Annie Jacobsen

Early Settlers of New York State: Their Ancestors and Descendants, Volumes I-VI (PART I - i-iii) Janet Wethy Foley,1996

Surprise, Kill, Vanish Annie Jacobsen,2019-05-14 From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

Car Crash Culture M. Brottman,2016-04-30 A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Doing & Writing Qualitative Research Adrian Holliday,2007-01-24 Accessible, practical and concise, this revised edition expertly tackles the practical problems which writers face when they attempt to transfer the rich data experience of their real world research into a textual product. New attention is paid to the crucial issues of the nature and use of visual data, personal narrative, core and periphery data, and data reconstruction and fictionalization. Sensitive issues dealing with the appropriate use of identity in research settings are clearly discussed, while techniques for avoiding reductive judgements are presented and critically discussed. By making the workings of written study transparent, the book demonstrates how to manage subjectivity and achieve scientific rigour in the qualitative research process. This book provides accessible advice for novice researchers on where to begin and how to proceed. But much more than a simple manual, it also guides the more experience researcher through the social, cultural and political complexities involved in every step of the way. It is an essential tool for students in all disciplines that engage in qualitative research, including sociology, applied linguistics, management, sport science, health studies and education.

RDS, the Radio Data System Dietmar Kopitz,Bev Marks,1999 Authored by two leading experts in Radio Data System (RDS) technology, this book provides easy access to information on RDS technology, specifications, and implementation in one authoritative reference. The authors, who are key figures in the development of RDS and RDS-TMC technology, use a step-by-step approach to overview the background, techniques, capabilities, and limits of these systems.

The Number Sense Stanislas Dehaene,2011-04-29 Our understanding of how the human brain performs mathematical calculations is far from complete, but in recent years there have been many exciting breakthroughs by scientists all over the world. Now, in *The Number Sense*, Stanislas Dehaene offers a fascinating look at this recent research, in an enlightening exploration of the mathematical mind. Dehaene begins with the eye-opening discovery that animals--including rats, pigeons, raccoons, and chimpanzees--can perform simple mathematical calculations, and that human infants also have a rudimentary number sense. Dehaene suggests that this rudimentary number sense is as basic to the way the brain understands the world as our perception of color or of objects in space, and, like these other abilities, our number sense is wired into the brain. These are but a few of the wealth of fascinating observations contained here. We also discover, for example, that because Chinese names for numbers are so short, Chinese people can remember up to nine or ten digits at a time--English-speaking people can only remember seven. The book also explores the unique abilities of idiot savants and mathematical geniuses, and we meet people whose minute brain lesions render their mathematical ability useless. This new and completely updated edition includes all of the most recent scientific data on how numbers are encoded by single neurons, and which brain areas activate when we perform calculations. Perhaps most important, *The Number Sense* reaches many provocative conclusions that will intrigue anyone interested in learning, mathematics, or the mind. A delight. --Ian Stewart, *New Scientist* Read *The Number Sense* for its rich insights into matters as varying as the cuneiform depiction of numbers, why Jean Piaget's theory of stages in infant learning is wrong, and to discover the brain regions involved in the number sense. --The New York Times Book Review Dehaene weaves the latest technical research into a remarkably lucid and engrossing investigation. Even readers normally indifferent to mathematics will find themselves marveling at the wonder of minds making numbers. --Booklist

The New Frontiers of Fashion Law Rossella Esther Cerchia,Barbara Pozzo,2021-01-13 Fashion law encompasses a wide variety of issues that concern an article of clothing or a fashion accessory, starting from the moment they are designed and following them through distribution and marketing phases, all the way until they reach the end-user. Contract law, intellectual property, company law, tax law, international trade, and customs law are of fundamental importance in defining this new field of law that is gradually taking shape. This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective renders more interesting. The volume seeks to sketch out the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

May '68 Julie Pagis,2018 Much as in other locations around the world, civil uprising, particularly rooted in the activism of young people and students, plagued France during May of 1968. Massive strikes and occupations succeeded in paralyzing France's economy and bringing the country to the verge of a leftist revolution. This book studies the life trajectories of many ordinary protestors during the period, using statistics and personal narratives to analyze how this activism arose, its impact on people's personal and professional lives, and its transmission through familial generations.

The Dynamics of Complex Urban Systems Sergio Albeverio,Denise Andrey,Paolo Giordano,Alberto Vancheri,2007-10-16 This book contains the contributions presented at the international workshop The Dynamics of Complex Urban Systems: an interdisciplinary approach held in Ascona, Switzerland in November 2004. Experts from several disciplines outline a conceptual framework for modeling and forecasting the dynamics of both growth-limited cities and megacities. Coverage reflects the various interdependencies between structural and social development.

