British Secret Projects Tony Buttler,2000 A large number of fighter projects have been drawn by British companies over the last fifty years, but very few have turned into hardware, and very little has been published about these fascinating might-have-beens. This book makes extensive use of previously unpublished, primary-source material-much recently declassified. It gives an insight into a secret world where the public has had little idea of what was going on, while at the same time presenting a coherent nationwide picture of fighter development and evolution. Particular emphasis is placed on tender design competitions and some of the events that led to certain aircraft either being canceled or produced. Some of the many and varied types included are the Hawker P.1103/P.1136/P.1121 series, and the Fairey Delta III. The book includes many illustrations, plus specially commissioned renditions of might-have-been types in contemporary markings.

Modern Military Aircraft Jim Winchester,2014-10-01 Modern Military Aircraft is a comprehensive guide to the world's fighting aircraft since World War II, from the earliest jet fighters and basic piston-engined bombers, to today's high-tech and stealthy superfighters. Aircraft featured include: the F-86 Sabre, which fought its way to convincing victory over Russia's MiG-15 in the world's first jet-versus-jet battles in Korea; the Grumman F-14 Tomcat, the deadliest fleet fighter ever built, which has played an important part in the conflicts of the late 20th and early 21st centuries; and Russia's export miracles the Sukhoi Su-27, currently in service with air arms across the world in an array of variants. This book contains detailed features on more than 220 combat aircraft and helicopters from the past 65 years. Presented alphabetically by manufacturer, each aircraft is covered in detail, with feature boxes outlining its development, technical specifications, performance data and variants. Unique graphics allow the reader to compare specific features like firepower, troop-carrying capacity, and bombload with those of other aircraft of the same type.

Battle Flight Chris Gibson,2012 From the origins of net centric warfare in the 1940s, the Stage Plans of the 1950s, and the change of threat from aircraft to the ballistic missile, Battle Flight examines the steps taken to protect the British populace from nuclear Armageddon. Following WWII, Britain's air defences comprised a mix of interceptors and anti-aircraft guns that were tailored to counter mass bomber raids by piston-engine aircraft. These defences were rendered obsolete by the jet engine and the atomic bomb and the search for a cost-effective anti-aircraft system began. Interceptors were the obvious first line of defence and would remain so to this day, but unguided rockets and new surface-to-air guided-weapons (SAGW) were also examined. Wartime advances in guided weapons had ended, the teams dispersed, and the work forgotten, but such weapons were soon prioritized. Defensive weapons required control systems and plans were drawn up to integrate radar, command, control, and interception. These plans (Nucleus, Igloo, Rotor, Ahead, and Linesman) changed radically over a 20-year period, reflecting the rapid advance of technology in the post-war period. The 1960s saw stabilization with the interceptors as the main defence and SAMs to protect the V-bomber bases. All thoughts of ABMs were discarded, as the ballistic missile became the primary deterrent on both sides. By the 1980s the advent of long-range interceptors such as Tornado saw a change in the protection of north Atlantic convoys from Soviet attacks. As the 21st century dawned the spectre of terrorism and airborne threat changed to include the possibility of shooting down hijacked airliners, Britain's air defences diminished to 5 squadrons of Typhoons and the Aster SAMs of the Royal Navy, and Russian Air Force's Blackjacks and Bears still make forays into Britain's air defence zone. Battle Flight provides an in-depth examination of the history of Britain's air defence offering an insight into evolution up to the present day.

The Armed Forces Officer Richard Moody Swain,Albert C. Pierce,2017 In 1950, when he commissioned the first edition of The Armed Forces Officer, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that American military officers, of whatever service, should share common ground ethically and morally. In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

Fundamentals of Fighter Design Ray Whitford,2004 Traces the development of fighter design from World War One to the present day. Covers aerodynamics, stability and control, propulsion, structures and materials, avionics, armaments and tactics. The drawings and charts make this an informative book for enthusiasts and those with a professional interest in aircraft design.

Vulcan 607 Rowland White,2012 It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943... When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible.

