Zeppelin! Guillaume de Syon,2007-07 Six decades later, there is still a mystique surrounding these technological leviathans, one that Zeppelin! addresses with insight and wit.

What Was the Hindenburg? Janet B. Pascal,Who HQ,2014-12-26 At 800-feet long, the Hindenburg was the largest airship ever built--just slightly smaller than the Titanic! Also of a disastrous end, the zeppelin burst into flame as spectators watched it attempt to land in Lakehurst, New Jersey on May 6, 1937. In under a minute, the Hindenburg was gone, people jumping from windows to escape. However, only 62 of the 97 crew members and passengers onboard survived. The exact cause of the disaster is still unknown and remains a fascinating historical mystery perfect for this series.

The Hindenburg Kathleen W. Deady,2003 Describes the giant airship Hindenburg, the events that led up to its explosive crash on a New Jersey airfield in 1937, and the effects of the disaster on airship travel.

The Golden Age of the Great Passenger Airships Harold Dick,Douglas Robinson,2014-12-02 Drawing on the

extensive photographs, notes, diaries, reports, recorded data, and manuals he collected during his five years at the Zeppelin Company in Germany, from 1934 through 1938, Harold G. Dick tells the story of the two great passenger Zeppelins. Against the background of German secretiveness, especially during the Nazi period, Dick's accumulation of material and pictures is extraordinary. His original photographs and detailed observations on the handling and flying of the two big rigids constitute the essential data on this phase of aviation history.

Dirigible Dreams C. Michael Hiam, 2014-10-07 Here is the story of airships—manmade flying machines without wings—from their earliest beginnings to the modern era of blimps. In postcards and advertisements, the sleek, silver, cigar-shaped airships, or dirigibles, were the embodiment of futuristic visions of air travel. They immediately captivated the imaginations of people worldwide, but in less than fifty years dirigible became a byword for doomed futurism, an Icarian figure of industrial hubris. *Dirigible Dreams* looks back on this bygone era, when the future of exploration, commercial travel, and warfare largely involved the prospect of wingless flight. In *Dirigible Dreams*, C. Michael Hiam celebrates the legendary figures of this promising technology in the late nineteenth and early twentieth centuries—the pioneering aviator Alberto Santos-Dumont, the doomed polar explorers S. A. Andr   and Walter Wellman, and the great Prussian inventor and promoter Count Ferdinand von Zeppelin, among other pivotal figures—and recounts fascinating stories of exploration, transatlantic journeys, and floating armadas that rained death during World War I. While there were triumphs, such as the polar flight of the *Norge*, most of these tales are of disaster and woe, culminating in perhaps the most famous disaster of all time, the crash of the

Hindenburg. This story of daring men and their flying machines, dreamers and adventurers who pushed modern technology to—and often beyond—its limitations, is an informative and exciting mix of history, technology, awe-inspiring exploits, and warfare that will captivate readers with its depiction of a lost golden age of air travel. Readable and authoritative, enlivened by colorful characters and nail-biting drama, *Dirigible Dreams* will appeal to a new generation of general readers and scholars interested in the origins of modern aviation.

Empires of the Sky Alexander Rose, 2020-04-28 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky—a story that ended with the fiery destruction of the Hindenburg. “Genius . . . a definitive tale of an incredible time when mere mortals learned to fly.”—Keith O’Brien, *The New York Times* At the dawn of the twentieth century, when human flight was still considered an impossibility, Germany’s Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world’s first successful flying machine. As the Wrights labored to invent the airplane, Zeppelin fathered the remarkable airship, sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades, in the quest to control one of humanity’s most inspiring achievements. And it was the airship—not the airplane—that led the way. In the glittery 1920s, the count’s brilliant protégé, Hugo Eckener, achieved undreamed-of feats of daring and skill, including the extraordinary Round-the-World voyage of the Graf Zeppelin. At a time when America’s airplanes—rickety deathtraps held together by glue, screws, and luck—could barely make it from New York to Washington, D.C., Eckener’s airships serenely traversed oceans without a single crash, fatality, or injury. What Charles Lindbergh

almost died doing—crossing the Atlantic in 1927—Eckener had effortlessly accomplished three years before the Spirit of St. Louis even took off. Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes, Eckener built his masterwork, the behemoth Hindenburg—a marvel of design and engineering. Determined to forge an airline empire under the new flagship, Eckener met his match in Juan Trippe, the ruthlessly ambitious king of Pan American Airways, who believed his fleet of next-generation planes would vanquish Eckener’s coming airship armada. It was a fight only one man—and one technology—could win. Countering each other’s moves on the global chessboard, each seeking to wrest the advantage from his rival, the struggle for mastery of the air was a clash not only of technologies but of business, diplomacy, politics, personalities, and the two men’s vastly different dreams of the future. Empires of the Sky is the sweeping, untold tale of the duel that transfixed the world and helped create our modern age.

Zeppelin Hans G. Knausel, 2014-02-01 On July 2, 1900, Ferdinand Graf Zeppelin made the first ascent in an airship of his own design. The flight was initially viewed with skepticism, however public opinion changed after the destruction of his fourth airship at Echterdingen. Zeppelin received so many donations that not only was he able to found his own companies for the purpose of building airships, but also production facilities for the development and manufacture of engines, transmissions, shells, gas cells, airship hangars and even the construction of aircraft. All of these companies enjoyed a tremendous upswing during the First World War. After the war the Zeppelin airship company took some time to get back on its feet, but then produced its crowning achievements - the LZ 127 Graf Zeppelin and the LZ 129 Hindenburg - memories of which

still remain alive and influence the present. Author Hans Knäusel describes the Zeppelin story with a critical look at the economic and political effects of the period, from the beginning until the destruction of the Hindenburg in 1937. He also discusses airships built in other countries using the Zeppelin system, as well as the hangars and landing masts vital to operation of the big airships.

