Whispering Death Mark Johnston, 2011-08-01 Powerful, authoritative and provocative, this is the first one-volume history of the RAAF's immense conflict with Japan.

Imperial Japanese Navy Aces 1937-45 Henry Sakaida, 2012-10-20 The outcome of the Pacific War was heavily influenced by the results of naval battles between the Imperial Japanese fleet and the US Navy. One of the key elements was Japan's large fighter component, which had gained experience over Manchuria, China and Mongolia in the late 1930s. Flying A5Ms, at least 21 pilots achieved 'acedom' securing air superiority for the invaders. Manufacturer Mitsubishi derived much from these campaigns, producing one of the best fighters of the War, the A6M Zero-Sen. Navy pilots proved to be highly skilled when engaged by the Allied forces, Pacific. Pilots like Nishizawa, Sagita and Sakai scoring more than 60 kills apiece.

Japanese Aircraft of World War II Thomas Newdick, 2017 Illustrated with detailed artworks of Japanese aircraft and their markings, Japanese Aircraft of World War II is a detailed guide to all the aircraft deployed by the Japanese military from the Second Sino-Japanese War to the surrender in the Pacific in August 1945. Organized alphabetically by manufacturer, this book includes every type of aircraft, from fighters to seaplanes, bombers, reconnaissance aircraft, torpedo bombers and carrier aircraft. All the best-known types are featured, such as the Mitsubishi G4M 'Betty', Nakajima B6N2 Tenzan, Aichi B7A2 Ryusei torpedo bomber and the world-famous Mitsubishi A6M 'Zero' fighter. The entries are accompanied by exhaustive captions and specifications. The guide is illustrated with profile artworks, three-views, and special cutaway artworks of the more famous aircraft in service, such as the Aichi D3A1 'Val', Mitsubishi A6M2 Reisen, and Nakajima Ki.27 'Nate'. Illustrated with more than 120 artworks, Japanese Aircraft of World War II is an essential reference guide for modellers and enthusiasts with an interest in military aircraft of World War II.

Japanese Naval Fighter Aces Ikuhiko Hata, Yashuho Izawa, Christopher Shores, 2013-03-01 This book is as good as we are likely to get on the subject in English. For Pacific Theater aerophiles, it's a must-have. --Barrett Tillman, author of Whirlwind Vivid account of Japanese navy fighter units in combat Contains biographies of all pilots claiming ace status Includes photos of planes like the Zero fighter and the pilots who flew them

British Battlecruisers of the Second World War Steve Backer, 2013-07-04 The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sisterships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic survey of selected high-

quality models in a variety of scales, and the book concludes with a section on research references—books, monographs, large-scale plans and relevant websites. The latest in this series covers the three ships of this First World War type, Hood, Repulse and Renown, which survived to fight in the Second. Still the fastest capital ships in the world in 1939, their protection was not up to contemporary standards and two were famously lost in action. Hood in an old-fashioned gunnery duel, but Repulse succumbed to the more modern threat of aerial attack. The one modernised ship, Renown, survived an adventurous wartime career.

