Creating Back Scenes for Model Railways and Dioramas David Wright,2017-03-31 A model railway layout is greatly enhanced by a good back scene - if a modeller is prepared to go to great lengths to achieve realism in the locomotives, rolling stock and buildings, this should be carried through to the scenics. This book is a comprehensive guide for both railway and diorama modellers to create convincing back scenes. It covers choosing the right materials; rural and urban back scenes; traditional painted back scenes; producing back scenes with camera and/or computer; the correct use of forced perspective and scale reduction; getting the transition from layout to back scene right and, finally, lighting and presentation. Aimed at all modellers, especially but not exclusively railway modellers, and superbly illustrated with over 300 colour photographs and diagrams.

Modelling Railway Scenery Volume 2 Anthony A Reeves,2015-04-30 Whether you are just about to embark on your scenic modelling journey, or want to re-work an existing layout, this clearly written volume will be invaluable. The author guides you through the process of collecting field-trip information, both written and photographic, and then demonstrates, using step-by-step instructions, how the colours, textures and features depicted in the reference photographs can be replicated to create a wonderful model landscape. The author describes in detail the modelling techniques he employs to create long and short grass, crop, fallow and freshly ploughed fields, trimmed hedges, mature hedgerows, hedgerow trees, broadland trees in summer, Scots pine trees, silver birch, autumn and winter trees, as well as dead and fallen trees and trees in half relief. Finally, he brings together all the features that have been covered in the book and describes the building of a scale model representation of the field trip photographs in the form of a 3 x 2 ft diorama. Aimed at all those railway modellers who wish to create attractive, realistic scenery for their layouts, brimming with advice and tips and with over four hundred inspirational reference colour images and colour instructional photographs. A sister volume to Modelling Railway Scenery Volume 1 - Cuttings, Hills, Mountains, Streams and Lakes (Crowood 2013).

Constructing Buildings for Model Railways David Ashwood,2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and

detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini movie set, construct a major London terminus and patch repair what could be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.

**Essential Model Railroad Scenery Techniques** Pelle K. Søbørg, 2009 Learn how to construct the most common forms of scenery: mountains, deserts, rural areas, and city scenes. This book provides essential scenery tips and techniques through highly detailed photos and step-by-step instructions.

*Modelling Historic Buildings and Imaginary Structures* David Wright, 2021-01-25 This book demonstrates the many different modelling techniques used in the creation of realistic historical buildings and convincing imaginary or fantasy structures. Aimed at the railway and diorama modeller, it includes photographs of existing structures, detailed illustrations and plans, followed by step-by-step photographs of the various stages in their creation; practical tips and constructive advice are provided alongside. Special emphasis has been placed on the use of scrap and low-cost materials. It gives guidance on modelling imaginary buildings and structures, with an example project presented from start to finish and also a complete fantasy-based model railway diorama, from concept and design through to the completed layout is covered. The author has written this book to inspire the modeller to try something innovative, and to attract new entrants to this creative hobby. Drawing on his own experience, he shares practical guidance to help the reader to produce models they will be proud of.

*Creating a Military Modelling Diorama* Terry Booker, 2021-07-26 Creating a diorama offers modellers a chance to display their figures and vehicles in a realistic setting, often providing a 'snapshot' of a moment in history. This book provides step-by-step instructions on how to plan, design and build a diorama and is suitable for new and more experienced modellers. With over 270 colour photographs, it considers all scales from 1/87 (H0) to 1/32 and their implications for the diorama builder. The importance of research to ensure historical accuracy is emphasized. Advice is given on

the creation of dioramas in different scales and sizes. It demonstrates the techniques required to achieve effective results for landscapes, terrain and vegetation. Finally, examples are included from the Napoleonic Wars, American Civil War, World War I and World War II.

*Making Rural Buildings for Model Railways* David Wright, 2013-04-22 This invaluable, well-illustrated book is essential reading for all those who are interested in developing their modelling skills and creating realistic models of country houses, cottages and farm buildings for their railway layouts. The author encourages and inspires the reader and, moreover, emphasizes that railway modellers can achieve their objectives without purchasing expensive materials. Indeed, all the materials recommended in the book are either recycled or can be obtained quite cheaply. Topics covered include: The materials and equipment required to build models; Modelling methods and construction techniques; Painting, weathering and finishing; Creating a sympathetic setting for your models; Improving kits and 'off-the-shelf' models. The author presents in detail three different rural, scratch-built projects and, in a separate appendix, provides a colour reference guide, thus enabling the modeller to apply the correct colours and shades in order to create authentic and convincing-looking model buildings. An invaluable guide which provides all the information required to create convincing models of rural buildings. Aimed at all those interested in railway modelling whatever their level of ability, and those interested in modelling in general rather than in just railway modelling. Materials and equipment, modelling methods and construction techniques are covered. Superbly illustrated with 320 colour step-by-step photographs and diagrams. David Wright is a professional artist and model maker and provides hands-on experience at railway modelling workshops.

