The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Large Scale Warship Models Kerry Jang, 2019-02-28 This illustrated guide presents step-by-step instructions and techniques for warship modelers ready for the challenge of building at larger scales. Many warship modelers who work in smaller scales are daunted by the challenge of tackling something larger. But in *Large Scale Warship Models*, expert modeler Kerry Jang demonstrates that it's not as difficult as it may seem. In fact, any experienced modeler will already possess the basic skills required. This volume covers the essential new techniques for working in scales that capture the grandeur of actual ships. In the first part of the book, Jang discusses how to choose between a kit, a semi-kit or building from scratch. He also covers what conventional kit building skills are transferable to work on large-scale projects. Novel requirements like research, obtaining plans and sourcing material or fittings are also covered. The second part describes building methods, including the latest techniques like casting fittings in resin. These methods apply to both static and radio-controlled models. Original color photos illustrate each chapter, and the book concludes with a gallery of superb models intended to inspire the would-be large-scale warship modeler to take the plunge.

The Jeep Lance Cole, 2019-07-19 The Second World War Jeep was one of the most famous and influential military vehicles of all time, and over 600,000 were produced. It served with all the Allied forces during the war on every front and it has been the inspiration behind the design of light, versatile, rugged military and civilian vehicles ever since. In this, the first volume in Pen & Sword's LandCraft series, Lance Cole traces the design, development and manufacturing history of the Jeep and describes its operational role within the Allied armies. A selection of archive photographs showing the Jeep in service in European and Pacific campaigns gives a graphic impression of how adaptable the Jeep was and records the variety of equipment it could carry. The book is an excellent source for the modeller, providing details of available kits, together with specially commissioned colour profiles recording how the Jeeps used by different units and armies appeared.
