*The Challenge* Alan Drake, 2023-12-28 God invites you to cast your cares on Him, because He cares for you (1 Peter 5:7). It is natural to seek first to meet our own needs and the needs of our family members, but God invites us to make an exchange. He invites us to cast our concerns on Him, and He promises to care for us better than we could take care of ourselves. In exchange, He desires for us to take on His concerns, His priorities, and seek His Kingdom first.

*The Dark Tree* Steven L. Isoardi, 2023-08-07 In the early 1960s, pianist Horace Tapscott gave up a successful career in Lionel Hampton's band and returned to his home in Los Angeles to found the Pan Afrikan Peoples Arkestra, a community arts group that focused on providing community-oriented jazz and jazz training. Over the course of almost forty years, the Arkestra, together with the related Union of God's Musicians and Artists Ascension collective, was at the forefront of the vital community-based arts movement in Black Los Angeles. Some three hundred artists—musicians, vocalists, poets, playwrights, painters, sculptors, and graphic artists—passed through these organizations, many ultimately remaining within the community and others moving on to achieve international fame. In *The Dark Tree*, Steven L. Isoardi draws on one hundred in-depth interviews with the Arkestra's participants to tell the history of the important and largely overlooked community arts movement of Black Los Angeles. This revised and updated edition brings the story of the Arkestra up to date, as its ethos and aesthetic remain vital forces in jazz and popular music to this day.

*Theatre/archaeology* Mike Pearson, Michael Shanks, 2001 *Theatre/Archaeology* is a brilliant and provocative challenge to disciplinary practice and intellectual boundaries in both archaeological and performance theory.

*Computer Science* Robert Sedgewick, Kevin Wayne, 2016-06-17 Named a Notable Book in the 21st Annual Best of Computing list by the ACM! Robert Sedgewick and Kevin Wayne's *Computer Science: An Interdisciplinary Approach* is the ideal modern introduction to computer science with Java programming for both students and professionals. Taking a broad, applications-based approach, Sedgewick and Wayne teach through important examples from science, mathematics, engineering, finance, and commercial computing. The book demystifies computation, explains its intellectual underpinnings, and covers the essential elements of programming and computational problem solving in today's environments. The authors begin by introducing basic programming elements such as variables, conditionals, loops, arrays, and I/O. Next, they turn to functions, introducing key modular programming concepts, including components and reuse. They present a modern introduction to object-oriented programming, covering current programming paradigms and approaches to data abstraction. Building on this foundation, Sedgewick and Wayne widen their focus to the broader discipline of computer science. They introduce classical sorting and searching algorithms, fundamental data structures and their application, and scientific techniques for assessing an implementation's performance. Using abstract models, readers learn to answer basic questions about computation, gaining insight for practical application. Finally, the authors show how machine architecture links the theory of computing to real computers, and to the field's history and evolution. For each concept, the authors present all the information readers need to build confidence, together with examples that solve intriguing problems. Each chapter contains question-and-answer sections, self-study drills, and challenging problems

that demand creative solutions. Companion web site ([introcs.cs.princeton.edu/java](http://introcs.cs.princeton.edu/java)) contains Extensive supplementary information, including suggested approaches to programming assignments, checklists, and FAQs Graphics and sound libraries Links to program code and test data Solutions to selected exercises Chapter summaries Detailed instructions for installing a Java programming environment Detailed problem sets and projects Companion 20-part series of video lectures is available at [informit.com/title/9780134493831](http://informit.com/title/9780134493831)

*Crewel Intentions* Hazel Blomkamp, 2014 Keeping to a theme started in *Crewel Twists*, this book continues the concept of using non-traditional techniques and materials in crewel or Jacobean embroidery. It showcases four large projects, each with an accompanying small project similar in technique, and shows needle workers how to be creative with threads, alternative stitches and beads. Traditional techniques are explained but are extended with the use of bead embroidery, needle lace techniques, and stitches not normally used in crewel work. Many new needle lace and bead embroidery techniques are incorporated, and the book also explores weaving techniques used to create textures like twill and lace weaves, as well as patterns similar to tartan and houndstooth check. Every project is clearly explained with step-by-step instructions and lots of photographs, and the completed embroideries are once again displayed in ways that are both decorative and functional in the home. Templates of the original designs complete this magnificent source for creative embroidery.

**One Degree of Change** Larry Jackson, 2015-01-23 This book was written for the person who understands that there is so much more for them to accomplish but just can't seem to breakthrough. One of the traps in life is being satisfied with a 211 degree life. This is a very good life and many would characterize it as a successful life. But for the person who should be living at 212 degrees they feel like the oyster with sand in its shell, very agitated. Many times they can't put their finger on what is wrong or what is needed. Even the Christian living a good life before God can feel that something is missing. The thing missing is their purpose. They love the Lord and all that He provides but they realize there is more they should be doing for Him. If you feel like you are not walking in your purpose then this is the book for you! *One Degree of Change: How to Succeed Now!* will open your heart and mind to just how close you really are to accomplishing what the Lord has designed you for. It will provide much needed answers for your advancement. Because you are only one degree from the success you desire.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an

American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

It will change the way you view the origins of mankind and the current state of society. No subject is too controversial for Marrs, an award-winning journalist whose other investigative works include *Crossfire: The Plot That Killed Kennedy*, the basis for the Oliver Stone film *JFK*; *Rule by Secrecy*; and *The Trillion-Dollar Conspiracy*.

**Agents of Transculturation** Sebastian Jobs, Gesa Mackenthun, 2013 Ever since antiquity, but increasingly since the global transformation of the world order in the early modern period, communication between members of different cultural groups depended on translators, diplomats, traders, and other specialists with a knowledge of both cultures. Successful communication and traffic relied on the mediating agency of persons who had been exposed, often in their childhood or through captivities, to the customs and languages of both cultures involved in the contact. Other border crossers and go-betweens acted as missionaries, traders, political refugees, beachcombers, pirates, anthropologists, actors in zoos, runaway slaves, and itinerant doctors. Because of their frequently precarious lives, the written traces left by these figures are often thin. While some of their lives have to be carefully reconstructed through critical readings of the documents left by others (frequently by their enemies), others have left autobiographical texts which allow for a richer assessment of their function as cultural border crossers and mediators. With examples covering from various historical periods between the early modern period and the present, as well as geographical areas such as the Mediterranean, Africa, the Americas, Hawaii, New Zealand and northern Europe, scholars from various disciplines and methodological backgrounds - reaching from history to religious studies and from literary studies to ethnology - fathom the intricacies of in-betweenness and reflect on the impact which agents of transculturation have in situations of cultural, social and political encounters.