You Suck at Racing Ian Korf,2016-05-12 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

Postwar Aircraft Jerry Scutts,2000-10-27 Postwar military aviation is dominated by the multi-role jet aircraft. This book looks at military jets from the F-86 Sabre of the Korean War through to the Tornados and F-18s of today and the key issues associated with accurate detailing, markings and camouflage schemes.

LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle Andreas Ciroth,Juliane Franze,2011 This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the divers effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability.This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

Modern Combat Aircraft Design Klaus Hünecke,1987 Discusses the characteristics of combat aircraft, aircraft design, aerodynamics, wing and tail design, stability, performance, maneuverability, avionics, and future developments. -- Amazon.com viewed November 5, 2020.

Aircraft Design Projects Lloyd R. Jenkinson,Jim Marchman,2003-04-28 Written with students of aerospace or aeronautical engineering firmly in mind, this is a practical and wide-ranging book that draws together the various theoretical elements of aircraft design - structures, aerodynamics, propulsion, control and others - and guides the reader in applying them in practice. Based on a range of detailed real-life aircraft design projects, including military training, commercial and concept aircraft, the experienced UK and US based authors present engineering students with an essential toolkit and reference to support their own project work. All aircraft projects are unique and it is impossible to provide a template for the work involved in the design process. However, with the knowledge of the steps in the initial design process and of previous experience from similar projects, students will be freer to concentrate on the innovative and analytical aspects of their course project. The authors bring a unique combination of perspectives and experience to this text. It reflects both British and American academic practices in teaching aircraft design. Lloyd Jenkinson has taught aircraft design at both Loughborough and Southampton universities in the UK and Jim Marchman has taught both aircraft and spacecraft design at Virginia Tech in the US. * Demonstrates how basic aircraft design processes can be successfully applied in reality * Case studies allow both student and instructor to examine particular design challenges * Covers commercial and successful student design projects, and includes over 200 high quality illustrations

From Spitfire to Eurofighter Roy Boot,1990 På basis af sit virke i den britiske flyindustri beretter forfatteren om den store teknologiske udvikling inden for fly og flyrelaterede våbensystemer i perioden 1941-1990.

Modern Military Aircraft Thomas Newdick,Tom Cooper,2013 Illustrated with hundreds of detailed artworks of aircraft and their markings, Modern Military Aircraft is a comprehensive study of the fighting aircraft of every nationality from the beginning of the Cold War to the present. The book is split into two volumes, the first detailing aircraft in the Cold War era, and the second outlining aircraft from 1990 to the present day. Chapters are divided by theatre, then further subdivided by conflict and nationality. The first volume provides a comprehensive study of the airplanes in service with NATO and the Warsaw Pact from the end of World War II until the reunification of Germany in 1989. Famous aircraft employed in various Cold War conflicts are included, such as the Gloster Meteor, MiG-17, and Republic F-84 Thunderstreak, as well as lesser-known models, such as the Yak 23 and Shenyang F-6. The second volume provides a detailed analysis of aircraft since 1990, including ubiquitous workhorses such as the F-16 Fighting Falcon, Dassault Rafale, and MiG-21, as well as the latest in

aviation technology, such as the Eurofighter EF2000, Sukhoi Su-30, and F-22A Raptor. Every type of aircraft is included, from frontline fighters, through transports, attack helicopters, reconnaissance aircraft, long-range bombers, and stealth fighters. Packed with more than 500 color artworks and photographs with exhaustive specifications, Modern Military Aircraft is a key reference for modelers and enthusiasts of modern military aviation.

