Prototype Powertrain in Motorsport Endurance Racing Alberto Boretti, 2018-08-01 Racing continues to be the singular, preeminent source of powertrain development for automakers worldwide. Engineering teams rely on motorsports for the latest prototype testing and research. Endurance racing provides the harshest and most illuminating stage for system design validation of any motorsport competition. While advancements throughout the 20th Century brought about dramatic increases in engine power output, the latest developments from endurance racing may be more impactful for fuel efficiency improvements. Hybrid powertrains are a critical area of research for automakers and are being tested on the toughest of scales. Prototype Powertrain in Motorsport Endurance Racing brings together ten vital SAE technical papers and SAE Automotive Engineering magazine articles surrounding the advancements of hybrid powertrains in motorsports. The book also includes a history of endurance racing from the World Sports Car Championship through the 24 Hours of Le Mans to the World Endurance Championship written by the author. The goal is to provide the latest concepts being researched and tested on hybrid systems that will influence vehicles for years to come - appealing to engineers and enthusiasts alike.

Go Like Hell Albert J. Baime, 2009 By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, science fiction on wheels, but was also called the Assassin because so many drivers perished while racing them. *Go Like Hell* tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the pilots who would drive them to victory, or doom.

The Art of Racing in the Rain Garth Stein, 2014-09-16 The New York Times bestselling novel from Garth Stein—a heart-wrenching but deeply funny and ultimately uplifting story of a dog's efforts to hold together his family in the face of a divisive custody battle. Enzo knows he is different from other dogs: a philosopher with a nearly human soul (and an obsession with opposable thumbs), he has educated himself by watching television extensively, and by listening very closely to the words of his master, Denny Swift, an up-and-coming race car driver. Through Denny, Enzo has gained tremendous insight into the human condition, and he sees that life, like racing, isn't simply about going fast. Using the techniques needed on the race track, one can

successfully navigate all of life's ordeals. On the eve of his death, Enzo takes stock of his life, recalling all that he and his family have been through: the sacrifices Denny has made to succeed professionally; the unexpected loss of Eve, Denny's wife; the three-year battle over their daughter, Zoë, whose maternal grandparents pulled every string to gain custody. In the end, despite what he sees as his own limitations, Enzo comes through heroically to preserve the Swift family, holding in his heart the dream that Denny will become a racing champion with Zoë at his side. Having learned what it takes to be a compassionate and successful person, the wise canine can barely wait until his next lifetime, when he is sure he will return as a man.

Modena Racing Memories Graham Gauld, 1999 In the 1950s and early 1960s, Modena was the center of Italy's sports car and Grand Prix universe. There, engineers and artisans crafted cars for Ferrari, Maserati, OSCA, ATS, and others, every day bringing an unending parade of new surprises to the famous Modena Autodrome for resting. As a young man, Graham Gauld traveled to the northern Italian villa several times, striking up relationships with famous drivers, engineers, and designers who granted him and his camera unprecedented access to their facilities. The result is this remarkable history which documents the fall of Italian carmakers from Grand Prix eminence, and their subsequent rise to dominance in international GT racing. All of the photos are from Gauld's private collection and are seen together here for the first time. Populated with fantastic cars, motorsport luminaries, and the author's rarefied memories, this splendid photo history is sure to interest all fans of vintage racing and classic Italian machinery.

Enzo Ferrari Richard Williams, 2011-02-28 For tens of millions of people around the world, a single name evokes the world of speed - Enzo Ferrari. Today's Formula One would be unthinkable without the presence of the Ferrari cars on the grid. Win or lose, Ferrari attract more fans than all the other teams combined. And the cars unique appeal - their mystique, their myth - has its origins in the story of one man with a dictator's will and the cunning of a Machiavelli. Going back to the origins of The Old Man, tracing his

remarkable rise to prominence, and using sources which have hitherto remained silent, Richard Williams tells the story of a man who was one of the key figures of sport in the twentieth century, and whose influence over his sport is undiminished today, more than a decade after his death.
