Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank

Mastini,1990-03-22 In Ship Modeling Simplified, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects. Ship Modeling Simplified even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

Viking Longship Keith Durham,2002-02-25 Viking longships evolved from one-man canoes of the Scandinavian Stone Age, through wood-built-ships of c. 200 BC into the recognisable longboats of the 4th century AD. From this point, the Viking Longship developed into the pre-eminent raider and trader in the North Sea and Baltic, venturing as far afield as the Mediterranean, North Atlantic and modern-day

Russia. Keith Durham uses reconstructions, original sources, translations and archaeological evidence to render a vivid picture of the vessels that dominated the seaways of Scandinavia, founded colonies on Iceland, Greenland and the New World and terrorised the coastlines of northern Europe. Also covered are Norman vessels, including the invasion fleet of William the Conqueror.

Bark Canoes and Skin Boats of North America Edwin Tappan Adney, Howard I. Chapelle, 2007-10-17
The bark canoes of the North American Indians, particularly those of birchbark, were among the most highly developed manually propelled primitive watercraft. Built with Stone Age tools from available materials, their design, size, and appearance were varied to suit the many requirements of their users. Even today, canoes are based on these ancient designs, and this fascinating guide combines historical background with instructions for constructing one. Author Edwin Tappan Adney, born in 1868, devoted his life to studying canoes and was practically the sole scholar in his field. His papers and research have been assembled by a curator at the Smithsonian Institution.
