Kellie Wells

Vicious Jon T. Coleman, 2008-10-01 Over a continent and three centuries, American livestock owners destroyed wolves to protect the beasts that supplied them with food, clothing, mobility, and wealth. The brutality of the campaign soon exceeded wolves' misdeeds. Wolves menaced property, not people, but storytellers often depicted the animals as ravenous threats to human safety. Subjects of nightmares and legends, wolves fell prey not only to Americans' thirst for land and resources but also to their deeper anxieties about the untamed frontier. Now Americans study and protect wolves and jail hunters who shoot them without authorization. Wolves have become the poster beasts of the great American wilderness, and the federal government has paid millions of dollars to reintroduce them to scenic habitats like Yellowstone National Park. Why did Americans hate wolves for centuries? And, given the ferocity of this loathing, why are Americans now so protective of the animals? In this ambitious history of wolves in America—and of the humans who have hated and then loved them—Jon Coleman investigates a fraught relationship between two species and uncovers striking similarities, deadly differences, and, all too frequently, tragic misunderstanding.

Maps and Legends Michael Chabon, 2011-12-20 The Pulitzer Prize winner explores the literary joys of sci-fi and superheroes, gumshoes and goblins, and the stories that bring us together. "I read for entertainment, and I write to entertain. Period." Such is the manifesto of Michael Chabon, an author of indisputable literary renown who maintains a fierce appreciation of the seductive arts of so-called "genre" fiction. In this lively collection of sixteen critical and personal essays, the author of *The Amazing Adventures of Kavalier & Clay* champions the cause of westerns, horror, and all the stories, comics, and pulp fiction that get pushed aside when literary discussion turns serious. Whether he's taking up Superman or Sherlock Holmes, Poe or Proust, Chabon makes it his emphatic mission to explore the reasons we tell one another tales. Throughout, Chabon reveals his own blooming as a writer, from *The Mysteries of Pittsburgh* to *The Yiddish Policeman's Union*. He is living proof of his theory that the stories

that give us great pleasure are in many ways our truest, best art—the building blocks of our shared imagination—and in *Maps and Legends*, he “makes an inviting case for bridging the gap between popular and literary writing” (O, The Oprah Magazine). This ebook features a biography of the author.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.*Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Jakarta Method Vincent Bevins,2020-05-19 NAMED ONE OF THE BEST BOOKS OF 2020 BY NPR, THE FINANCIAL TIMES, AND GQ The hidden story of the wanton slaughter -- in Indonesia, Latin America, and around the world -- backed by the United States. In 1965, the U.S. government helped the

Indonesian military kill approximately one million innocent civilians. This was one of the most important turning points of the twentieth century, eliminating the largest communist party outside China and the Soviet Union and inspiring copycat terror programs in faraway countries like Brazil and Chile. But these events remain widely overlooked, precisely because the CIA's secret interventions were so successful. In this bold and comprehensive new history, Vincent Bevins builds on his incisive reporting for the Washington Post, using recently declassified documents, archival research and eye-witness testimony collected across twelve countries to reveal a shocking legacy that spans the globe. For decades, it's been believed that parts of the developing world passed peacefully into the U.S.-led capitalist system. The Jakarta Method demonstrates that the brutal extermination of unarmed leftists was a fundamental part of Washington's final triumph in the Cold War.

Fat Girl, Terrestrial Kellie Wells, 2012-09-04 Not only the story of a colossus of a woman living in Kansas, *Fat Girl, Terrestrial* is also a meditation on God, treachery, and blind love. In Kingdom Come, Kansas, a town from which children once mysteriously disappeared, there lives a giant woman. Wallis Armstrong is not a pituitary mutant or a person battling a rare medical condition; she's just an improbably large woman ill at ease in a world built for shrimps. Paradoxically, Wallis builds miniatures of crime scenes, and her specialty is staged suicides. She constructed her first diorama as a child when a boy in her fourth-grade class went suddenly missing. Wallis's brother, Obie, believes the only explanation for his sister's amplitude is that she is the incarnation of God on Earth, and he is her one true ardent disciple. Until he too disappears. Kellie Wells's story of Wallis's odyssey through this tight-fitting world is a churlish meditation on the existence and nature of God as well as an exploration of the treachery of childhood and the destructive nature of the most blindly abiding kind of love: that of a love-struck brother for a big

sister, a disciple for an unwilling prophet, and a bone-weary god for a savage and disappointing flock.

The Known World Edward P. Jones,2009-03-17 From Edward P. Jones comes one of the most acclaimed novels in recent memory—winner of the Pulitzer Prize for Fiction and the National Book Critics Circle Award for Fiction. *The Known World* tells the story of Henry Townsend, a black farmer and former slave who falls under the tutelage of William Robbins, the most powerful man in Manchester County, Virginia. Making certain he never circumvents the law, Townsend runs his affairs with unusual discipline. But when death takes him unexpectedly, his widow, Caldonia, can't uphold the estate's order, and chaos ensues. Edward P. Jones has woven a footnote of history into an epic that takes an unflinching look at slavery in all its moral complexities. “A masterpiece that deserves a place in the American literary canon.”—Time

Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini,1990-03-22 In *Ship Modeling Simplified*, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like

sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects. Ship Modeling Simplified even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

The Carcharodons' remit is an unenviable one - this Chapter of Space Marines plies the dark areas of space, endlessly hunting down the enemies of mankind. With a fresh wave of tyrannid hive fleets approaching the galactic plane, the Carcharodons decide to use the world of Piety V as a bulwark. If they can stop the xenos here, they will be able to end the menace before it begins. American Wildlife Art David J. Wagner, 2008

Think Like a Mountain Aldo Leopold, 2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. In this lyrical meditation on America's wildlands, Aldo Leopold considers the different ways humans shape the natural landscape, and describes for the first time the far-reaching phenomenon now known as 'trophic cascades'. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a

movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.