China's Wings Gregory Crouch, 2012-02-28 From the acclaimed author of *Enduring Patagonia* comes a dazzling tale of aerial adventure set against the roiling backdrop of war in Asia. The incredible real-life saga of the flying band of brothers who opened the skies over China in the years leading up to World War II—and boldly safeguarded them during that conflict—*China's Wings* is one of the most exhilarating untold chapters in the annals of flight. At the center of the maelstrom is the book's courtly, laconic protagonist, American aviation executive William Langhorne Bond. In search of adventure, he arrives in Nationalist China in 1931, charged with turning around the turbulent nation's flagging airline business, the China National Aviation Corporation (CNAC). The mission will take him to the wild and lawless frontiers of commercial aviation: into cockpits with daredevil pilots flying—sometimes literally—on a wing and a prayer; into the dangerous maze of Chinese politics, where scheming warlords and volatile military officers jockey for advantage; and into the boardrooms, backrooms, and corridors of power inhabited by such outsized figures as Generalissimo and Madame Chiang Kai-shek; President Franklin Delano Roosevelt; foreign minister T. V. Soong; Generals Arnold, Stilwell, and Marshall; and legendary Pan American Airways founder Juan Trippe. With the outbreak of full-scale war in 1941, Bond and CNAC are transformed from uneasy spectators to active participants in the struggle against Axis imperialism. Drawing on meticulous research, primary sources, and extensive personal interviews with participants, Gregory Crouch offers harrowing accounts of brutal bombing runs and heroic evacuations, as the fight to keep one airline flying becomes part of the larger struggle for China's survival. He plunges us into a world of perilous night flights, emergency water landings, and the constant threat of predatory Japanese warplanes. When Japanese forces capture Burma and blockade China's only overland supply route, Bond and his pilots must battle shortages of airplanes, personnel, and spare parts to airlift supplies over an untried five-hundred-mile-long aerial gauntlet high above the Himalayas—the infamous “Hump”—pioneering one of the most celebrated endeavors in aviation history. A hero's-eye view of history in the grand tradition of Lynne Olson's *Citizens of London*, *China's Wings* takes readers on a mesmerizing journey to a time and place that reshaped the modern world.

History of United States Naval Operations in World War II Samuel Eliot Morison, 2002-02-05 This final narrative volume of Morison's history recounts the infamous campaigns for Iwo Jima and Okinawa, two of the most bitterly contested campaigns of the war. When the U.S. Marines landed on Iwo Jima, they expected to secure it within a few days. No one had anticipated Japan's determination to defend the island to the last man. Morison describes the Japanese defense system of camouflaged rifle pits and fortified gunning positions that held the Allies at bay and the heavy and continuous cover of naval gunfire that prevented even greater losses. As it was, the securing of Iwo Jima cost the United States more casualties than had been incurred in taking any other island in the Pacific. On Okinawa, the conflict stretched over six long, bloody months. As land forces struggled for every inch they took on the islands, the U.S. Navy faced the desperate fury of the kamimaze corps and its harvest of flaming terror:

explosions, burning and flooded ships, searing injuries and death. Fierce weather, logistical complexities, Japanese submarines, and the unexpected death of President Roosevelt also took their toll. Morison concludes his epic account with the final skirmishes of the war, the fateful decision to drop the atomic bomb, and the delicate negotiations leading to Japanese surrender.

History of United States Naval Operations in World War II: The rising sun in the Pacific, 1931-April 1942 Samuel Eliot Morison, 2001 Volume III: The Rising Sun in the Pacific, 1931-April 1942 chronicles the difficult early months of the campaign in the Pacific, detailing the navy's reverses at Wake Island, in the Philippines, and along the Malay Barrier.

Kugisho E14y Glen Ryusuke Ishiguro, Januszewski, 2012-06 Only one enemy aircraft has ever dropped bombs on mainland USA - and that aircraft was a submarine-launched Glen floatplane. This book tells the story of the design, development and operational use of the E14Y1 Glen. Included are details of earlier Japanese submarine-launched aircraft, and of the submarines designed and used as seaplane carriers. Profusely illustrated with photos, plans and color profiles - plus a description and photos of the only remnants of the E14Y1 still in existence, submerged aboard the hulk of the Akibasan Maru off Kwajalein Atoll in the Pacific.

Intelligent Design is one of the hottest issues facing parents and educators to day, but it can be hard to separate the facts from the heated rhetoric. This expert and objective guide gets to the bottom of the questions: What is Intelligent Design? Should it replace or complement traditional science? What's all the fuss about? * Explains the terms, the controversy, and the involvement of the American courts * Indispensable guide for concerned educators and parents * Written by an expert in the field

