful illustrations reinforce the tragedy of the obliteration of this tiny Eden, a timely metaphor for that other paradise known as Earth.
