**Handbook on High-Speed Rail and Quality of Life** Yoshitsugu Hayashi,Ke Seetha Ram,Shreyas Bharule,2020-12-29 Handbook on High-Speed Rail and Quality of Life outlines global experiences of high-speed rail development, including its construction, impacts, and planning, with a special focus on countries that are planning implementation in the coming decade. High-speed rail infrastructure can bring considerable socioeconomic benefits that cannot be captured through econometric modeling alone. Thus, analysis of the true impacts requires a scalar as well as a temporal lens. The studies in this handbook discuss transport infrastructure projects of varying geographic scale and describe the underlying complexities of developing an infrastructure system while focusing on the aspects that can enhance quality of life. The cases, concepts, and ideas presented in this handbook were discussed and refined during a conference and seminar series held at the Asian Development Bank Institute in Tokyo and special sessions on transport and quality of life at the 15th World Conference on Transport Research at the Indian Institute of Technology Bombay in Mumbai. The special sessions were jointly organized by the Asian Development Bank Institute and World Conference on Transport Research Society Special Interest Group A4, High-Speed Rail: Policy, Investment, and Impacts. The conference and special sessions highlighted critical issues and delivered key messages on the broad research on high-speed rail and quality of life.

**Kaigun** David Evans,Mark Peattie,2015-01-15 One of the great spectacles of modern naval history is the Imperial Japanese Navy's instrumental role in Japan's rise from an isolationist feudal kingdom to a potent military empire

stridently confronting, in 1941, the world's most powerful nation. Years of painstaking research and analysis of previously untapped Japanese-language resources have produced this remarkable history of the navy's dizzying development, tactical triumphs, and humiliating defeat. Unrivaled in its breadth of coverage and attention to detail, this important new study explores the foreign and indigenous influences on the navy's thinking about naval warfare and how to plan for it. Focusing primarily on the much-neglected period between the world wars, David C. Evans and Mark R. Peattie, two widely esteemed historians, persuasively explain how the Japanese failed to prepare properly for the war in the Pacific despite an arguable advantage in capability.

The Japanese Destroyer Akizuki Mariusz Motyka, Łukasz Stach, 2013 The book is primarily focused on the development history, technical data, design features, and the battle record of the Akizuki class destroyers, including their combat trail and the fate awaited that them.

**The History of Korea (Vol.1&2)** Homer B. Hulbert, 2023-12-13 The History of Korea presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not necessarily originating Korea's first civilization, and the Malay element imposed its language in its main features in the entire peninsula.

Nuclear War Raymond G. Wilson, 2014 Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. [Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind

of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. --Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohno, 1986 America can do whatever we set our mind to. --Barack Obama

The completely updated second edition adds a new section on use of inlet cooling for power augmentation and NOx control. It explores the full spectrum of gas turbines hardware, typical application scenarios, and operating parameters, controls, inlet treatments, inspection, troubleshooting, and more. The author discusses strategies that can help readers avoid problems before they occur and provides tips that enable diagnosis of problems in their early stages and analysis of failures to prevent their recurrence.

Making Waves J. Schencking, 2005-01-18 This book explores the political emergence of the Imperial Japanese Navy between 1868 and 1922. It fundamentally challenges the popular notion that the navy was a 'silent,' apolitical service. Politics, particularly budgetary politics, became the primary domestic focus--if not the overriding preoccupation--of Japan's admirals in the prewar period. This study convincingly demonstrates that as the Japanese polity broadened after 1890, navy leaders expanded their political activities to secure appropriations commensurate with the creation of a world-class blue-water fleet. The navy's sophisticated political efforts included lobbying oligarchs, coercing cabinet ministers, forging alliances with political parties, occupying overseas territories, conducting well-orchestrated naval pageants, and launching spirited propaganda campaigns. These efforts succeeded: by 1921 naval expenditures equaled nearly 32 percent of the country's total budget, making Japan the world's third-largest maritime power. The navy, as this book details, made waves at sea and on shore, and in doing so significantly altered the state, society, politics, and empire in prewar Japan.