The Nimrod Review Charles Haddon-Cave, Nimrod Review, 2009-10-28 On 2 September 2006, RAF Nimrod XV230 was on a routine mission in southern Afghanistan when she suffered a catastrophic mid-air fire, leading to the total loss of the aircraft and the death of the 12 crew and two mission specialists on board. An RAF Board of Inquiry (2007) concluded that the loss was caused by a fuel escape and its ignition by contact with an exposed element of the Cross-Feed/Supplementary Cooling Pack (SCP) duct. The Nimrod Review was set up to examine the arrangements for ensuring airworthiness and safe operation of the Nimrod MR2, to assess where responsibility lies for any failure and what lessons are to be learned. The Review concludes the most likely source of fuel was an overflow during air-to-air refuelling and agrees with the ignition source. It highlights design flaws introduced at three stages in the life of XV230, and failure to heed previous potentially relevant incidents. The Nimrod safety case drawn up between 2001 and 2005 is found to be error-strewn and incompetent and characterised by a general malaise, an assumption that the Nimrod was safe because it had flown for 30 years. The Review criticises BAE Systems, the MoD Nimrod Integrated Project Team, QinetiQ and individual personnel from those organisations involved in the safety case. Organisational causes are also identified: in-service support for equipment; major organisational changes between 1998 and 2008; and delays in procurement of the Nimrod MRA4 replacement. Lessons to be learned are profound and wide-ranging. Recommendations are made for a new approach in eight key areas: principles (leadership, independence, people, simplicity); the airworthiness regime; safety cases; aged aircraft; personnel strategy; industry strategy; procurement; safety culture. The loss of XV230 was avoidable and a systemic breach of the Military Covenant.

Unbroken (Movie Tie-in Edition) Laura Hillenbrand, 2018-08-21 #1 NEW YORK TIMES BESTSELLER • The incredible true story of survival and salvation that is the basis for two major motion pictures: 2014's Unbroken and the upcoming Unbroken: Path to Redemption. On a May afternoon in 1943, an Army Air Forces bomber crashed into the Pacific Ocean and disappeared, leaving only a spray of debris and a slick of oil, gasoline, and blood. Then, on the ocean surface, a face appeared. It was that of a young lieutenant, the plane's bombardier, who was struggling to a life raft and pulling himself aboard. So began one of the most extraordinary odysseys of the Second World War. The lieutenant's name was Louis Zamperini. In boyhood, he'd been a cunning and incorrigible delinquent, breaking into houses, brawling, and fleeing his home to ride the rails. As a teenager, he had channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics and within sight of the four-minute mile. But when war had come, the athlete had become an airman, embarking on a journey that led to his doomed flight, a tiny raft, and a drift into the unknown. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, a foundering raft, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. In her long-awaited new book, Laura Hillenbrand writes with the same rich and vivid narrative voice she displayed in Seabiscuit. Telling an unforgettable story of a man's journey into extremity, Unbroken is a testament to the resilience of the human mind, body, and spirit. Praise for Unbroken "Extraordinarily moving . . . a powerfully drawn survival epic."—The Wall Street Journal "[A] one-in-a-billion story . . . designed to wrench from self-respecting critics all the blurby adjectives we normally try to avoid: It is amazing, unforgettable, gripping, harrowing, chilling, and inspiring."—New York "Staggering . . . mesmerizing . . . Hillenbrand's writing is so ferociously cinematic, the events she describes so incredible, you don't dare take your eyes off the page."—People "A meticulous, soaring and beautifully written account of an extraordinary life."—The Washington Post "Ambitious and powerful . . . a startling narrative and an inspirational book."—The New York Times Book Review "Marvelous . . . Unbroken is wonderful twice over, for the tale it tells and for the way it's told. . . . It manages maximum velocity with no loss of subtlety."—Newsweek "Moving and, yes, inspirational . . . [Laura] Hillenbrand's unforgettable book . . . deserve[s] pride of place alongside the best works of literature that chart the complications and the hard-won triumphs of so-called ordinary Americans and their extraordinary time."—Maureen Corrigan, Fresh Air "Hillenbrand . . . tells [this] story with cool elegance but at a thrilling sprinter's pace."—Time "Unbroken is too much book to hope for: a hellride of a story in the grip of the one writer who can handle it."—Christopher McDougall, author of Born to Run

Defence Economics Keith Hartley, 2020-08-20 This Element introduces students, policy-makers, politicians, governments and business-people to this new discipline within economics. It presents the recent history of the subject and its range of coverage. Traditional topics covered include models of arms races, alliances, procurement and contracting, as well as personnel policies, industrial policies and disarmament. Newer areas covered include terrorism and the economics of war and conflict. A non-technical approach is used and the material will be accessible to both economists and general readers.
