Handbook on High-Speed Rail and Quality of Life Yoshitsugu Hayashi,Ke Seetha Ram,Shreyas Bharule,2020-12-29 Handbook on High-Speed Rail and Quality of Life outlines global experiences of high-speed rail development, including its construction, impacts, and planning, with a special focus on countries that are planning implementation in the coming decade. High-speed rail infrastructure can bring considerable socioeconomic benefits that cannot be captured through econometric modeling alone. Thus, analysis of the true impacts requires a scalar as well as a temporal lens. The studies in this handbook discuss transport infrastructure projects of varying geographic scale and describe the underlying complexities of developing an infrastructure system while focusing on the aspects that can enhance quality of life. The cases, concepts, and ideas presented in this handbook were discussed and refined during a conference and seminar series held at the Asian Development Bank Institute in Tokyo and special sessions on transport and quality of life at the 15th World Conference on Transport Research at the Indian Institute of Technology Bombay in Mumbai. The special sessions were jointly organized by the Asian Development Bank Institute and World Conference on Transport Research Society Special Interest Group A4, High-Speed Rail: Policy, Investment, and Impacts. The conference and special sessions highlighted critical issues and delivered key messages on the broad research on high-speed rail and quality of life.

The History of Korea (Vol.1&2) Homer B. Hulbert,2023-12-13 The History of Korea presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not necessarily originating Korea's first civilization, and the Malay element imposed its language in its main features in the entire peninsula.

The Japanese Destroyer Akizuki Mariusz Motyka,Łukasz Stach,2013 The book is primarily focused on the development history, technical data, design features, and the battle record of the Akizuki class destroyers, including their combat trail and the fate awaited that them.

Kaigun David Evans,Mark Peattie,2015-01-15 One of the great spectacles of modern naval history is the Imperial Japanese Navy's instrumental role in Japan's rise from an isolationist feudal kingdom to a potent military empire stridently confronting, in 1941, the world's most powerful nation. Years of painstaking research and analysis of previously untapped Japanese-language resources have produced this remarkable history of the navy's dizzying development, tactical triumphs, and humiliating defeat. Unrivaled in its breadth of coverage and attention to detail, this important new study explores the foreign and indigenous influences on the navy's thinking about naval warfare and how to plan for it. Focusing primarily on the much-neglected period between the world wars, David C. Evans and Mark R. Peattie, two widely esteemed historians, persuasively explain how the Japanese failed to prepare properly for the war in the Pacific despite an arguable advantage in capability.

French Cruisers, 1922–1956 Jean Moulin,John Jordan,2013-03-04 A technical analysis and pictorial history of the French navy cruisers built in the early to mid-twentieth century. The French produced some of the most striking and innovative interwar cruiser designs. A large amount of new information about these ships has become available over the past twenty years in France, but this book is the first to make this accessible to an English-speaking readership. Part I explains the design philosophy behind each of the classes built after 1922, and outlines the characteristics of each type, accompanied by detailed data tables and a comprehensive set of specially-drawn plans based on official documents, as well as carefully-selected photographs. Coverage includes the De Grasse, laid down in August 1939 and completed postwar as an AA cruiser, and also the heavy cruisers of the Saint Louis class intended to follow her, about which little has been published. Part II deals with the historical side, covering not only the eventful careers of these ships, but also explaining the peacetime organization of the Marine Nationale, the complex politics of this turbulent period and their impact on the navy. Like its highly successful predecessor, French Battleships, this beautifully presented book subtly blends technical and historical analysis to produce what must become the standard reference work. Praise for French Cruisers “A clearly-written and excellently presented book which, particularly with respect to its technical descriptions, explains its chosen subject area in a convincing and comprehensive fashion. The authors are to be commended for their achievement in bringing knowledge of a previously sparsely-covered subject to an English language readership.” –Warship Annual 2014

The Imperial Japanese Navy Frederick Thomas Jane,1904

Making Waves J. Schencking,2005-01-18 This book explores the political emergence of the Imperial Japanese Navy between 1868 and 1922. It fundamentally challenges the popular notion that the navy was a 'silent,' apolitical service. Politics, particularly budgetary politics, became the primary domestic focus—if not the overriding preoccupation—of Japan's admirals in the prewar period. This study convincingly demonstrates that as the Japanese

polity broadened after 1890, navy leaders expanded their political activities to secure appropriations commensurate with the creation of a world-class blue-water fleet. The navy's sophisticated political efforts included lobbying oligarchs, coercing cabinet ministers, forging alliances with political parties, occupying overseas territories, conducting well-orchestrated naval pageants, and launching spirited propaganda campaigns. These efforts succeeded: by 1921 naval expenditures equaled nearly 32 percent of the country's total budget, making Japan the world's third-largest maritime power. The navy, as this book details, made waves at sea and on shore, and in doing so significantly altered the state, society, politics, and empire in prewar Japan.

Nuclear War Raymond G. Wilson,2014 Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. --Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohn, 1986 America can do whatever we set our mind to. --Barack Obama

Embedded Racism Debito Arudou,2021-11-26 Revised and updated for this Second Edition, *Embedded Racism* is the product of three decades of work by a scholar living in Japan as a naturalized Japanese citizen. It offers a perspective into how Japan's overlooked racial discrimination not only undermines Japan's economic future but also emboldens white supremacists worldwide.

Clash of The Carriers Barrett Tillman,2006-11-07 From the national bestselling coauthor of *Dragon's Jaw*, here is the incredible true story of the most spectacular aircraft carrier battle in history, World War II's Great Marianas Turkey Shoot. "Superb... the greatest naval air battle of all time finally receives the meticulous and comprehensive treatment it deserves."--Richard Frank, author of *Tower of Skulls* In June, 1944, American and Japanese carrier fleets made their way toward one another in the Philippine Sea. Their common objective: the strategically vital Marianas Islands. During two days of brutal combat, the American and Japanese carriers dueled, launching wave after wave of fighters and bombers against one another. By day and night, hundreds of planes filled the skies. When it was over, the men of the American Fifth Fleet had claimed more than four hundred aerial combat victories, and three Japanese carriers lay on the bottom of the Pacific Ocean. Here is the true account of those great and terrible days--by those who were there, in the thick of the Battle of the Philippine Sea. Drawing upon numerous interviews with American and Japanese veterans as well as official sources, *Clash of the Carriers* is an unforgettable testimonial to the bravery of those who fought and those who died in a battle that will never be forgotten. "In his inimitable style, naval aviation's most prolific historian comes through with a much-needed, comprehensive documentary on the greatest aircraft carrier battle of all time."--Cdr. Alexander Vraciu, USN (Ret) Fighting Squadron 16, 1944