Judy Damien Lewis, 2014-12-02 British bestselling author Damien Lewis is an award-winning journalist who has spent twenty years reporting from war, disaster, and conflict zones. Now Lewis brings his first-rate narrative skills to bear on the inspiring tale of Judy--an English pointer who perhaps was the only canine prisoner of war. After being bombed and shipwrecked repeatedly while serving for several wild and war-torn years as a mascot of the World War II Royal Navy Yangtze river gunboats the Gnat and the Grasshopper, Judy ended up in Japanese prisoner of war camps in North Sumatra. Along with locals as slave labor, the American, Australian, and British POWs were forced to build a 1,200-mile single-track railroad through the most horrifying jungles and treacherous mountain passes. Like the one immortalized in the film *The Bridge on the River Kwai*, this was the other death-railroad building project where POWs slaved under subhuman conditions. In the midst of this living hell was a beautiful and regal-looking liver and white English pointer named Judy. Whether she was scavenging food to help feed the starving inmates of a hellish Japanese POW camp, or by her presence alone bringing inspiration and hope to men, she was cherished and adored by the Allied servicemen who fought to survive alongside her. Judy's uncanny ability to sense danger, matched with her quick thinking and impossible daring saved countless lives. More than a close companion she shared in both the men's tragedies and joys. It was in recognition of the extraordinary friendship and protection she offered amidst the unforgiving and savage environment of a Japanese prison camp in Indonesia that she gained her formal status as a POW. From the author of *The Dog Who Could Fly* and the co-author of *Sergeant Rex* and *It's All About Treo* comes one of the most heartwarming and inspiring tales you will ever read.

F4F Wildcat vs A6M Zero-sen Edward M. Young, 2013-08-20 The Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen were contemporaries, although designed to very different requirements. The Wildcat, ruggedly built to survive the

rigors of carrier operations, was the best carrier fighter the US Navy had available when the USA entered World War II, and it remained the principal fighter for the US Navy and the US Marine Corps until 1942-43. With a speed greater than 300mph, exceptional manoeuvrability, long range, and an impressive armament the slick Zero-sen could out-perform any Allied fighter in 1941-42. The battles between the Wildcat and the Zero-sen during 1942 represent a classic duel in which pilots flying a nominally inferior fighter successfully developed air-combat tactics that negated the strengths of their opponent.

Technology and Industrial Development in Japan Hiroyuki Odagiri, Akira Gotō, 1996 This book studies the industrial development of Japan since the mid-nineteenth century, with particular emphasis on how the various industries built technological capabilities. The Japanese were extraordinarily creative in searching out and learning to use modern technologies, and the authors investigate the emergence of entrepreneurs who began new and risky businesses, how the business organizations evolved to cope with changing technological conditions, and how the managers, engineers, and workers acquired organizational and technological skills through technology importation, learning-by-doing, and their own R & D activities. The book investigates the interaction between private entrepreneurial activities and public policy, through a general examination of economic and industrial development, a study of the evolution of management systems, and six industrial case studies: textile, iron and steel, electrical and communications equipment, automobiles, shipbuilding and aircraft, and pharmaceuticals. The authors show how the Japanese government has played an important supportive role in the continuing innovation, without being a substitute for aggressive business enterprise constantly venturing into unfamiliar terrains.

Eagles of the Southern Sky Luca Ruffato, Michael John Claringbould, 2012 The definitive history of the Imperial Japanese Tainan Naval Air Group – the most prestigious of any Japanese aerial unit in World War 2. It was assigned New Guinea in April 1942, confident of victory, having already conquered the Philippines and Dutch East Indies. However, by mid-November 1942 only eighteen pilots from the original cadre sailed home from Rabaul, marking the end of an era. This book outlines the definitive history of this flagship unit in New Guinea, sourcing material from all sides of the conflict.

Japanese Capitalism Since 1945 Tessa Morris-Suzuki, Takurō Seiyama, 1989 A collection of critical Marxian analyses by Japanese economists assessing aspects of the Japanese economy. Considered to be an important contribution to Japanese economic literature, these opinions on Japanese capitalism have not been available in English until now.

The Illustrated Encyclopedia of Combat Aircraft of World War II Bill Gunston, 1978 Contains more than seven hundred illustrations of military aircraft of World War II used by both Allied and Axis Countries, together with capsule specifications and history