Zeppelin Ernst August Lehmann, 1937 This is a thorough first person account of zeppelins, their history and flights. This book was being translated by Leonhard Adelt, who was on board with Lehmann as a guest during the Hindenburg's last flight. The book had recently been published in German when the Hindenburg was destroyed. The English translation, completed by Jay Dratler, was published in 1937 with a preface and closing chapter by American airship captain Charles E. Rosendahl, who had interviewed Lehman on his deathbed.

ZEPPELIN Peter W. Brooks, Peter M. Brooks, 1992-07-17 In *Zeppelin: Rigid Airships, 1893-1940*, Peter Brooks traces the entire development and service history of all the 163 rigid airships ever built. Beginning with Count Ferdinand von Zeppelin's first rigid airship, which flew from Lake Constance on 2 July 1900, the author goes on to describe all the airships built in Germany, Great Britain, the United States, and France in the years up to the Second World War. From the first primitive airship, Zeppelin went on to develop the passenger aircraft operated by DELAG, the world's first airline. During the First World War, Zeppelins were in service with the German Army and Navy and were employed in raids on the

United Kingdom. Between the wars, the Graf Zeppelin and Hindenburg provided the first transoceanic air services, between Germany and both North and South America. The book covers all fifty types of rigid airship, illustrating each with photographs, and, for the first time in a single volume, a side elevation. Extensive appendixes provide a mass of information on the airships themselves, their sheds, and the transatlantic Zeppelin schedules.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Zeppelin Christopher Chant, 2000 The story of an invention that still exerts a certain fascination. This account of the Zeppelin begins at the turn of the century, paints a remarkable picture of its role during World War I and then takes the reader through the golden age of airship travel in the 1920s and 30s.

When Giants Roamed the Sky Alanson Dale Topping, 2000 Describes the career and contributions of Zeppelin designer Karl Arnstein and chronicles the growth of the airship industry in the early decades of the 20th century. Tells the story of Arnstein's education and his move from Germany to the US, and his work for a company that became a major defense contractor in WWII. Includes black and white historical and personal photos, and color illustrations. Topping worked for Goodyear Aerospace Corporation and Bell Aerospace-Textron. Brothers is a freelance journalist. He succeeded Topping as editor of Buoyant Flight. Annotation copyrighted by Book News, Inc., Portland, OR

Zeppelin Hindenburg Dan Grossman, Cheryl Ganz, Patrick Russell, 2017 'It burst into flames! ... It's burning, bursting into flames and it's - and it's falling on the mooring mast and ... this is terrible. This is one of the worst catastrophes in the world.' On 6 May 1937 the

pioneering Zeppelin Hindenburg, LZ-129, ended its career in flames when its hydrogen lifting gas ignited while landing at Lakehurst, New Jersey. But the airship had already completed sixty-two successful flights before this fateful day, catering to Nazi officials, socialites and the well heeled. Hindenburg offered cutting-edge transport technology with luxury and style, making it a spectacle to behold on both sides of the Atlantic, and was expected to be just the first of many giant passenger Zeppelins. Three world-renowned experts have collaborated to create the definitive history of the Zeppelin Hindenburg, using stunning black-and-white and colour photographs, rare ephemera and detailed diagrams to highlight the sheer style of this mammoth lighter-than-air craft and explain the shocking disaster that signalled the end of airship travel.

Zeppelin Andrew Donkin, 2000 Traces the history of the Zeppelin airship, or blimp, describing triumphant successes and tragic failures.

KNOWLEDGE & POWER S PACIFIC LINDSTROM LAMONT, 1990-10-17 Drawing on the extensive photographs, notes, diaries, reports, recorded data, and manuals he collected during his five years at the Zeppelin Company in Germany, Harold G. Dick tells the story of the two great passenger Zeppelins. --from vendor description.

Hindenburg Rick Archbold, Ken Marschall, 1994 A history of dirigible flight describes travel aboard the luxury German airship, the Hindenburg, and details its 1937 demise

The Hindenburg - a Ship of Dreams John Provan, 2012-05-23 75 years ago, the explosion at Lakehurst marked a dramatic end to the Golden Days of Lighter-than-Air. The crash of LZ-129 Hindenburg was the first disaster to be documented in pictures (one photographer even had Kodak color slide film, which had

been developed one year prior), filmed by several national camera teams and recorded on records with the famous words of reporter Herb Morrison. For its short existence, the LZ-129 Hindenburg was the largest, most luxurious flying object, that mankind ever built. The sheer size, of an airship that was three football fields long and over 16 stories tall, dwarfs our imagination of anything we have ever seen fly. Even the new Airbus A-380 or the advertising blimps of today, such as the Zeppelin NT, the largest airship operating today can not compare. The 25 such airships would fit inside the Hindenburg. The passengers were offered a spacious social room, a music room with piano, a writing room, sleeping quarters with running hot and cold running water, a shower, a bar in which one could even smoke (despite the flammable hydrogen gas), and even real china and silverware, with fresh cooked meals provided three times a day. No aircraft today, can offer compare. This book covers in detail, the construction, early test flights and later regular passenger flights up until that fateful day. The appendix includes not only a short list of all these flights, but also includes the most complete passenger list ever compiled. Yet, faith in superior technology was short lived. Just like the passenger ship, Titanic, a quarter century prior; the Hindenburg marked yet another disaster that would shake that faith and remain embedded in our memories.