*Model Railroading As Art* Lance Mindheim, 2018-12 Model railroading offers the exciting opportunity to be approached in the same way as any other branch of the art world. As such, the same principles can be applied to elevate your modeling efforts to new levels. Follow along as we delve into scene composition, color treatment theory, weathering, backdrops, layout room preparation, photography, and more!

*Flames Beyond Gettysburg* Scott L. Mingus, 2011 The Gettysburg Campaign has been examined in detail from nearly every aspect but one: the key role played by Richard Ewell's Second Corps during the final days in June. This is the first in-depth study of these crucial summer days that not only shaped the course of the Gettysburg Campaign, but altered the course of our nation's history.

*Cut & Assemble an Old-Fashioned Train in Full Color* A. G. Smith, 1987-01-01 Relive the exciting days of the fiery chariot with this ready-to-be-assembled model of a steam-driven passenger train.

Meticulously rendered replica includes a locomotive, passenger car, boxcar, and caboose. Complete illustrated instructions ensure easy assembly. Water tower (6 1/4 inches tall) and station (8 1/4 inches x 5 inches x 4 3/4 inches) also included.

**How to Build Dioramas** Sheperd Paine,2000 Learn everything you need to know about making your dioramas look real! This fantastic revised edition will show you how with new projects, new photos, and expert tips. Includes painting, weathering, and detailing tips for figures, aircraft, vehicles, and more! By Sheperd Paine.

**Sumpter Valley Logging Railroads** Alfred Mullett,Leonard Merritt,2011 In 1889, David Eccles chartered the Oregon Lumber Company, an organization that produced many mills and railways and whose influence was felt from Salt Lake City to Northern California and Idaho. Through family connections, Eccles was also involved with many other logging enterprises, and he influenced the growth of the Inter-Mountain region as well as the Pacific Northwest. Sumpter Valley Logging Railroads is a pictorial history of the Oregon operations, focusing on the operations along the Sumpter Valley Railway. It explores the rails, mills, and people, as well as the logging practices of a bygone era.

Cat and the Mouse and the Runaway Train Peter Bently,2014-08-07 From the winner of the Roald Dahl Funny Prize comes a pacy rhyming adventure, perfect for any child who loves trains. When a naughty little mouse steals cheese from the station master, a battle between cat and mouse follows! But they put their differences aside when a big, red steam train comes tearing down the track straight towards them! Exquisitely illustrated, this cat and mouse chase is a truly memorable ride that will be good for many repeated trips. 'This is a book that children will really enjoy... It's a book that will give children's sense of adventure a boost up the bottom.' - Rhino Reads

**Small, Smart & Practical Track Plans** Iain Rice,2000 These clever new layout designs use interchangeable modules, linked dioramas, and even multi-level concepts! Features custom-designed prototype-oriented HO and N scale layout designs and perspective drawings for spaces no larger than 10 x 12 feet. Perfect for modelers second project layout or a portable railroad that travels well.

**Creating Cameo Layouts** Iain Rice,2016-12

**A World of Dioramas** Per Olav Lund,2014-07-01

**Model Railroading in Small Spaces** Mat Chibbaro,2011 Living in a small space doesn't have to prevent you from building a model railroad. The second edition of Model Railroading in Small Spaces takes you step-by-step through the process of building several small layouts. You'll see layouts and

modules that can be stored vertically thanks to folding legs and rolling carts. You'll also see several examples of how small layouts can be built as part of an end table, coffee table, or other piece of furniture--Page 4 of cover.

*Conrail Business & Research Trains* Brock Kerchner, Wes Reminder, 2021-10-15

**Building Dioramas** Chris Mrosko, 2014 Building an effective diorama involves a variety of modeling skills as well as imagination, research, and planning. This book shows you how to plan and compose a diorama; select the proper base; create wedgie dioramas that highlight figures; paint and position figures; use an airbrush; and cast your own resin parts.--From back cover.