Advanced Motion Control and Sensing for Intelligent Vehicles Li Li,Fei-Yue Wang,2007-11-24 This book provides the latest information in intelligent vehicle control and intelligent transportation. Detailed discussions of vehicle dynamics and ground-vehicle interactions are provided for the modeling, simulation and control of vehicles. It includes an extensive review of past and current research achievements in the intelligent vehicle motion control and sensory field, and the book provides a careful assessment of future developments.

African Footballers in Europe Ernest Yeboah Acheampong,Malek Bouhaouala,Michel Raspaud,2019-09-30 African Footballers in Europe traces the social and economic evolution of African football and examines the strategies and resources that players mobilise in their migrations, with a particular focus on 'Give Back Behaviours' (how players contribute to their countries or communities of origin). It shines new light on contemporary migrations, labour markets in sport, and processes of development in Africa. Using a multidisciplinary approach and Weberian methodology to analyse players' 'Give Back' behaviour, the book highlights the complex rationale behind this behaviour, based on a combination of social, cultural, and economic elements. It features interviews with former and current African professional players, providing a vivid picture of the role of communities in players' migration projects, the allure of the European football market, and investment initiatives that can contribute to local and regional development. This is a vital read for academics, researchers, and students of sport sciences, sociology of sport, sport management, sociology, geography, political sciences, management, sociology of Africa, migration studies, sociology of the labour market, and economic sociology. It is also an important resource for professional organisations, NGOs, football agents, football administrators, federations, confederations, and governments.

Geology at ANU (1959 - 2009) Mike Rickard,2010-12-01 This history was undertaken to celebrate the 50th anniversary of the Geology Department at ANU, and to honour its founding professor David A. Brown. It includes contributions from some 100 former students outlining their career successes. This history was compiled by Dr Mike Rickard, a staff member of the Department of Geology from 1963 to 1997, who also served as Head of Department for seven years. He graduated BSc and PhD from Imperial College London in 1957 and has specialised in mapping the structure of mountain chains in Ireland, Canada, Norway, and southern South America. He also mapped volcanic rocks for the Geological Survey of Fiji. He taught Structural Geology and Tectonics and has supervised field work in south eastern and central Australia. After retirement he has taught U3A courses in Earth Science.

September 11 Fiction of Matrix Faruk Arslan,2005-08-01 I was inspired by Hollywood movie in giving a name to this book. Matrix is the name of a fake world which is believed to be fictitious. September 11 was a starting point which differentiates between those who resist and those who don't and between those who believe and those who don't. I agree with war on terrorism, blame all kind of terrorist and terror acts, but I disagree with the fiction of Matrix. Absolutely, Al Qaeda is a terrorist organization and Laden is the mastermind of terrorism. Thank you Canada. I am proud of being Canadian, otherwise I would not feel free to write this book in US. Strategic Design and Innovative Thinking in Business Operations Hasan Dincer,Ümit Hacıoglu,Serhat Yüksel,2018-05-30 Recently, rapid technological advances have been influencing the global business operations strategies at companies of all sizes like never before. At the same time, there has been a shift in business cultures due to the rising prevalence of matrix organizations and innovative thinking. This book investigates the role of these factors in shaping the business operations of tomorrow. To address the topic comprehensively, the editors have gathered expert contributions exploring the following dimensions: the business and organizational environment, strategic design, innovativeness and risk management. Discussing aspects ranging from customer selection to understanding regional, national and supranational market dynamics, the contributions will help readers understand both the complexity of and opportunities presented by designing operations.

Mastering Strategy Michael R. Braun,Scott F. Latham,2014-01-27 Fun to read yet full of powerful business information, this guide provides a comprehensive toolkit for crafting winning strategies in today's competitive environment. Mastering Strategy: Workshops for Business Success uses a series of workshops to strip away confusion and present popular and proven strategy frameworks in an easy-to-understand, straightforward, and entertaining manner. Using everyday language that avoids jargon, the workshops in this comprehensive toolkit help readers identify the competitive patterns of any industry, understand any company's competitive position in its market, formulate a set of strategic solutions for a company, and recognize the risk-return trade-offs of those strategic solutions. The authors cover introductory competitive strategy concepts while also providing guidance for business people intent on taking their strategic thinking skills to the next level. From business professionals seeking to quickly grasp and employ strategy essentials, to would-be entrepreneurs sizing up the potential of their business opportunity, to scientists pursuing commercialization of their inventions, this book is the ideal resource to make each a more effective strategic thinker.

Global Business Management Abel Adekola,Bruno S. Sergi,2016-04-22 This book interweaves the concepts of the guidance on globalization, international management, and the intricacies of international business that many books

on the market treat independently. It clarifies and explains culture, cultural misunderstandings, and cross-cultural interactions. Adekola and Sergi's text is unique in that it offers both the management perspective and the cultural perspective. It is for managers seeking to thrive in the global economy. This book focuses on managing global organizations, providing a basis for understanding the influence of culture on international management, and the key roles that international managers play. It clearly shows how to develop the cross-cultural expertise essential to succeed in a world of rapid and profound economic, political and cultural changes.
