Creating Back Scenes for Model Railways and Dioramas David Wright,2017-03-31 A model railway layout is greatly enhanced by a good back scene - if a modeller is prepared to go to great lengths to achieve realism in the locomotives, rolling stock and buildings, this should be carried through to the scenics. This book is a comprehensive guide for both railway and diorama modellers to create convincing back scenes. It covers choosing the right materials; rural and urban back scenes; traditional painted back scenes; producing back scenes with camera and/or computer; the correct use of forced perspective and scale reduction; getting the transition from layout to back scene right and, finally, lighting and presentation. Aimed at all modellers, especially but not exclusively railway modellers, and superbly illustrated with over 300 colour photographs and diagrams.

Modelling Railway Scenery Volume 2 Anthony A Reeves,2015-04-30 Whether you are just about to embark on your scenic modelling journey, or want to re-work an existing layout, this clearly written volume will be invaluable. The author guides you through the process of collecting field-trip information, both written and photographic, and then demonstrates, using step-by-step instructions, how the colours, textures and features depicted in the reference photographs can be replicated to create a wonderful model landscape. The author describes in detail the modelling techniques he employs to create long and short grass, crop, fallow and freshly ploughed fields, trimmed hedges, mature hedgerows, hedgerow trees, broadland trees in summer, Scots pine trees, silver birch, autumn and winter trees, as well as dead and fallen trees and trees in half relief. Finally, he brings together all the features that have been covered in the book and describes the building of a scale model representation of the field trip photographs in the form of a 3 x 2 ft diorama. Aimed at all those railway modellers who wish to create attractive, realistic scenery for their layouts, brimming with advice and tips and with over four hundred inspirational reference colour images and colour instructional photographs. A sister volume to Modelling Railway Scenery Volume 1 - Cuttings, Hills, Mountains, Streams and Lakes (Crowood 2013).

Shelf Layouts for Model Railroads Iain Rice,2009 Includes specific pointers on shelf layouts. Uses examples for N scale, HO scale, and ON30 scale trains. Covers a variety of scales, modeling eras, and room applications.

How to Design a Model Railroad Lance Mindheim,2021-05-07 This new hands-on book will show how to use tools and elements such as track, turnouts, crossings and scenic elements to paint the canvas. The reader will learn how to blend the track plan itself with structures and scenery in a realistic manner along with a basic understanding of how real railroads work to help them narrow the layout-design focus, leading to a workable plan for the space a modeler has available.

Creating a Military Modelling Diorama Terry Booker,2021-07-26 Creating a diorama offers modellers a chance to display their figures and vehicles in a realistic setting, often providing a 'snapshot' of a moment in history. This book provides step-by-step instructions on how to plan, design and build a diorama and is suitable for new and more experienced modellers. With over 270 colour photographs, it considers all scales from 1/87 (H0) to 1/32 and their implications for the diorama builder. The importance of research to ensure historical accuracy is emphasized. Advice is given on the creation of dioramas in different scales and sizes. It demonstrates the techniques required to achieve effective results for landscapes, terrain and vegetation. Finally, examples are included from the Napoleonic Wars, American Civil War, World War I and World War II.

Constructing Buildings for Model Railways David Ashwood,2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini

movie set, construct a major London terminus and patch repair what could be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.

Scenic Modelling John de Frayssinet,2013-04-22 This invaluable and well-illustrated book describes landscape modelling from a new perspective. It explains in detail how to design and construct a model railway in a convincing and pleasing landscape. The author has always considered that model railway dioramas are an art form and this book is brimming with advice and tips that will allow the modeller to create true-to-life landscapes. Important aspects of all stages of construction are covered, including the building of satisfactory baseboards, topography and ground cover, modelling lakes and waterfalls, and making realistic trees. The author argues that a good model railway is one that is placed in an accurate and realistic landscape which, after all, was there first, and he contends that scenic modelling is not just a means to fill up the gaps in between track work; rather it is essential in creating the perfect backdrop, enabling model locomotives and rolling stock to be displayed convincingly. A remarkable book and describes landscape modelling from a new perspective. Essential reading for all serious railway modellers. Brimming with advice and tips that allows the modeller to create true-to-life landscapes. Superbly illustrated with 230 colour photographs. John de Frayssinet is a professional railway modeller and has written extensively for model railway magazines.

Making Rural Buildings for Model Railways David Wright,2013-04-22 This invaluable, well-illustrated book is essential reading for all those who are interested in developing their modelling skills and creating realistic models of country houses, cottages and farm buildings for their railway layouts. The author encourages and inspires the reader and, moreover, emphasizes that railway modellers can achieve their objectives without purchasing expensive materials. Indeed, all the materials recommended in the book are either recycled or can be obtained quite cheaply. Topics covered include: The materials and equipment required to build models; Modelling methods and construction techniques; Painting, weathering and finishing; Creating a sympathetic setting for your models; Improving kits and 'off-the-shelf' models. The author presents in detail three different rural, scratch-built projects and , in a separate appendix, provides a colour reference guide, thus enabling the modeller to apply the correct colours and shades in order to create authentic and convincing-looking model buildings. An invaluable guide which provides all the information required to create convincing models of rural buildings. Aimed at all those interested in railway modelling whatever their level of ability, and those interested in modelling in general rather than in just railway modelling. Materials and equipment, modelling methods and construction techniques are covered. Superbly illustrated with 320 colour step-by-step photographs and diagrams. David Wright is a professional artist and model maker and provides hands-on experience at railway modelling workshops.

Modelling Historic Buildings and Imaginary Structures David Wright,2021-01-25 This book demonstrates the many different modelling techniques used in the creation of realistic historical buildings and convincing imaginary or fantasy structures. Aimed at the railway and diorama modeller, it includes photographs of existing structures, detailed illustrations and plans, followed by step-by-step photographs of the various stages in their creation; practical tips and constructive advice are provided alongside. Special emphasis has been placed on the use of scrap and low-cost materials. It gives guidance on modelling imaginary buildings and structures, with an example project presented from start to finish and also a complete fantasy-based model railway diorama, from concept and design through to the completed layout is covered. The author has written this book to inspire the modeller to try something innovative, and to attract new entrants to this creative hobby. Drawing on his own experience, he shares practical guidance to help the reader to produce models they will be proud of.

Flames Beyond Gettysburg Scott L. Mingus,2011 The Gettysburg Campaign has been examined in detail from nearly every aspect but one: the key role played by Richard Ewell's Second Corps during the final days in June. This is the first in-depth study of these crucial summer days that not only shaped the course of the Gettysburg Campaign, but altered the course of our nation's history.

How to Build Realistic Model Railroad Scenery Dave Frary,2005 Featuring today's newest products and equipment, this photo-packed guide features contemporary images of diesel locomotives and urban settings, plus
